Preface

This text collection has multiple goals: first of all, it aims to showcase the richness of the Even language through cohesive texts. Secondly, it is intended to highlight the language's dialectal diversity, since texts from two geographically and linguistically distant varieties are included. (As a matter of fact, these are so divergent linguistically that one could consider them different languages. Nevertheless, current classifications (e.g. Burykin & Šarina 2021: 24) maintain the label 'dialect' – диалект/говор in Russian usage – even while acknowledging the considerably reduced levels of mutual intelligibility between western and eastern dialects.) Thirdly, with its thematic focus on aspects related to reindeer herding and hunting and fishing it aims to illustrate the traditional way of life of the Evens, which is rapidly being lost. Last, but not least, it is meant to be a tribute to the Even speakers who shared their stories with me and my colleague Natalia Aralova, both those whose narratives are published here and those whose narratives did not fit with the theme of the volume.

As such, this volume differs from the Even corpus deposited in the DOBES archive.¹ The texts published here are often just excerpts from longer recordings; in some cases, I rearranged sentences to allow for a more cohesive narrative. The texts are also more or less heavily edited by omitting repetitions, hesitations, false starts, self-repairs, or clear speech errors, as well as egregious code-switches to Russian (see Section 4.1 for more information). While I feel strongly that all of these items are characteristic of spoken speech and hence linguistically important, since they provide us with insights into how we produce language, I am certain that the speakers themselves – who like most laypeople think that such elements indicate a lack of linguistic competence – would not want to have their disfluencies put down in writing. My linguistic conscience during this editing process was assuaged by the knowledge that the unadulterated recordings with their transcriptions, translations, and glosses are available for those who would like to use them.

The texts published here differ in another aspect from the DOBES deposit: I took the opportunity offered by working on these narratives to update the transcription and the glosses to reflect the work by Aralova (2015) and my improved

¹<https://hdl.handle.net/1839/90ffbdf-4b57-4964-8b79-2e6b96717c32>

analysis of certain features of the language. The transcription and glosses might thus also differ from those found in my previously published articles.

This work would obviously not have been possible without the help of many institutions and individuals. First of all, the fieldwork that underlay the recording and annotation of the narratives was generously funded by the Max Planck Society (via the MPRG on Comparative Population Linguistics that I led from 2007 through 2011) and the Volkswagen Foundation (via the DOBES grant “Documentation of the dialectal and cultural diversity among Evens in Siberia”). A further fieldtrip to Kamchatka was financed by the research unit Dynamique du Langage (CNRS & Université Lyon 2). In addition, I obtained funding from the LabEx ASLAN² of Lyon (project AFE “CleanCorpus”) that allowed me to outsource the reglossing of most of these texts. I am intensely grateful to all of these institutions for their financial support.

Secondly, I am grateful for the support of many colleagues: Katharina Gernet immensely facilitated my first trip to Kamchatka by asking her friends and consultants to take care of me; she furthermore provided invaluable assistance with data preparation in the final months of the DOBES project. Sébastien Flavier was kind enough to produce the maps for me, and Noëllie Bon helped speed along the work on the volume by reglossing large portions of the narratives. Misha Daniel corrected the Russian introduction to the texts in Chapter 5, Christian Döhler turned disparate Word and FLEEx files into a beautiful book, and two anonymous reviewers and Matthew Korte, who proofread the manuscript, spotted errors and made constructive suggestions on how to improve the text. A huge “Thank you!” to all of them.

I am particularly indebted to Natalia Aralova, who joined me during two field trips, sharing not only the work of recording, transcribing, translating, and glossing texts, but also the ups and downs of fieldwork, and who helped me understand the language better through discussions throughout the years. She furthermore corrected the Russian preface and read through the Introduction and text synopses in spite of a very busy schedule, providing me with invaluable comments. Notwithstanding the efforts of all of these colleagues, I fear that many inconsistencies and errors remain; for these I, of course, am solely responsible.

Lastly and most importantly, I want to express my deep gratitude to all the people in Yakutia and Kamchatka who made this work possible, many of whom are unfortunately not alive anymore: the colleagues from the Institute of Humanitarian Studies and the Problems of the Minority Peoples of the North in

²(ANR-10-LABX-0081) of the Université de Lyon within the French program “Investments for the Future” operated by the National Research Agency (ANR).

Yakutsk for their invaluable logistical support, the families and individuals who hosted me in the field and on my way there, the individuals who told stories and who participated in conversations, and especially the consultants who transcribed and translated the many hours of recordings: Ekaterina Shadrina, Ekaterina Krivoschapkina, and Ija Krivoschapkina in Sebjan-Küöl and Aleksej Ichanga and Rimma Egorova in Esso. I am especially indebted to Ija Krivoschapkina and Rimma Egorova for the countless hours they spent patiently answering my often obtuse questions. Finally, a particularly heartfelt word of thanks is due to Valentina Axmetova and Anatolij Solodikov for taking Natalia Aralova and me to the reindeer herd, and to the Adukanova/Solodikov family for hosting us at their homestead on the Managič river in 2009: these visits were immensely enriching from a personal as well as professional perspective.

Предисловие

Эта книга предназначена, прежде всего, для пользователей с научными интересами и имеет своей целью познакомить их с богатством эвенского языка, с разнообразием его говоров и с традиционным образом жизни эвенов. Поэтому тексты, опубликованные здесь, отбирались с учётом тематической направленности, и рассказы, посвящённые другим темам, были исключены. Кроме того, в книгу включены только монологи, наиболее понятные без соответствующей видеозаписи, и некоторые очень интересные пояснения традиционных занятий, записанных в музеях, остались неопубликованными. Поэтому в этой книге, к сожалению, отражена лишь десятая часть всех красивых и интересных рассказов носителей ламунхинского и быстринского говоров эвенского языка, записанных в течение нескольких поездок в Себян-Кюёль и в Быстринский район.

Очень важно отметить, что эти тексты являются устными рассказами без особой подготовки, аудиозапись которых затем расшифровалась и записывалась. Поэтому они содержат такие элементы устной речи, как повторы, вкрапления якутских и русских слов или оговорок, и этим сильно отличаются от письменных текстов. По возможности, оговорки и иноязычные вкрапления были поправлены, чтобы получить как можно более связный рассказ, но устная стилистика тем не менее явно выражена.

Моя работа была бы невозможной без поддержки многих людей, многие из которых к сожалению уже не в живых, и я хочу выразить всем им

Preface

глубокую благодарность: коллегам из Института гуманитарных исследований и проблем малочисленных народов Севера СО РАН за неоценимую поддержку работы в Якутии; всем гостеприимным семьям в Эссо, Анавгае, Себян-Кюёле и по пути туда за приют и доброе отношение; всем многочисленным дикторам, которые поделились своим красивым языком через забавные, пояснительные или захватывающие рассказы из собственной жизни, из истории посёлков или из фольклора (слишком много из них, увы, не нашли места в этой книге); и особенно всем тем, кто работал над записями: Екатерине Игоревне Шадринной, Екатерине Афанасьевне Кривошапкиной и Ие Васильевне Кривошапкиной в Себян-Кюёле и Алексею Евстроповичу Ичанге и Римме Максимовне Егоровой в Эссо. Я особенно благодарна Ие Васильевне и Римме Максимовне за бесчисленные часы, которые они уделили моим зачастую недалёким вопросам. Наконец, я хотела бы выразить огромную благодарность Валентине Иннокентьевне Ахметовой и Анатолию Афанасьевичу Солодикову за то, что они свозили нас с Наталией Араловой в оленье стадо, а также семьям Евдокии Григорьевны Адукановой и Артёма Николаевича Солодикова за то, что они приняли нас на своей рыбалке на Маныче в 2009-м году: эти поездки дали нам неоценимо богатый опыт как с рабочей, так и с личной точки зрения.

Русский язык проверили и бесчисленные мои ошибки поправили Наталия Аралова и Михаил Даниэль, за что я им выражаю искреннюю благодарность.

Part I

Preliminaries

1 Introduction

1.1 The text collection

Even is a Northern Tungusic language spoken in numerous small settlements by formerly completely nomadic hunters and reindeer herders dispersed over northeastern Siberia, from the Lena-Yana watershed in the west to the Sea of Okhotsk and Kamchatka in the east. This geographical spread has led to considerable dialectal fragmentation, with a number of different dialects (often comprising further sub-dialects) being recognized that are classified into two (Burykin 2004: 85) or three (Novikova 1960: 17-19, Filippova 2019) groups. Mutual intelligibility between the peripheral western and eastern dialects is decidedly low (cf. Novikova 1960: 19, Burykin 2004: 64, Burykin & Šarina 2021: 24), not least due to differential contact influence. Nowadays, the Tungusic languages are highly endangered (Janhunen 2010), and Even is no exception. However, there are differences in vitality between dialects: some, such as the Tügesir dialect formerly spoken in the Eveno-Bytantaj district of Central Yakutia, are practically extinct (Vinokurova et al. 2022), while others, such as the Berëzovka dialect of northeastern Yakutia, still count some younger speakers (Grenoble & Osipov 2023: 7).

The text collection published here contains a selection of monological narratives from two geographically distant and linguistically divergent Even dialects: Lamunkhin Even spoken in the village Sebjan-Küöl in the Kobjaj district of Central Yakutia, and Bystraja Even spoken in two villages of the Bystraja district of Central Kamchatka, Esso and Anavgaj (see Figure 1.1). Of these, the Lamunkhin dialect is in a vulnerable state, with only few children and adolescents still speaking it, while Bystraja Even is severely endangered, with no fluent speakers younger than 50 years of age and no active, even if hesitant, speakers younger than 20-29 years (Krivonogov 2024: 201). Both dialects are spoken by communities that use other languages at least as frequently, if not more often, than Even: in Sebjan-Küöl, the dominant language of everyday communication is the Turkic language Sakha (Yakut); in addition, Russian is encroaching more and more via the media and schooling. In the Bystraja district, it is Russian that has taken over in all spheres of life. This sociolinguistic situation has led to a large amount of code-switching and borrowing, including the cross-linguistically rare borrowing

1 Introduction

of entire verbal paradigms from Sakha into Lamunkhin Even (Pakendorf 2009, 2019a).

Figure 1.1: Map of northeastern Asia showing the approximate location of Lamunkhin Even and Bystraja Even (Leaflet | Map data © OpenStreetMap contributors, CC-BY-SA, Imagery © Mapbox).

The texts included in this collection were recorded and annotated during multiple field trips of three to six weeks each: in 2008, 2009, 2010, and 2012 I visited Sebjan-Küöl and in 2007, 2009, and 2016 I travelled to the Bystraja district. Some further work was done at the MPI for Evolutionary Anthropology, Leipzig, Germany, in 2013, when a speaker from each of the dialects visited the institute for a month. The texts were chosen with two concerns in mind: on the one hand they were selected to be interesting from a linguistic and ethnographic point of view, highlighting particular dialectal features and aspects of the traditional way of life, in particular reindeer herding and hunting. On the other hand, they were also chosen for their narrative quality and ease of comprehension without video support, so that some more hesitant recordings as well as demonstrations in museums were excluded, even though they contain interesting ethnographic information. Given the thematic focus, narratives that dealt with other topics were also excluded, irrespective of their narrative quality or linguistic interest, and not without regret. Some speakers produced very long narratives that touched upon many different topics. In these cases, I chose excerpts that fit the theme of the collection and arranged them in such a way as to enhance the overall coherence of the volume.

Given the considerable differences between Lamunkhin and Bystraja Even (both from a linguistic perspective as well as with respect to the speakers' history and way of life), the texts are grouped by dialect. A total of 15 Lamunkhin Even texts are included, of which several are excerpts from longer recordings (Table 1.1). These amount to approximately 600 sentences and 4,800 words and cover about 10% of the total Lamunkhin Even corpus. Unfortunately, only female speakers are represented. The overall Bystraja Even corpus is smaller than the Lamunkhin Even corpus, and this is reflected here: 11 texts are included in this collection (Table 1.1), of which two are excerpts from one recording. They comprise about 520 sentences and not quite 3,200 words, again amounting to approximately 10% of the total Bystraja Even corpus. While the Bystraja Even texts were produced mainly by female speakers, the narratives of two men are included as well: those of G. A. Solodikov and A. N. Solodikov.

Table 1.1: The texts included in the volume in the order of appearance (with the age of the speakers being that at the time of recording)

TEXT: TITLE	SPEAKER (AGE)	TOPIC	WORDS
Lamunkhin Even			
1: Migrating	I. V. Krivoschapkina (29)	First childhood memories of migrating by reindeer	166

13: Aufeis	Z. A. Stepanova (60)	The hazards of travelling by reindeer in winter	616
14: Hunting tradition	Z. A. Stepanova (58)	A humorous anecdote about the need to share hunting spoils	199
15: Good fortune	I. V. Krivoshapkina (29)	Having the good fortune to bag two snow sheep while going for a walk	250
Bystraja Even			
1: A life with reindeer	E. G. Adukanova (77)	Marrying a reindeer herder and living in the herd	312

Continued on next page

Table 1.1 – continued from previous page

TEXT: TITLE	SPEAKER (AGE)	TOPIC	WORDS
2: Childhood in a reindeer herd	P. M. Banakanova (68)	Memories of her adolescence spent herding reindeer	323
3: Herding reindeer	G. A. Solodikov (55)	A description of how they herd reindeer in Kamchatka	275
4: In the reindeer herd	V. I. Axmetova (67)	A description of life as a ‘yurt worker’ (<i>čumrabočnica</i>)	429
5: Protective doll	V. I. Axmetova (67)	A magic doll that protects the reindeer	96
6: To school	E. G. Adukanova (77)	Memories of her first year in school and the joyous return to her parents	299
7: Childhood memoirs	R. M. Solodikova (63)	Memories of an Even childhood	637
8: Modes of transport	R. M. Egorova (53)	A description of the traditional means of transport	143
9: At the fishing camp	N. A. Tylkanova (58)	An anecdote about drying salmonids in summer	110
10: Blue eyes	N. A. Tylkanova (58)	Another anecdote about the fishing camp	123
11: Hunting and fishing	A. N. Solodikov (51)	A description of the yearly cycle of hunting and fishing	366
total			7,898

As mentioned in the Preface, the texts were all retranscribed and reglossed to take into account the work by Aralova (2015) and my increased understanding of the language. The data in this collection might thus differ considerably from examples found in previous publications as well as from the annotated recordings

1 Introduction

that were previously deposited in the DOBES archive.¹ The texts were further edited to remove disfluencies and repetitions and thus make them more readable. The original recordings with full annotations (transcription, translation, glossing) can be found in the Even deposit in the DOBES archive.

In order to make the collection useful to the Lamunkhin and Bystraja Even communities, each text is provided not only in an IPA-based transcription with glosses and English translation, but also in a Cyrillic transcription with Russian translation. For this, I follow the local orthographies in use by the two communities, which differ from the “literary” standard established in 1958 (Burykin 2004: 267). Since these orthographies are not at all standardized, and since the Cyrillic version of the texts is intended purely for use by the communities, I refrain from including a transliteration table. Unless specified otherwise, all the photos included here were taken by myself between 2007 and 2010 during various trips to Sebjan-Küöl and the Bystraja district of Kamchatka.

1.2 Lamunkhin Evens

The Lamunkhin Evens were fully nomadic until the early 1930s, when the Soviets established a ‘native council’ (*tuzemnyj sovet*) in their territory, with the choice of location – near a lake rich in fish and mountains rich in game – being decided by the Evens themselves (Kirillina 2010, Filippova 2017: 206-207). Initially, the council comprised three villages (Figure 1.2): Sebjan-Küöl, Segen-Küöl, and Endybal (the site of a silver mine), but Endybal is currently no longer inhabited by Evens. In the 1980s the majority of the reindeer herders from Segen-Küöl were resettled in Sebjan-Küöl, making Sebjan-Küöl (Figure 1.3) and its reindeer herds the main location where Lamunkhin Even is spoken. It is a very isolated village (Figure 1.4), accessible only by air (Figure 1.5) or by winter ‘roads’ (*zimnik*) that lead over hazardous stretches of *aufeis* (water that spreads over frozen rivers and that is itself covered by only a thin sheet of ice) and that are navigable only by trucks (Figure 1.6).

1 Introduction

In 1941 a primary school was established in Sebjan-Küöl which expanded over the years; since 1970 it encompasses all ten grades, meaning that children can complete their entire schooling in the village and don't need to go to boarding school in distant settlements. The fact that this school was staffed and directed predominantly by local Evens meant that children were allowed to continue to speak Even in school rather than being forced to speak Russian, as was the norm in schools all over Siberia. Furthermore, Evens have been in the majority in Sebjan-Küöl since the first counts in 1959 (Filippova 2017), which further reinforced language maintenance (Pakendorf 2024). Nevertheless, genetic studies indicate admixture with Sakha (Yakuts) in the male line (Duggan et al. 2013), and there are considerable numbers of households in the village with a Sakha parent. Sakha is therefore widely used in interactions in public spaces in the village, accounting for the pronounced Sakha linguistic influence detectable in the language.

1.3 Bystraja Evens

The Bystraja Evens appeared in Central Kamchatka only in the mid-19th century, where they migrated with their reindeer along the western edge of the Sredinny Range until the first establishment of three native councils in 1926 in settlements called Kekuk, Laučan, and Anavgaj (Figure 1.7). Esso (Figure 1.8) was founded as the centre of the Bystraja district in 1932, a role it still fulfills. By the end of the 1930s two more settlements had been founded, Tvajan and the logging camp Krapivnaja (Kirillova 2012: 117). However, all of these but Esso and Anavgaj (Figure 1.9) were closed down in successive waves of forced resettlement between 1956 and 1975. In one of these forced relocations Evens were moved from Tvajan to another abandoned logging camp, Bystraja (Gernet 2008: 64-72), until this was closed down in turn ten years later. Neither the area around Bystraja and Krapivnaja, which were located at the eastern side of the Sredinny Range, nor that around Esso and Anavgaj, which are located in a densely forested mountainous area with narrow valleys, were amenable to reindeer herding. Furthermore, the fish runs in Esso and Anavgaj were insufficiently rich to feed everyone, so that the traditional way of life of the Evens declined steeply, with the indigenous population becoming reliant on government subsidies (Dul'cenko 2010: 128-129).

Whereas the Evens were practically the sole inhabitants of the Bystraja district before Sovietization, by the time of the collapse of the Soviet Union they constituted only about 25% of the population (Gernet 2008: 88), with Russian-speaking newcomers from the European parts of the Soviet Union making up

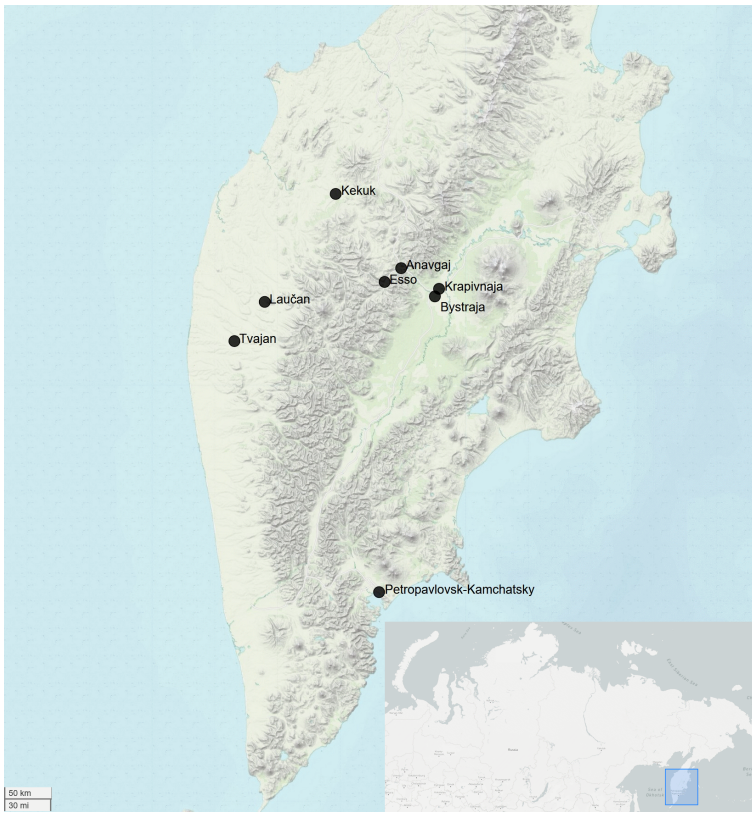

Figure 1.7: Location of historic Bystraja Even settlements; Petropavlovsk-Kamchatsky is shown for reference (Leaflet | Map data © OpenStreetMap contributors, CC-BY-SA, Imagery © Mapbox).

the vast majority. The situation differs, however, between the two villages Esso and Anavgaj: in 2005, Evens made up only slightly more than 20% of the population of Esso as opposed to 72% newcomers, while they represented 55% of the inhabitants of Anavgaj, with nearly 20% of the population being Koryaks who were settled here at the end of the 1950s and only 25% newcomers (Gernet 2008: 293, Kirillova 2012: 82-83). Furthermore, the district is nowadays very accessible, with a daily bus connection to and from Petropavlovsk-Kamchatsky (Figure 1.10). Esso in particular is very popular with local Russian-speaking tourists, who come in the summer months to relax in the thermal pool and to take advantage of the local ethnographic museum (Figure 1.11) and the outdoor activities on offer in the regional nature park.

1 Introduction

Schooling in the Bystraja district was mainly offered by teachers from the European part of the Soviet Union who used Russian with children who initially didn't understand the language at all. In addition, since the small indigenous settlements were only endowed with primary schools, from fourth grade the children had to go to boarding school in Ezzo, where Russian was enforced (Pakendorf 2024). Text 6 "To school" describes the traumatic experience of being far from one's parents and the long trip back home, which is described particularly well in Text 7 "Childhood memoirs". This as well as the increased intermarriage with newcomers accounts for the fact that Russian has taken over in all spheres of life in the Bystraja district (Krivonogov 2024) and explains the omnipresent Russian code-switching and borrowing in the Bystraja Even narratives.

2 Grammar sketch

2.1 Some typological characteristics of Even

Even is a largely agglutinative head-marking language with rich morphology (Malchukov 1995, Pakendorf & Aralova 2020, Burykin & Šarina 2021) and a root-controlled vowel harmony system. The nominal morphology includes 12–14 cases (including the unmarked nominative and some rarely used forms) and a typologically rare system of definiteness-marking via evaluative suffixes (Pakendorf & Krivoschapkina 2014). The verbal morphology comprises a rich system of tense, mood, aspect/Aktionsart, and valency-changing suffixes as well as obligatory subject agreement indexes. A cross-linguistically rare feature that Even shares with its Tungusic sisters is the existence of an Associated Motion suffix that has a quasi-applicative function, being able to add a spatial argument to a non-motion verb (Pakendorf & Stojnova 2021). Standard negation is achieved with the help of the Negative auxiliary *ə/-e-* which takes tense and mood as well as subject agreement suffixes, while the lexical verb, which stands in an invariant form (glossed NEG.CVB ‘Negative converb’ in the texts), takes aspect and Aktionsart marking. Possessive and existential predicates are negated with a noun-like element *at̪t̪ca* (Hölzl 2015, Pakendorf 2026: 303). Predicates of subordinate clauses tend to be non-finite verb forms (participles and converbs; Mal’čukov 1999, 2008, Pakendorf & Aralova 2020), with a distinction between same-subject, different-subject, and variable-subject converbs (see Section 2.4.2.6 for details). In spontaneous speech, arguments that are retrievable from the context (not just subjects, but also objects) tend to be omitted.

In the following sketch I focus mainly on differences between the two dialects that have not been described in previous anglophone descriptions of Even (Malchukov 1995, 2024) and also provide information that might be helpful when reading the texts included in the collection. The sections on phonology (2.2) and phonotactics (2.3) are largely based on Aralova (2015). My analysis is mainly based on the two corpora of annotated oral recordings from which the current text selection was drawn. These number ~52,000 words (Lamunkhin Even) and 34,000 words (Bystraja Even) and comprise texts of different genres, augmented

by some elicitation. If forms differ between the dialects, that found in the Lamunkhin dialect is shown first, separated by a slash from that found in Bystraja Even.

The sketch is illustrated preferentially with examples taken from the texts included in the volume; these are referenced with the text identifier and the line number. If no pertinent examples were found in these texts, examples were taken from the overall corpora of Lamunkhin and Bystraja Even, with a preference for texts that have already been archived. These are referenced with the name under which the recording has been deposited in the DOBES archive and the utterance number. A few examples were taken from texts that have not yet been archived; these are referenced with a three-letter abbreviation of the speaker's name and the title of the text in my working corpus, followed by the utterance number.

2.2 Phonology

Both Lamunkhin Even and Bystraja Even have 17 consonants (Table 2.1). A major distinction is the realization of /s/ (Aralova 2015: 18): in the Lamunkhin dialect this is word-initially and medially, but [s] word-finally: *ha:ram* 'I know', *ahi* 'woman', but *ha:s* 'you(PL) know'. In the Bystraja dialect, it is pronounced variously as [s] or [ç] word-medially and finally, but has been lost word-initially: *a:ram* 'I know', *asi* 'woman', *a:s* 'you(PL) know'. The salient distinction in realization between and [s] is maintained in the transcription.

Table 2.1: Consonant inventory (Pakendorf & Aralova 2020: 290)

	BILABIAL	ALVEOLAR	PALATO-ALVEOLAR	PALATAL	VELAR
PLOSIVE	p b	t d			k g
FRICATIVE	β	s			
AFFRICATE			ʈɕ ʄ		
NASAL	m	n		ɲ	ŋ
TRILL		r			
APPROXIMANT				j	
LATERAL		l			

In contrast to the consonant systems, the vowel inventories of the two dialects differ considerably: Lamunkhin Even has 14 vowels, while Bystraja Even has 11. In both dialects vowel length is distinguished (Pakendorf & Aralova 2020: 290–291; Table 2.2), for example in Lamunkhin Even *ilan* 'three' vs. *ila:n* 'moon, month'.

However, in the Bystraja dialect the length is often not discernible in spoken discourse. In the Lamunkhin dialect there is variation, both within and between speakers, between rounded and unrounded vowels, e.g. *hərrən~hərrən* ‘s/he goes’ or *oron~oran* ‘domestic reindeer’. In the Bystraja dialect, unstressed vowels are considerably reduced.

Table 2.2: Vowel inventory (Pakendorf & Aralova 2020: 291)

	Lamunkhin Even			Bystraja Even		
	FRONT	CENTER	BACK	FRONT	CENTER	BACK
HIGH	i i:		u u:	i i:		u u:
MID	e e:	ə ə:	o o:	e e:		o o:
MID-LOW	ie ia			ia		
LOW		a a:			a a:	

2.3 Phonotactics

Consonants can undergo both progressive and regressive assimilation (see Aralova 2015: 23–27 for details). The syllable structure is (C)V(C). Clusters of at most two consonants are allowed only word-medially, and the consonants belong to different syllables; to avoid longer clusters, epenthetic vowels are inserted (Aralova 2015: 35). In the texts, these are not glossed separately for the sake of brevity, but are joined to the preceding morpheme. In the Bystraja dialect there is a preference for open syllables in word-final position, which manifests itself as the addition of an epenthetic vowel to closed final syllables, e.g. *ʃu:-la-ji* instead of *ʃu:-la-j* ‘house-LOC-PRFL.SG’ (Aralova 2015: 36).

A salient feature of the Lamunkhin dialect is the prohibition of /s/ as the second consonant of hetero-syllabic clusters. Instead, the /s/ is realized as and metathesizes with the preceding consonant, both across morpheme boundaries and in roots. Thus, one finds forms such as *ha:tahri* ‘dark’ < *ha:tar-* ‘be dark’ + *-si* ‘PRS.PTCP’ instead of Standard Even *ha:tar-si*, *amahni* ‘your father’ < *aman* ‘father’ + *-si* ‘PX.2SG’ instead of Standard Even *aman-si*, or *ihme* ‘fat’ instead of *imse*. Such forms are glossed as units, e.g. *amahni* ‘father.PX.2SG’ or *ha:tahri* ‘be.dark.PRS.PTCP’. A further instance of (irregular) metathesis is found in the 2PL and 3PL possessive suffixes; instead of standard *-san* and *-tan*, respectively, these are realized as *-hna(n)* and *-tna(n)* (Aralova 2015: 36–37).

2 Grammar sketch

Both dialects have a system of progressive vowel harmony, in which roots containing an /e/ can only be followed by suffixes with /e/, and roots containing /a/ can only be followed by suffixes containing /a/, e.g. *nəkə-behe-d-ni* [do-AUG.VB-NFUT-3SG] ‘(the big bear) did’ vs. *ila-baha-d-ni* [stand.up-AUG.VB-NFUT-3SG] ‘(the big bear) stood up’. However, they differ with respect to neutral vowels, which can be followed by suffixes containing either /e/ or /a/, the choice of suffixal vowel being lexically determined. In Lamunkhin Even, only the high vowels /i/ and /u/ are neutral, while the mid-central vowel /ə/ and the diphthong /ie/ harmonize with /e/, and the mid-back vowel /o/ and the diphthong /ia/ harmonize with /a/. In Bystraja Even, in contrast, not only are the high vowels /i/ and /u/ neutral, but so are /o/ and /ia/ (Pakendorf & Aralova 2020: 291). Note that for brevity’s sake, in this grammar sketch morphemes that undergo vowel harmony are only provided in the form with the low vowel. This vowel harmony also applies to roots themselves, e.g. *əjə:n-* ‘to move downriver’ vs. *aja:β-* ‘to love’.

Emphasis is expressed with vowel lengthening and rounding in the Lamunkhin dialect, e.g. *to:la* (or even *to:::la*) ‘over there’ < *tala* ‘there’, or *hirgaro:p* ‘we milk and milk (them)’ < *hirgarap* ‘we milk (them)’. For practical reasons this kind of emphasis is not glossed separately in the texts. In the Bystraja dialect, a final lengthened vowel =e: is added to emphasized words, e.g. *aj* ‘good’ > *aje:* ‘very good’ or *urgeβe:tten* ‘it is usually heavy’ > *urgeβe:ttene:* ‘it is usually so heavy!’. The vowel of vowel-final words changes in this process, e.g. *o:ja* ‘many’ > *o:je:* ‘very many’.

2.4 Morphology

It is in particular in morphology that the two dialects differ. A notable distinctive feature of the Lamunkhin dialect are the verbal paradigms that have been borrowed from the Turkic language Sakha (Pakendorf 2015, 2019a), but this dialect also differs from Bystraja Even in its extensive complement of evaluative suffixes (Pakendorf 2017). Although Even in general has exclusively suffixal morphology, in Lamunkhin Even there is an expressive form *-jaka:(n)-* (glossed AUG.DYN ‘Dynamic Augmentative’) that can be synchronously analysed as infixing into the Adverbial Allative: *herge-hki* ‘downwards’ (with the Adverbial Allative *-ski*), *herge-h<jeke:>ki* ‘straight down’.

2.4.1 Nominal morphology

2.4.1.1 Case

The case inventory is large in both dialects, but the Lamunkhin dialect lacks two cases that are found in the Bystraja corpus, albeit rarely: the Limitative and the Allative-Prolative (Table 2.3). There are furthermore notable differences in frequency of use of the Destinative and the Elative case between the two dialects. The Destinative case, which marks a direct object that is intended for a beneficiary (which is indexed on the case-marked noun with possessive suffixes), occurs very infrequently in the Lamunkhin dialect: only 38 tokens are found in the entire corpus comprising ~52,000 words. This contrasts with 167 tokens in the smaller Bystraja Even corpus (~34,000 words). The Elative occurs infrequently in both dialects, but is eight times more frequent in the Bystraja than in the Lamunkhin corpus.

Bystraja Even differs from Lamunkhin Even in a morphonological process that applies to the 3sg possessive-marked Accusative following upon consonants: here, the suffix-initial consonant fully assimilates to the stem-final consonant, and the suffixal vowel rounds to [o]. Thus, *ɲin turki-βa-n* [dog sled-ACC-PX.3SG]

Table 2.3: Case inventory (not showing all the allomorphs for reasons of space; rare cases in brackets)

2 Grammar sketch

‘(we used to take the) dogsled’, but *kolxoz kartopi-ŋ-ŋo-n* [collective.farm potatoes-POSS-ACC-PX.3SG] ‘(we weeded) the potatoes of the collective farm’ or *bu:del-lo-n* [legs-ACC-PX.3SG] ‘(you peck) his legs’. Compare Lamunkhin Even *jeble-ŋ-me-n* [food-POSS-ACC-PX.3SG] ‘(ate up) his food’ or *hiat gol-ba-n* [willow wood-ACC-PX.3SG] ‘(we went to gather) willow branches’ with regular allomorphs after a stem-final nasal or liquid.

A further notable difference between the two dialects is found in the Comitative case. Both dialects have a general Comitative *-pun/-nun* which occurs with common nouns and pronouns; however, in Lamunkhin Even it also occurs with proper nouns (1), whereas in the Bystraja dialect it also occurs with kin terms (see 56 below, Section 2.5.1). In addition, each dialect has a second Comitative morpheme with a restricted distribution. The “restricted” Comitative *-tcal* in Lamunkhin Even occurs with the obligatorily possessed kin terms and *gia* ‘friend’ when these are in a relationship with the subject of the clause. This Comitative subsumes reflexive possessive marking in its meaning, so that this is not marked separately (1). When an action is done with a person denoted by a kin term who is not in a relationship with the subject, it is the general Comitative suffix *-pun* that is used (2). This difference in the form of the Comitative allows the disambiguation in meaning between *omolgo* ‘boy’ and *omolgo* ‘son’, since the first occurs with the general suffix and the second occurs with the kin suffix: *omolgo-pun* ‘with the boy’ vs. *omolgo-tcal* ‘with my/your/his son’. However, in the Lamunkhin corpus there are a few unexpected occurrences of kin terms taking the general Comitative *-pun* and reflexive possessive suffixes instead of the expected *-tcal*. The “restricted” Comitative *-gli* in Bystraja Even, in contrast, occurs predominantly with proper nouns (3) and pronouns, although it is also found occasionally on common nouns. This can be followed by an Accusative case if the conjoined NP functions as a direct object (4). Given that the semantic distinction between the two Lamunkhin Comitatives is quite clear, I gloss them COM(GNRL) and COM(KIN), respectively. For the Bystraja Comitatives, in contrast, I chose the neutral glosses COM1 and COM2, respectively, since there is some functional overlap between the two.

2.4.1.2 Possession

The nominal possessive markers follow after case suffixes and index the person and number of the possessor on the head noun in adnominal possessive constructions. They also function as subject agreement markers for certain TAM categories (see Table 2.5 below for the forms). The reflexive possessive markers are used when the possessor is coreferential with the subject of the clause. In the Lamunkhin dialect the initial bilabial fricative of the plural reflexive form is often elided, leading to a lengthening of the vowel.

The distribution of the suffix *-ŋ*, formerly considered a marker of alienable possession, partly overlaps with that of the cognate suffix in Even’s sister Negidal (Aralova & Pakendorf 2023): it occurs with formally and semantically unpossessable nouns such as demonstratives (5) or *tə:r/tu:r* ‘earth, place, ground’ (6) when these take possessive suffixes for pragmatic reasons. I thus consider it a marker of non-canonical possession and gloss it *poss*. However, its exact functions need further investigation, as there are some unexpected occurrences in the text corpora.

‘My land is very big.’

2.4.1.3 Number

Nouns distinguish singular and plural number. The general plural marker is *-l*; in Bystraja Even nouns with so-called “primary n”,¹ the final consonant and the plural suffix merge to *-r*, e.g. *asatkan* ‘(adolescent) girl’, *asatkar* ‘girls’. Unexpected exceptions are the plural of *oron* ‘domestic reindeer’ (cf. Malchukov 1995: 8) and *muran* ‘horse’, which are *orol* and *mural*, respectively. In Lamunkhin Even, this alternation between *-l* and *-r* does not occur (*asatkan* > *asatkal*), with the exception of the numeral *mian* ‘ten’ in higher decades, e.g. *ʃə:r miar* ‘twenty’ (lit. ‘two tens’). In addition to the general plural marker, Lamunkhin Even has a restricted plural marker *-nil/-ŋil* used with kin terms (and hence glossed PL(KIN)), e.g. *nə:-n* ‘her younger sibling’, *nə:-ŋil-ni* ‘her younger siblings’, as well as a suffix *-hal* that is used with the term for Even, *əbən* > *əbə-həl* ‘Evens’. This suffix also occurs with the same-subject Simultaneous1 and Multiplicative converbs *-nikan* and *-ntakan* and the Propriative suffix *-lkan*, e.g., *mura-lkan* ‘having a horse’, *mura-lka-hal* ‘having horses’. In Bystraja Even only the specific plural marker *-nil/-ŋil* for kin terms is found, e.g. *nu:-βu* ‘my younger sibling’, *nu:-ŋil-bu* ‘my younger siblings’, but *orotc* ‘Even’, *orotce-l* ‘Evens’. Furthermore, both dialects have an Associative Plural marker *-ja* that attaches to proper nouns or kin terms as well as to the interrogative pronoun with human reference *ŋi*: ‘who’; the verb carries plural subject agreement (7).

¹The “primary [word-final] n” in certain nouns and verbs is assumed to derive from an etymologically final *-n*, whereas the “secondary n” found in other nouns and verbs is assumed to have resulted from the loss of a final vowel (Malchukov 1995: 5); cf. Bystraja Even *ŋen-*, Negidal *ŋəna-* ‘go’.

‘My parents (lit. ‘my mother and them’) sent a parcel for us.’

2.4.1.4 Evaluatives

Of particular typological interest are the nominal diminutive and augmentative suffixes, since in addition to expressing the small or big size of the referent they mark its (in)definiteness (Pakendorf & Krivoshapkina 2014; cf. Mal’čukov 2008: 380–383). The system differs between Lamunkhin Even and Bystraja Even: the former has only two diminutive and two augmentative suffixes, which are used either with indefinite or with definite referents. Bystraja Even, in contrast, has three suffixes of each category: an indefinite marker, a definite marker, and one which occurs with possessive-marked nouns (Table 2.4). While the diminutive and augmentative suffixes in Lamunkhin Even have a predominantly descriptive function, designating the big or small size of the referent, they carry evaluative overtones in Bystraja Even that still require more study. The Lamunkhin dialect has a large complement of further evaluative suffixes (Pakendorf 2017); some of these attach to finite verbs to express the large size of the referent or to convey affective nuances, while others derive diminutive or augmentative converbs or adjectives and adverbs.

Table 2.4: Nominal evaluative suffixes

	Lamunkhin Even	Bystraja Even
Definite Diminutive	- <i>tʃan</i>	- <i>jakan</i>
Indefinite Diminutive	- <i>k(a)kan</i>	- <i>kakan</i>

Definite Augmentative	- <i>ŋʃa</i>	- <i>ka:ja</i>
Indefinite Augmentative	- <i>maja</i>	- <i>mkar</i>
Possessed Augmentative		- <i>ŋʃa</i>

2.4.1.5 Pronouns

Free personal pronouns have slightly different forms in the Nominative and oblique cases. In the Lamunkhin dialect, the Nominative form is used as pos-

sessive pronoun; in contrast, in the Bystraja dialect it is the oblique form that is used. Lamunkhin Even has lost the 1PL inclusive/exclusive distinction, so that in contrast to Bystraja Even it has only a single 1PL pronoun and a single 1PL subject index (Table 2.5 below). It should be noted that in both dialects the 3rd person pronouns contain a frozen possessive suffix, e.g. 3SG.DAT *noŋan-du-n*, 3PL.DAT *noŋar-du-tan*; this is not glossed separately in the texts. Both dialects distinguish between a proximal (*erek*) and a distal demonstrative (*tarak*); these are often used with discourse functions that need further elucidation.

In the Lamunkhin dialect, indefinite pronouns are derived from interrogatives with the enclitic =*gul* (8), whereas in the Bystraja dialect non-specific indefinites are derived with the enclitic =*da* and specific indefinites are derived with the enclitic =*wut(ta)* (9). Negative indefinite pronouns in both dialects are derived from interrogative pronouns with the Additive enclitic =*da* and occur in sentences with a negated predicate. For an overview of the free personal and interrogative pronouns see Pakendorf & Aralova (2020: 293 and 294, respectively).

2.4.2 Verbal morphology

Verbal morphology in Even is rich, with suffixes to mark valency change, Aktionsart, aspect, tense, mood, subject agreement and derivations such as compassion and associated motion. Schematically, a finite verb can be divided into

the root (which might consist of a nominal root followed by a verbalizing suffix) and five suffix slots. Note that these slots are merely indications of the ordering relative to the root and other suffixes; morphemes listed below as falling into a particular slot can in fact co-occur in a particular verb. Furthermore, the ordering of some of the suffixes is variable and probably determined by semantics; the extent of this variability and the combinability of different suffixes requires further research.

The morphological contents of the last three suffix slots is fixed: slot 3 comprises the Habitual aspect, the penultimate slot (slot 4) contains tense or mood suffixes, and the final position (slot 5) is restricted to the subject agreement markers. However, in the singular and plural Imperative and the plural Hortative, the mood and subject agreement are expressed by portmanteau morphemes (Table 2.11), so that slots 4 and 5 are merged. The Inchoative and Progressive aspect as well as Compassion and Associated Motion suffixes can be visualized as falling into slot 2, since they can follow upon various Aktionsart or valency change morphemes and always precede the Habitual aspect and/or tense or mood suffixes. However, the Progressive aspect can co-occur with the Inchoative or Associated Motion suffix with partly variable ordering. Slot 1, closest to the root, is where a variety of suffixes occur: valency-changing morphology such as the (Anti-)causativizing suffix or the Reciprocal marker, the Desiderative mood suffix, various Aktionsart suffixes as well as two polysemous aspectual suffixes glossed as TAM1 and TAM2. The Causative suffix *-βkan* is positionally very flexible, occurring both before and after the TAM1 and TAM2 markers, before the Progressive aspect and after the Inchoative aspect in both dialects, but also after the Progressive aspect in the Bystraja dialect.

Note that in Bystraja Even, some Russian nouns that refer to occupations and professional life, such as *oxotnik* ‘hunter’, *pastux* ‘herder’, or *pensija* ‘pension’ can be used as verbs without any verbalizing morphology (10). Furthermore, Russian verbs are often integrated in their Past tense masculine forms (11).

2.4.2.1 Subject agreement

The subject of intransitive and the agent of transitive verbs is indexed with different series of suffixes depending on the tense and mood (Table 2.5). The possessive series is identical to nominal possessive suffixes; in the texts, these forms are glossed simply with the person-number indicator when they function as verbal agreement markers, while in their use as nominal possessive markers the gloss includes *PX* ‘possessive suffix’. The possessive series occurs with the Indicative Past and with converbs and participles used as subordinate predicates; the verbal series occurs with the Indicative Nonfuture and Future. Note that in the Indicative Nonfuture agreement with 3PL is zero-marked (indicated by “0” in Table 2.5), while in the Future it takes the form *-r*: Lamunkhin Even *bə:-re-m* [give-NFUT-1SG] ‘I gave’, *bə:-re* [give-NFUT[3PL]] ‘they gave’ vs. *bə:-ji-r* [give-FUT-3PL] ‘they will give’. In the Bystraja dialect the 1PL.EX form of the verbal series is *-u* in the Nonfuture and *-ru* in the Future tense.

Table 2.5: Subject agreement (and nominal possessive) suffixes

	possessive series		verbal series	
	Lamunkhin	Bystraja	Lamunkhin	Bystraja
1SG	<i>-β</i>	<i>-βu</i>	<i>-m</i>	<i>-m</i>
2SG	<i>-s</i>	<i>-s</i>	<i>-nni</i>	<i>-nni</i>
3SG	<i>-n</i>	<i>-n</i>	<i>-n</i>	<i>-n</i>
1PL.IN	<i>-t</i>	<i>-t</i>	<i>-p</i>	<i>-p</i>
1PL.EX	<i>-t</i>	<i>-βun</i>	<i>-p</i>	<i>-u/-ru</i>
2PL	<i>-hna(n)</i>	<i>-san</i>	<i>-s</i>	<i>-s</i>
3PL	<i>-tna(n)</i>	<i>-tan</i>	0/ <i>-r</i>	0/ <i>-r</i>
PRFL.SG	<i>-j</i>	<i>-ji</i>		
PRFL.PL	<i>-βur</i>	<i>-βur</i>		

The Subjunctive and Apprehensive mood take the possessive series, but differ from the Indicative Past by the lack of an overt marker for 3SG and the addition of the plural suffix *-l* for plural number, which is inserted between the mood marker and the subject agreement suffixes. This is also the subject agreement found for the Past tense of the Negative auxiliary *a-/e-* (see Tables 2.9 and 2.10 below). In the Lamunkhin dialect, the 2PL subject agreement marker of the Subjunctive is characterized by metathesis of the plural suffix and the initial consonant of the possessive suffix, as described in Section 2.3, resulting in the form *-mt̤a-hlan* (and not *-mt̤a-l-san*).

2.4.2.2 Conjugation classes

Four conjugation classes of verbs can be distinguished, differing in the form of the Indicative Nonfuture and Past, different-subject Conditional-Temporal, and Negative converb suffixes. These are exemplified in Tables 2.6 and 2.7 with the Nonfuture forms of the vowel-final verb *ha:-/a:-* ‘know’, the consonant-final verb *hər-/ur-* ‘go’, the most frequently used verb with so-called “primary n” *gə:n-/gu:n-* ‘say’, and the stative verb *bi-* ‘be’. In Conjugation III the Negative converb varies between zero-marking and *-na*. Furthermore, some morphemes assign a particular conjugation class and can hence cause a change in the class of the base: verbs with the Causative suffix *-βkan* fall into Conjugation III, e.g. Lamunkhin Even *it-te-n* ‘he saw’ but *it̤-uke-n-ni* ‘he showed (i.e. made (someone) see)’, and verbs taking the Desiderative mood suffix *-m* fall into the stative Conjugation IV, e.g. *ukle-re-m* ‘I sleep’ but *ukle-m-se-m* ‘I want to sleep’ in Bystraja Even, or *ga-ra-m* ‘I took’ but *ga-hma-m* (< *ga-m-ha-m* with metathesis) ‘I want to take’ in Lamunkhin Even.

Table 2.6: Conjugation classes in Lamunkhin Even (Nonfuture)

	I (<i>ha:-</i> ‘know’)	II (<i>hər-</i> ‘go’)	III (<i>gə:n-</i> ‘say’)	IV (<i>bi-</i> ‘be’)
1SG	<i>ha:-ra-m</i>	<i>hər-re-m</i>	<i>gə:-ne-m</i>	<i>bi-he-m</i>
2SG	<i>ha:-nni</i>	<i>hər-e-nni</i>	<i>gə:-ne-nni</i>	<i>bi-he-nni</i>
3SG	<i>ha:-d-ni</i>	<i>hər-re-n</i>	<i>gə:-n-ni</i>	<i>bi-h-ni</i>
1PL	<i>ha:-ra-p</i>	<i>hər-re-p</i>	<i>gə:-ne-p</i>	<i>bi-he-p</i>
2PL	<i>ha:-s</i>	<i>hər-e-s</i>	<i>gə:-s/go:-ne-s</i>	<i>bi-he-s</i>
3PL	<i>ha:-ra</i>	<i>hər-re</i>	<i>gə:-ne</i>	<i>bi-he</i>

Table 2.7: Conjugation classes in Bystraja Even (Nonfuture)

	I (<i>a:-</i> ‘know’)	II (<i>ur-</i> ‘go’)	III (<i>gu:n-</i> ‘say’)	IV (<i>bi-</i> ‘be’)

2SG	<i>a:-nni</i>	<i>ur-e-nni</i>	<i>gu:-ne-nni</i>	<i>bi-se-nni</i>
3SG	<i>a:-n</i>	<i>ur-re-n</i>	<i>gu:-n-ni</i>	<i>bi-s-ni/bi-n-ni</i>
1PL.IN	<i>a:-ra-p</i>	<i>ur-re-p</i>	<i>gu:-ne-p</i>	<i>bi-se-p</i>
1PL.EX	<i>a:-r-u</i>	<i>ur-r-u</i>	<i>gu:-n-u</i>	<i>bi-s-u</i>
2PL	<i>a:-s</i>	<i>ur-e-s</i>	<i>gu:-s/gu:-ne-s</i>	<i>bi-se-s</i>
3PL	<i>a:-r</i>	<i>ur-re</i>	<i>gu:-n</i>	<i>bi-se</i>

The Lamunkhin dialect differs from the Bystraja dialect (and from Standard Even) in the conjugation of a few mono-syllabic vowel-final verbs like *o:-* ‘become’, *ne:-* ‘put’, and *ga-* ‘take’: in Lamunkhin Even these conjugate like other vowel-final verbs (e.g. *o:-ra-m* ‘I become’, *ne:-re-p* ‘we put’), while in Bystraja Even they take suffixes in *-d* (e.g. *o:-da-m* ‘I become’, *ne:-de-p* ‘we put’). In the Bystraja dialect, the verbs *o:-* ‘become’ and *o:-* ‘make’ are thus distinguished by conjugation class, while in Lamunkhin Even they are homophonous, with ‘become’ conjugating like ‘make’ (Table 2.8).

Table 2.8: Nonfuture forms of ‘become’ and ‘make’

	Lamunkhin Even	Bystraja Even	
	‘become’/‘make’	‘become’	‘make’
1SG	<i>o:-ra-m</i>	<i>o:-da-m</i>	<i>o:-ra-m</i>
2SG	<i>o:-nni</i>	<i>o:-da-nni</i>	<i>o:-nni</i>
3SG	<i>o:-d-ni</i>	<i>o:-d-ni</i>	<i>o:-n</i>
1PL.IN	<i>o:-ra-p</i>	<i>o:-da-p</i>	<i>o:-ra-p</i>
1PL.EX	<i>o:-ra-p</i>	<i>o:-d-u</i>	<i>o:-r-u</i>
2PL	<i>o:-s</i>	<i>o:-də-s</i>	<i>o:-s</i>
3PL	<i>o:-ra</i>	<i>o:-d(a)</i>	<i>o:-r</i>

The Negative auxiliary *ə-/e-* differs in its conjugation from other verbs (Tables 2.9 and 2.10). In the Nonfuture tense it belongs to the stative Conjugation IV but takes possessive subject marking instead of zero for the 3PL; furthermore, the Past and Future markers differ. The Lamunkhin and the Bystraja dialect differ

in the form of the Past tense suffix, with the Lamunkhin form probably having been influenced by the Past participle *-tə*, which has taken on a meaning of evidential narrative tense in this dialect (see below). They differ further in the Past 3PL and Future 2PL agreement, with the Lamunkhin dialect taking suffixes from the possessive series in both cases.

Table 2.9: Comparison of the Negative auxiliary *ə-* and the copula/auxiliary *bi-* ‘be’, Lamunkhin Even

2.4.2.3 Mood and tense

In the Indicative, three tenses are morphologically marked, namely Nonfuture *-ra* (with present tense readings for atelic verbs and a past tense reading for telic verbs), Past *-ri* (which grammaticalized out of the Present participle), and Future *-ji*. Present tense is expressed by the combination of the Nonfuture with the Progressive aspect *-d*. In the Lamunkhin dialect, *-ri* expresses a direct witnessed past, while a narrative tense with indirect evidential meanings (glossed NAR.PST ‘Narrative past’ in the texts) has grammaticalized out of the Past participle *-tə* (Malchukov 2000, Zippel 2012, Greed 2019). In the Lamunkhin dialect analytical constructions of the Past participle of the lexical verb with the auxiliary *bi-* in

²There seems to be variation in the form of the 2PL subject agreement marker: during elicitation, our consultant started off with the form *ə-tə-hlən* (which would be the metathesized form of the Plural marker *-l* and the Possessive index *-hən*), but immediately corrected herself to *ə-tə-hnən*. In elicitation of the 2PL Subjunctive form of *hər-* ‘go’ (a mood which takes the same set of subject agreement markers as the Negative auxiliary Past tense, as mentioned above) she first provided the form *həre-mtəe-hlen*, which she corrected to *həre-mtəe-hnen*. Unfortunately, there are very few 2PL forms in the corpus, so this cannot be verified further.

2 Grammar sketch

Table 2.10: Comparison of the Negative auxiliary *e-* and the copula *bi-* ‘be’, Bystraja Even

3PL	<i>e-s-ten</i>	<i>bi-se</i>	<i>e-tci-l</i>	<i>bi-si-ten</i>	<i>e-te-r</i>	<i>bi-fi-r</i>

Nonfuture or Past tense are used to express past perfect and pluperfect readings. These are practically lacking in Bystraja Even.

In Lamunkhin Even, a complex construction is used to convey that a decision was taken: this consists of the verb in the Hortative mood plus the phrase *gərbə o:dni*, literally ‘name became’ (12). Furthermore, in narratives the different-subject Conditional-Temporal converb *-rak* (see Section 2.4.2.6) of the verb *it-* ‘see’ is frequently used to convey a mirative reading (13).

In the Imperative mood two tenses are distinguished for 2nd person, the Immediate Imperative and the Remote Imperative, both marked with dedicated forms (Table 2.11). In contrast, both dialects make use of the Purposive converb *-da* to express the Hortative Singular and the Jussive. The glosses in the texts reflect the function of the suffix, distinguishing between *vs.PURP* for the converb, *HORT* for the Hortative Singular, and *juss* for the Jussive. First person subject agreement for the Hortative Singular and the Purposive is marked with a dedicated suffix *-ku(n)*, while subject agreement for the Jussive is expressed by the 3rd person possessive suffixes.

Table 2.11: Imperative forms

	IMMEDIATE		REMOTE	
	Lamunkhin	Bystraja	Lamunkhin	Bystraja
HORT.SG	<i>-da-ku(n)</i>	<i>-da-ku</i>		
IMP.SG	<i>-li</i>	<i>-li</i>	<i>-ŋa-nni</i>	<i>-ŋa-nni</i>
JUSS.SG	<i>-da-n</i>	<i>-da-n</i>		
HORT.PL	<i>-gal</i>	<i>-gar</i>		
IMP.PL	<i>-lda</i>	<i>-lilla</i>	<i>-ŋa-hnan</i>	<i>-ŋa-san</i>
JUSS.PL	<i>-da-dnan</i>	<i>-da-tan</i>		

In the Negative Imperative mood it is the Negative auxiliary *ə/-e-* that takes the mood marker. The Hortative and Jussive are negated in the standard manner in both dialects: the Negative auxiliary takes the mood plus subject agreement suffixes and the lexical verb carries the Negative converb marker. The Prohibitive stands out with distinct forms that differ in the two dialects (Table 2.12).

Table 2.12: Prohibitive forms (where X stands for the lexical verb root)

	IMMEDIATE		REMOTE	
	Lamunkhin	Bystraja	Lamunkhin	Bystraja
IMP.SG	<i>ə-ʃi: X-r</i>	<i>e-ʃi X-kil</i>	<i>ə-ŋə-nni X-r</i>	<i>e-niken X-r</i>
IMP.PL	<i>ə-ʃilde X-r</i>	<i>e-ʃille X-killā</i>	<i>ə-ŋə-hnən X-r</i>	<i>e-nikes X-r</i>

The mood marker of the Lamunkhin Immediate Prohibitive differs from the Immediate Imperative suffix (*-ʃi/-ʃilde* vs. *-li/-lda*; 14), while the lexical verb carries

the Negative converb suffix; the Remote Prohibitive is a straightforward negation of the Remote Imperative. In the Bystraja dialect, in contrast, not only does the mood marker of the Immediate Prohibitive differ from its affirmative counterpart, like in Lamunkhin Even, but the lexical verb carries a dedicated prohibitive marker (*-kil/-killa*, glossed PROH.SG/PROH.PL; 15).³ In the Remote Prohibitive, the mood marker is different yet again (*-niken/-nikes*), but the lexical verb does not take the prohibitive marker found in the Immediate Prohibitive, but stands in the usual Negative converb form (16).

The Apprehensive ‘... label[s] a potential event as undesirable, and worthy of being avoided indirectly – by carrying out another action’ (François 2026). This mood, which is marked by the suffix *-jik*, is restricted to the Bystraja dialect (17, 18), where it has a full person-number paradigm (Table 2.13). The subject indexes are the same as those found for the Indicative Past of the Negative auxiliary (Tables 2.9 and 2.10 above) and the Subjunctive mood, although the 1SG and 1PL.EX

³Note that a few examples of this occur in the Lamunkhin Even corpus as well, notably in Text 10 ‘‘Bear’’.

forms are characterized by the insertion of an additional element *-ri* between the mood and the subject agreement marker. In Lamunkhin Even, the suffix *-jik* occurs only in admonitions addressed to the hearer(s) in order to avoid potential negative consequences, e.g. *hər-fike-s* ‘don’t go! (or something bad will happen)’. In this dialect, an apprehensional meaning is simply expressed with verbs in the Future tense.

Epistemic modality is expressed in different ways in the two dialects (Pakendorf & Aralova 2020: 296–297). In the Lamunkhin dialect, weak to strong epistemic meanings are expressed by the innovative Presumptive suffix *-tɕa:ji* (19), which grammaticalized out of auxiliary verb constructions with the Past participle *-tɕa* and the Future-marked auxiliary *bi-ji-*. Further means to express epistemic possibility in Lamunkhin Even are the Hypothetical mood copied from the Turkic language Sakha (Yakut; Pakendorf 2015, 2019a) or the Hypothetical participle *-jiŋa*. In the Bystraja dialect, epistemic modality is expressed by the particle

kotə or by a conventionalized implicature consisting of a formally negative verb and the focus clitic =(k)ka on the constituent that precedes the verb (20).

Negative ability is expressed with the auxiliary *turku-* ‘be unable’; this requires a special negative converb marker *-ŋa* (glossed NMDL.CVB ‘Negative Modal converb’) on the lexical verb (21). In the Lamunkhin dialect, negative ability is further expressed with the Deontic mood marker *-mna* attached to the Negative auxiliary *ə-* (see 23 below), or with a dedicated suffix *-ŋahat*, e.g. *it-ŋehet-te-m* [see-INAB-NFUT-1SG] ‘I cannot see’. In the Bystraja dialect, negative ability is expressed with different auxiliaries: in addition to *turku-* ‘be unable’ there are *nu:n-* ‘not know (how to do)’ (22) and *ba:-* ‘not want’.

In Lamunkhin Even, the most common means of expressing necessity is with the Necessitive paradigm copied from Sakha (Pakendorf 2009, 2015; see Text 12 “Stuck in the herd” for some examples). In addition, a Deontic mood, which is expressed by the suffix *-mna* and that conjugates like the Subjunctive and Apprehensive, is used to express a strong obligation. In its negated form, however, it expresses negative ability (23). Furthermore, obligations incurred by promises are expressed by auxiliary verb constructions involving the Deontic participle *-ŋka*. Bystraja Even lacks morphological means to express deontic modality; instead, this is expressed with the Russian particle *nado*, or a deontic reading is inferred from the context.

In both dialects, the Desiderative mood is expressed with the suffix *-m*. This takes the stative verb conjugation (see Section 2.4.2.2), resulting in metathesis of the mood marker and the initial consonant of the Nonfuture tense in Lamunkhin Even (24). In addition, Lamunkhin Even has borrowed the Assertive mood from Sakha (Pakendorf 2009, 2015; see Text 10 “Bear” for several examples).

‘... we want to live well ...’

2.4.2.4 Aspect and Aktionsart

Aspect and Aktionsart are marked morphologically (Pakendorf & Aralova 2020: 296). Overall, the dialects do not differ very much in their complement of forms (Table 2.14), with the Habitual constituting a notable exception (see below). Note that the suffixes have multiple allomorphs that are not all shown in the table.

In the Lamunkhin dialect, Habitual aspect is expressed by the suffix *-gara* (with allomorphs *-βra* and *-ŋna*; 25). In narratives this form can also be used to convey

Table 2.14: Aspect/Aktionsart suffixes

	Lamunkhin Even	Bystraja Even
Habitual	<i>-gara</i>	<i>-βa:t</i>
Iterative	<i>-βa:t</i>	
Inchoative	<i>-l</i>	<i>-l</i>
Progressive	<i>-d</i>	<i>-d/-jid</i> (after <i>-n</i>)
TAM1	<i>-han/-h</i>	<i>-san/-s</i>
TAM2	<i>-t</i>	<i>-t</i>
Continuative	<i>-sso</i>	
Durative	<i>-kt̪ɕi</i>	<i>-kt̪ɕi</i>
Accelerative	<i>-malt̪ɕi</i>	<i>-malt̪ɕi</i>
Multiplicative	<i>-kat̪ɕ</i>	<i>-kat̪ɕ</i>

an immediacy of the narrated situation, rather than a habitually occurring action (26). Note that there is variation in the 1st person Nonfuture in whether the tense suffix is included in the form or not (*hir-gara-ra-m~hir-gara-m* ‘I usually milk’), with a tendency towards inclusion when the aspectual allomorph is bisyllabic. The 3PL Nonfuture subject agreement is *-r*, as found for the Future tense, and not zero, as would be expected for the Nonfuture. The suffix *-gara* is also found in Bystraja Even, albeit rarely. It here occurs mostly with Imperatives and is hence glossed HAB.IMP.

come-HAB-3SG

‘When my father goes here, the big bear (lit. ‘the big grandfather’) comes here.’

When it follows upon consonant-final verb stems the suffix of the Bystraja Even Habitual aspect *-βa:t* undergoes the same kind of morphonological changes as those of the 3SG possessive-marked Accusative described above: the suffix-initial consonant assimilates to the stem-final consonant, and the vowel rounds to [o], e.g. *em-mo:t-te-n* ‘she used to come’, but *em-u-βe:t-te-n* ‘he used to bring’ (with the (Anti-)causativizing suffix *-β/-u*); *ηinda-βa:t-ta-n* ‘he would go (to Esso) by dog sled’, but *ηinda-d-jo:t-ta-n* ‘he was (always) travelling by dog sled’ (with the Progressive aspect *-d*, after which the initial consonant of the Habitual becomes [ɟ]). With verbs of motion it can occur twice (27); in this case, the first Habitual morpheme expresses the multiplicity of the motion event (movement to and fro, round about, every day), and the second expresses habitualness. In this meaning the suffix has lexicalized in the verb *ollo:t*- ‘go(MULTIDIR)’. Although the root of this does not occur on its own, probable cognate forms are Negidal *hul*- and Solon *uli*-, both with a meaning of multidirectional motion.

(27) Bystraja Even (Text 2, line 40)

... *inenjon atɕ jɛptɕeleɕ girkaβa:tɕo:ttu*, ...

 day-ACC-PX.3SG PRV eat-PST.PTCP-PRV-INS walk-HAB-HAB-NFUT-1PL.EX
 ‘... (we would) wander about all day without having eaten ...’

It is with this iterative meaning that the suffix *-βa:t* is found in the Lamunkhin dialect, where it generally has a short vowel (glossed ITER; 28). In this dialect it occurs frequently with the root *bi-* ‘be’ in a lexicalized form meaning ‘wander around, roam’ (see 45 below); it is nevertheless parsed and glossed in the texts. Note that in 28 the Iterative suffix surfaces as *-bək*, since the vowel of the suffix harmonizes with the mid-central vowels of the root, [β] and [b] often alternate, and the suffix-final dental plosive assimilates to the velar consonant of the following Habitual suffix.

(28) Lamunkhin Even (Text 2, line 31)

2.4.2.5 Valency-changing and other derivational suffixes

Valency change is effected with different morphemes. These all consist of or contain a labial consonant (following upon vowel-final stems) or the vowel /u/ (following upon consonant-final stems; Aralova & Pakendorf 2022: 29–34). Note that the (Anti-)causativizing suffix *-β*, glossed VAL ‘valency-change’ in the texts, changes intransitive verbs into transitive ones (*ɲə:-* ‘exit, go out’, *ɲə:-β-* ‘bring out’) and transitive verbs into intransitive ones (*it-* ‘see’, *itc-u-* ‘be seen’). Verbs of destruction have different consonantal endings that express both the valency (intransitive vs. transitive) and Aktionsart (iterative vs. semelfactive) of the root (Aralova & Pakendorf 2022: 28–29). The Reciprocal (expressed with the suffix *-mat/-matc*) is used for mutual actions performed by several agents. Overly mentioned participants in reciprocal actions tend to be added as comitative adjuncts (37).

‘And then in the evening my grandmother was talking with late Konna and late Istap.’

Further morphologically derived verbal categories are the Conative (Lamunkhin Even) and Attenuative (Bystraja Even) as well as Associated Motion. The Conative *-stci* (mostly pronounced *-ssi*) in Lamunkhin Even expresses a failed

attempt at an action best translated with ‘try to do’ (38), but it can also have a mirative meaning, expressing that an unexpected event follows (39). The cognate suffix in Bystraja Even, in contrast, does not have a conative meaning, but an attenuative meaning (40).

 ʃebe-ʃcɪ-d-de-n
 eat-ATTN-PROG-NFUT-3SG
 ‘She’s chopping reindeer *ʃa:laktɕa* (finely chopped fresh raw offal) and eating a bit.’

Associated Motion is marked with the deictically neutral suffix *-na*. The category is more developed in Bystraja Even than in Lamunkhin Even: firstly, the marker is used twice as frequently and predominantly in independent constructions in the Bystraja dialect, while half of the uses in the Lamunkhin dialect involve constructions with a pleonastic overt motion verb (Pakendorf & Stoyanova 2021). Secondly, the bimorphemic suffix *-nasi* with a meaning of ‘go and do and return’ is only found in Bystraja Even and not in Lamunkhin Even, and thirdly, in the Bystraja dialect the marker has expanded to metaphorical uses in partly calqued constructions from Russian that involve the verb ‘go’ in the original. For instance, in (41), the Russian loan *otpusk* ‘leave, holiday’ occurs with the Associated Motion marker to translate the Russian construction *idti v otpusk* ‘go on

leave/holiday’. Whereas (41) includes an actual verb of motion (*ur-* ‘go’), in (42) it is solely the Associated Motion marker that translates the metaphorical motion of the Russian construction *idti na pensiju* ‘go on pension’.

2.4.2.6 Non-finite verb forms

Like other Tungusic languages, Even distinguishes between same-subject (ss), different-subject (ds), and variable-subject (vs) converbs. Same-subject converbs are invariant in form (with the exception of plural-marking) and used when the subordinate and matrix clause subject are coreferential, while different-subject converbs are used for non-coreferentiality of the matrix and subordinate clause subjects, indexing the subordinate clause subject with possessive suffixes. Some converbs (those labeled ‘variable-subject’) can occur both with coreferential and with non-coreferential subjects; in this case, coreferentiality is indexed with reflexive possessive suffixes. In the texts, converbs are glossed with an indication of their referentiality (ss, ds, or vs for same-subject, different-subject, or variable-subject, respectively) and their semantics.

Not all of the “non-periphrastic” converbs⁴ listed for Even by Malchukov (1995: 17–18) are common in the two dialectal corpora (Table 2.15). The most frequently used ones are the ss Conditional-Temporal *-mi*, Simultaneous1 *-nikan*, and Anterior *-riβi*, the ds Conditional-Temporal *-rak*, and the vs Purposive *-da*. In addition, the vs Temporal converb *-hiβi* (a metathesized form of Standard Even *-ηsi*, called “past converb” by Malchukov) occurs only with the copula *bi-* and only in the Lamunkhin dialect, which has furthermore innovated the ss Multiplicative converb *-ntakan*.

⁴I exclude the Negative and Negative Modal converbs here since they have very different functions from the rest of the converbs, occurring only in negative constructions and not as predicates of subordinate clauses.

Table 2.15: Converbs (arranged by syntactic referentiality)

Label	Lamunkhin	Bystraja	Function
SS.COND	<i>-mi</i>	<i>-mi</i>	predicate of conditional and temporal adverbial clauses, simultaneous actions
SS.MULT	<i>-ntakan/-ntakahal</i>		multiple actions performed simultaneously, or actions affecting multiple objects
SS.SIM1	<i>-nikan/-nikahal</i>	<i>-nikan/-nikar</i>	action performed at the same time as main clause action
(SS.SIM2)	<i>(-mnin)</i>	<i>(-mnin)</i>	action simultaneous with main clause action (rare)
SS.ANT	<i>-riji/-riʃur</i>	<i>-riji/-riʃur</i>	action performed before the main clause action
DS.COND	<i>-rak</i>	<i>-rak</i>	predicate of conditional or temporal adverbial clauses
VS.PURP	<i>-da</i>	<i>-da</i>	predicate of purpose clauses
VS.NEG.TRM	<i>-dle</i>	<i>-dle</i>	occurs only with the Negative auxiliary, expresses ‘until not’, i.e. ‘before’
VS.TRM	<i>-kan</i>	<i>-kan</i>	expresses an endpoint in time (‘until’); formally invariant, but functionally variable-subject
(VS.TRM.EMPH)	<i>(-kla:ka)</i>		expresses an endpoint in time (‘until’) with emphasis (rare)

Continued on next page

Table 2.15 – continued from previous page

Label	Lamunkhin	Bystraja	Function
VS.TEMP	<i>-hiŋi</i>		only occurs with the copula <i>bi-</i> , expresses a temporal meaning

The three Terminative converbs *-dle*, *-kan*, and *-kla:ka* are not very frequently used. Of these, *-dle* occurs only with the Negative auxiliary and expresses a meaning of ‘until not’, i.e. ‘before’ (43), while *-kan* expresses a meaning of ‘until’. Although this is formally invariant (and should thus be restricted to situations of coreferentiality), it occurs both in situations of coreferentiality (44) and non-coreferentiality (45) of the subordinate and main-clause subject.

The rarely used vs form *-kla:ka* expresses a terminative meaning with an added nuance of emphasis; this is found only in the Lamunkhin Even corpus, but not in any of the texts included in this volume. Likewise, the ss Simultaneous2 converb *-mnin* (called “preceding converb” by Malchukov 1995: 17) occurs so infrequently in the corpora that it is not found in the text selection included in this collection. For purposes of consistency, the form *-nikan* is nevertheless glossed ss.SIM1 ‘same-subject Simultaneous1 converb’. This, the ss Anterior converb, and the Lamunkhin Even Multiplicative converb agree with their subject in number (35 above), as shown in Table 2.15; the DS and vs converbs agree in number and person, using possessive suffixes to index the agreement, as mentioned above (43).

There are fewer participles than converbs, and many are only infrequently used, making it difficult to elucidate their functions. The most commonly used are the Present participle *-ri* and the Past participle *-təa*, which have a range of functions (Section 2.5.2). The Locative-marked Past participle *-təa-la* occurs as the predicate of temporal adverbial clauses; this form is analysed as a vs converb in descriptions of Evenki (Nedjalkov 1997: 271, Bulatova & Grenoble 1999: 44). In the Bystraja dialect, the Present participle *-ri* is occasionally used as the complement of phasal verbs (46), while in the Lamunkhin dialect it frequently occurs in auxiliary verb constructions with the auxiliary *bi-* to express an imperfective reading (47). The Past participle *-təa* is also frequently used in auxiliary verb constructions in the Lamunkhin dialect to express a pluperfect reading; with the auxiliary in the Subjunctive mood it occurs in past counterfactual conditional clauses (48)

Another frequently used participle in Lamunkhin Even is the Remote Past participle *-dan̚*, which occurs in particular as the predicate of subject complement and relative clauses (Section 2.5.2). This always carries possessive suffixes to index the subject. The Hypothetical participle *-ŋiŋa* that occurs in epistemic constructions in Lamunkhin Even, as mentioned above, has a future reading in Bystraja Even; however, no examples occur in the selection of texts published here.

Finally, both dialects have participles that occur in auxiliary verb constructions to express pretense: in Lamunkhin Even the participle *-hman* occurs in constructions with the dynamic auxiliary *o:-* ‘become’, and in Bystraja Even the participle is *-ssan*, which occurs together with the auxiliary *bi-* ‘be’ (see Pakendorf 2019b: 105–107 for examples). From the shape of the Lamunkhin Even participle it appears that this construction is etymologically based on Desiderative forms of the verb, with the suffix *-m* having metathesized with the initial consonant of the Pretense participle, which would be *-san* underlyingly (and hence clearly cognate with the Bystraja Even form).

2.5 Syntax

Lamunkhin and Bystraja Even differ with respect to the agreement of modifiers with their head noun (Pakendorf & Aralova 2020: 302): while Lamunkhin Even lacks agreement, e.g. *ha:βdi b̚aj̚ə-l-bu* [old person-PL-ACC] ‘old people’, Bystraja Even adjectives agree with their head in both number and case, e.g. *eg̚je:n-du kastrul̚ja-du* [big-DAT.ESS pot.R-DAT.ESS] ‘in a big pot’, *an̚ŋamta-l ŋina-l* [new-PL dog-PL] ‘new dogs’. However, relative clauses in Bystraja Even differ from this generalization, since they appear to agree only in case, but not in number (Section 2.5.2).

Basic word order varies from mainly verb-final in the Lamunkhin dialect to largely verb-medial in the Bystraja dialect and remains unchanged in content questions. Yes-no questions are generally unmarked in both dialects (49, 50); their

intonation pattern still needs to be investigated. Note that the quotative particle *gə:niken* in (49) is not lexically translated; its function is indicated by the double quote marks. In Lamunkhin Even, a few instances of the clitic *=gu* function as a marker of yes-no questions (51); however, mostly this marks alternative questions that express doubt (52) and disjunctive coordination of NPs (Section 2.6).

2.5.1 Case functions

The Accusative and Destinitive both mark direct objects, with the difference that the Destinitive additionally marks the beneficiary of the object by indexing it on the case-marked noun with possessive suffixes (53). Note that in the

Bystraja dialect the first-person possessive suffixes are those that occur in the Purposive (*-ku/-kun*), rather than the usual *-β/-βun* (7 in Section 2.4.1.3). In the Lamunkhin dialect, in contrast, a 1SG beneficiary on the Destinate is indexed with the standard possessive suffix *-β*. In addition, direct objects can be marked by the Reflexive-Possessive suffix without further case-marking, if the possessor of the object is coreferential with the subject of the clause.

‘... and at the haymaking we did whatchamacallit (made hay) for the cows.’

The Instrumental marks instruments and means of transport as well as the secondary predicate of *gərbə-/gərbu-* ‘to call by name’ in both dialects (see for example Text 9, line 8). The Instrumental gave rise to the most common adverbializer, which derives adverbs from qualitative adjectives, e.g. Lamunkhin Even *ibga* ‘good’, *ibga-t* ‘well’. However, to account for the substantial syntactic differences between the two forms, this is glossed ADVR ‘adverbializer’ in the texts and not INS.⁵ The dialects differ in how they mark objects of the emotion verb ‘fear’: Bystraja Even uses the Instrumental case for this (54), but Lamunkhin Even uses the Ablative (55). The Comitative can either mark an adjunct or a co-subject; in the first instance the Comitative NP is not included in the singular subject agreement (56), whereas in the latter instance subject agreement is plural to agree with both co-subjects (1 above).

The Dative-Essive, Locative, and Allative have partially overlapping functions: both the Dative-Essive and the Locative can mark static locations, and both the Locative and the Allative can mark goals of motion. The Dative-Essive also marks recipients, experiencer subjects and the agents of passive constructions; in Lamunkhin Even this case is also occasionally used to mark goals. While in both dialects addressees of verbs of speech are marked by the Allative case, in the Lamunkhin dialect the addressee of *uktæn*- ‘tell’ is marked with the Dative-Essive. A very distinctive and quite frequent use of the Allative case in the Lamunkhin dialect is to mark static locations that are found in a general direction rather than a specific point (57).

The Prolative marks a movement along or through as well as a distributed action (58) or location (59). The Ablative marks the source or point of departure.

2 Grammar sketch

It also marks the material from which something is made as well as the object of comparison. The infrequently used Elative has a spatial function that is similar to that of the Ablative; the two cases differ slightly in that the Ablative can include a nuance of boundary crossing which is missing from the Elative, which simply expresses the general location of a source.

The two dialects also differ in their use of the Similitive *-gatcin*: in Lamunkhin Even, this marks mainly similarity of manner, while the derivational suffix *-mdas* marks equality of properties and similarity of actions and states. The glosses reflect this difference, with *-gatcin* being glossed as SML(MNR) and *-mdas* being glossed as SML(PRP). In Bystraja Even, in contrast, *-gatcin* (glossed simply as SML) marks similarity of manner, actions, and states, and the relational noun *uretə(in)* ‘similar’ marks equality of properties (see Pakendorf (2019b) for details on the use of these forms as well on the Equative and Pretense marking).

2.5.2 Subordinate clauses

The predicates of subordinate clauses are mostly expressed by non-finite verb forms, with converbs functioning predominantly as predicates of adverbial clauses and participles being used as predicates of complement and relative clauses. The predicates of the protasis of conditional clauses are expressed by the ss and ds Conditional-Temporal converbs *-mi* and *-rak*, respectively, which also occur in temporal adverbial clauses. In addition, the predicate of temporal adverbial

clauses can be expressed by the Locative-marked Past participle *-tca-la*. However, this participial construction is infrequent in Bystraja Even, while in Lamunkhin Even it is used interchangeably with the DS Conditional-Temporal converb *-rak*. The predicates of purpose clauses are expressed with the dedicated vs Purposive converb *-da*. In Lamunkhin Even, this can co-occur with a “non-canonical” ss converb of the generic verb of speech *gə:n-* (Matić & Pakendorf 2013: 376–377), with a tendency for this additional marking to occur in non-coreferential constructions (Pakendorf 2013).

Complement clauses take participial predicates that carry possessive suffixes to index their subject (60, 61). The participial predicate of object complement clauses is marked with the Accusative (61).

In general, relative clauses in Tungusic languages are prenominal participial clauses, with some variation in the extent to which the participle agrees with the head noun in subject relative clauses; the subject of non-subject relative clauses is usually indexed on the participle (Pakendorf 2012). However, both the Bystraja and the Lamunkhin dialect diverge from this general picture, although this needs to be studied in more detail. In Bystraja Even subject relative clauses, the participle agrees with the head noun only in case, not in number (62), thus contrasting with the behaviour of adjectival modifiers. As to non-subject relative clauses, there is variation between the subject being indexed only on the participle (62) or on both the participle and the head noun (63). Furthermore, the participle often follows the head noun (64).

Lamunkhin Even subject relative clauses differ from the general Tungusic pattern in that there is no agreement in case or number between the participle and the head noun (65). This is in good accordance with the lack of agreement on adjectival modifiers mentioned above. There is furthermore variation in the subject indexation in non-subject relative clauses: the subject can be indexed on either the participle (66) or the head-noun (67), or both (68). Note that it is only the Remote Past participle *-dan* that takes such subject agreement, in accordance with the fact that it does not occur without possessive suffixes (Section 2.4.2.6).

2.6 Discourse markers

The dialects differ to a large extent in their complement of enclitic particles, the functions of most of which still remain to be elucidated. The Additive =*da* is found in both dialects; in addition to deriving negative and (in Bystraja Even) non-specific indefinite pronouns from interrogatives (Section 2.4.1.5) this also occurs in concessive clauses and in coordination.

The clitics =*kka* and =*kana* seem to be involved in focus-marking. In the Lamunkhin corpus, =*kana* predominates, while in the Bystraja corpus =*kka* occurs more frequently. In addition, Bystraja Even has a large array of clitics not

found in the Lamunkhin dialect, which are often stacked (69). These include =si and =gal, which appear to mark contrast, and =baʃi and =tit(ta) (70) which seem to add an emphatic meaning.

Furthermore, in Bystraja Even a particle with a nominal past meaning has grammaticalized out of the Past participle of the verb *bi-* ‘be’, namely *bitɕe*. This mostly refers to deceased individuals (71), but can also refer to settlements or musical ensembles that do not exist anymore (72).

In Bystraja Even, the Dubitative clitic =*gu* mostly expresses uncertainty (69 above), while in Lamunkhin Even it frequently occurs in phrasal disjunction (73). This is especially frequent in constructions in which the interrogatives *iak* ‘what’ and *ia-* ‘do what’ function as general extenders (74); in addition, it occurs in alternative questions that express uncertainty (Section 2.5).

The Restrictive clitic is =*pun* in the Lamunkhin dialect (75); this takes scope over nouns, pronouns, adjectives, numerals, participles, and converbs. In the Bystraja dialect, in contrast, the predominant Restrictive clitic is =*takan* (76); this takes scope over finite verbs as well as over converbs, nouns, or adverbs.

Lamunkhin Even makes notable use of ss converbs of the generic verb of speech *gə:n-* in non-canonical functions, such as quote marker, complementizer (77) or marker of purpose clauses (see Section 2.5.2), probably in result of Sakha influence (Matić & Pakendorf 2013). These are glossed as *say.PTL* and *say.QUOT* in the texts. In addition, the Imperative singular form of the generic verb of speech, *gə:li*, has developed into a marker of tag questions (78). Another tag is derived from the Nonfuture 3SG form of the Negative auxiliary, *əhni*. In contrast to the tag used in the geographically close dialect Tompo Even (Matić 2015), where the Negative auxiliary copies the TAM and subject agreement marking of the lexical verb, this is invariant in Lamunkhin Even (79) and is often reduced to the clitic *=hni* (see, for example, Text 8, line 21). In their functions as tags both *gə:li* and *əhni* are glossed TAG in the texts.

2.7 Lexicon

Given the immense distances that separate Lamunkhin Evens and Bystraja Evens it is not surprising that there are many lexical differences between the two dialects, not least their self-designation: this is *əβən~əbən* in Lamunkhin Even and *orotə* in Bystraja Even. Some further examples picked at random are (with L designating the Lamunkhin Even form and B the Bystraja Even form): L *ibga* vs. B *aj* ‘good’, L *irildu*⁶ vs. B *jugani* ‘summer’, L *ila:n* vs. B *atkikan* ‘moon, month’, or L

⁶The element *-du* in *irildu* is a frozen Dative form.

balda- vs. B *baku-* ‘be born’. The fillers, too, differ between the dialects: whereas Lamunkhin Even uses the interrogatives *iak* ‘what’ and *ia-* ‘do what’ to substitute for items that elude the speaker, Bystraja Even uses a dedicated lexeme, *uŋ*, for this purpose. Furthermore, Lamunkhin Even has borrowed many words from Sakha, and early Russian loans entered the language via Sakha mediation, while Bystraja Even has borrowed much more extensively from Russian. Interestingly, the two dialects even differ in how they refer to the reindeer herd as an administrative unit and place of work, even though this concept entered the language only during the Soviet era and is expressed with Russian loanwords in both dialects: in Lamunkhin Even, the term used is *stado*, the general Russian word for ‘herd’, but in Bystraja Even it is *tabun*, a term generally used for herds of horses, but also for reindeer.

Some particularly salient differences are found in the kinship terminology, where Bystraja Even differs greatly from Lamunkhin Even.⁷ The Lamunkhin Even terms for ‘father’ (*aman*, *bi*: *ammu* ‘my father’),⁸ ‘mother’ (*epin*, *bi*: *ejmu* ‘my mother’), ‘older brother’ (*akan*, *bi*: *akmu* ‘my older brother’), and ‘older sister’ (*əkən*, *bi*: *əkmu* ‘my older sister’) are widespread among Tungusic lects (Cincius 1975: 23–24, 34–35, Cincius 1977: 443, 456). In Bystraja Even, in contrast, it is the term usually used for ‘older brother’, *akan*, that designates ‘father’, while ‘mother’ is designated with the term usually used for ‘older sister’, *eken* (*bi*: *ekmu* ‘my mother’). However, although Bystraja Even has innovated a dedicated term for ‘older brother’ to replace *akan*, namely *agdig* from *agdi* ‘old’ (*agdigu-agdiβu* ‘my older brother’), it has retained the Tungusic term to designate ‘older sister’, namely *eken*, *bi*: *ekmu* ‘my older sister’. Thus, in this dialect both mothers and older sisters are referred to with the same term.

In the numeral system, the dialects differ in how they express teens: in Lamunkhin Even this is additive, e.g. *mian jə:r* [ten two] ‘twelve’, *mian japkan* [ten eight] ‘eighteen’. Bystraja Even, in contrast, expresses this with a compound of the digit and *pulek* ‘in addition’ (of which the initial consonant can assimilate to the initial consonant of the numeral), e.g. *ju:r.julek* [two in.addition] ‘twelve’, *japkan.pulek* [eight in.addition] ‘eighteen’.

A last lexical difference that I want to highlight here, since it is reflected in the glosses, concerns the verb of motion ‘go’. Bystraja Even has three verbs with a meaning of ‘go’: the generic verb *ŋen-*, which is glossed in the texts as ‘go(GNRC)’,

⁷See Lavrillier & Matić (2024: 122–139) for a detailed and insightful discussion of the peculiarities of Bystraja Even kinship terms; the Lamunkhin Even terminology matches that of the Arka-Tompo dialect discussed on p. 112–122 of their article.

⁸Since kinship terms are obligatorily possessed in Even, I provide both the root form and the 1SG possessed form.

2 Grammar sketch

the source-oriented, unidirectional verb *ur-*, which is glossed as ‘go(UNIDIR)’, and the multidirectional verb *ollo:t-* glossed ‘go(MULTIDIR)’. Lamunkhin Even, in contrast, has only one verb ‘go’, namely *hər-* (cognate with Bystraja Even *ur-*), which is generic and unidirectional. In the texts, this is glossed simply as ‘go’. The verb *ɲən-* does occur in the Lamunkhin corpus, but only three times. Two of these occurrences were produced by Zoja Stepanova (Text 13, lines 6 and 11), a speaker who tries hard to use Standard Even rather than Lamunkhin dialectal forms. It is thus quite likely that *ɲən-* is not a Lamunkhin Even verb.

3 Even traditional way of life

The thematic focus of the volume is on the traditional Even way of life, namely hunting and reindeer herding, and, in Kamchatka, fishing of salmonids.

3.1 Hunting and fishing

The main game animals of the Lamunkhin Evens are snow sheep (*ujamkan*, also known as Siberian bighorn sheep, *Ovis nivicola*), elk (*to:ki*, also known as moose, *Alces alces*), and wild reindeer (*bujun*), with foxes, sables, and hares being hunted for fur. Men who herd reindeer in summer set off for their hunting grounds in winter by reindeer, which can be 100 km distant from the village (cf. Anderson 2006: 92 for a similar situation among Evenks in the Vitim-Olekma region). Here they spend several months at a time, setting traps for foxes and sables and snaring hares (Krivošapkin 2010).

Traditionally, bears are considered sacred animals, and when a bear is killed, certain rituals have to be followed when slaughtering it. For example, when eating the meat the call of crows or cuckoos has to be imitated to pretend to the bear that it is birds that are eating it and not humans. To this day the Lamunkhin Evens generally refer to bears by the euphemism *abiga~abaga* ‘grandfather’ instead of the lexeme *nakat* ‘bear’ and do not hunt them deliberately. The Bystraja Evens, in contrast, seem to have forgotten the taboo surrounding the hunting of bears, although they, too, refer to them with a euphemism: *kobalan* ‘the noisy one’ (Beloljubskaja et al. 2016: 39-40).

An important concept in traditional Even culture is *pimat* ‘the sharing of hunting spoils’ (see Text 14 “Hunting tradition” for a humorous anecdote related to this). As explained by I. D. Burcev of Sebjan-Küöl in 2010: “If I kill a snow sheep or a wild reindeer while hunting with my friend, I have to give this (carcass) to my friend. Its meat, its hide, its head, all of it. He takes that and brings it home. Having brought it home this person shares it (with many people)” (Burcev 2010). Furthermore, traditionally women were not supposed to observe their husbands when these set off for the hunt, they were not allowed to ask them where they were going, were not allowed to talk about what animals they might be hunting

3 Even traditional way of life

while they were away, and were not allowed to meet the returning hunter with questions about his success (cf. Beloljubskaja et al. 2016: 39).

The primary means of subsistence of the Bystraja Evens used to be reindeer herding, with hunting of fur animals (foxes, sables, and hares) serving to obtain a cash income. In the 20th century they adopted fishing of salmonids through contact with Itelmen and Koryaks (Kirillova 2012: 82-83, Golovněva & Golovněv 2019: 36-37). Fish was caught for dog food, being fermented in pits in the ground (see Text 7, lines 49-51), but it also provided and provides an important means of subsistence for the Evens themselves. Especially after the collapse of the Soviet Union many Evens, in particular older people, have moved to their traditional lands where they live year-round in so-called *rybalki* (Figure 3.1), homesteads situated on rivers in which they catch salmonids in summer and prepare them for the winter by drying and smoking them (Figure 3.2 and 3.3; Kirillova 2012: 85).

Figure 3.1: Traditional homestead on the Managič river

3.2 Reindeer herding

Reindeer herding has always been a defining way of life of the Evens and other so-called indigenous small-numbered peoples of the North (*Korennye Maločislennye*).

Figure 3.2: Smokehouse to smoke salmonid fish

Figure 3.3: Some dried and smoked fish (*ka:m*)

3 Even traditional way of life

nye Narody Severa),¹ and “reindeer are a symbol of their identity, language, and culture” (Ignatyeva et al. 2022: 79). Several different types of reindeer herding are known (Vasilevič & Levin 1951), with a basic distinction between large-scale herding in the tundra – found notably among the Samoyedic groups, such as Nenets, and the reindeer-herding Chukchi and Koryaks – and small-scale herding in the taiga. This latter is characteristic of the South Siberian Turkic-speaking Tofa and Todzha, as well as the Northern Tungusic Evenks and Evens, and used to be focused on subsidiary transport reindeer herding, with hunting and fishing providing subsistence. Further distinctions can be made based on whether or not reindeer are ridden or only harnessed to sleds, whether or not dogs help with the herding, and on various particularities of sled construction, the harness, and the position of the driver on the sled.

Before Russian colonization, Even subsistence was based on hunting and fishing. A lifestyle based on hunting is incompatible with herding large numbers of reindeer, since the larger their number the more pressing the need to find pasture for the animals, and this makes it impossible to follow game (Grøn 2011: 79). Hence, reindeer husbandry used to be subsidiary to hunting, and domesticated reindeer were slaughtered for food only in situations of utmost need. The reindeer served only as a means of transport, and herds were small, averaging 20-50 and not more than 100 heads (Tan-Bogoraz 1932: 36, Grøn 2011: 78). The transition from transport reindeer herding to the large-scale reindeer herding common during Soviet times was probably driven initially by the decline in numbers of game animals and later by the Soviet focus on meat production (Tan-Bogoraz 1932: 27, Klovov 2012, Alekseeva 2020: 47).

Evens and Evenks traditionally ride their reindeer (the saddle-reindeer is called *u:ṭak*), leading a caravan of pack-animals (called *inutce*, a term derived from *in-* ‘carry on one’s back’), but have also adopted sleds, probably under the influence of neighbouring groups who use reindeer only as draft animals. This is particularly clear in the case of the Bystraja Evens, whose sleds have the same form as those of the neighbouring Koryaks (Figure 3.4). Although the Evens have dogs, these normally do not help with herding, but are used as guard and hunting dogs.

The Lamunkhin Evens show two particularities that are not characteristic of the Even style of reindeer husbandry: they milk their reindeer (see the texts “Reindeer milk products” (5) and “Taming reindeer” (6)), and when driving a sled they sit with the left leg folded up and the right leg sticking out. These features

¹This is an administrative category that encompasses indigenous peoples of Russia which number less than 50,000 individuals, whose traditional lifestyle was based on nomadic or semi-nomadic reindeer herding, hunting, fishing, and gathering, and who show further cultural particularities (*Severnaja énciklopedija* 2004: 421).

Figure 3.4: Lamunkhin Even sleds (left) compared to a Bystraja Even sled (right). In the photo of the Lamunkhin Even sleds, which was taken in Sebjan-Küöl, the one in the foreground is the sled the driver sits on, the one in the background is a sled for loads. The photo of the Bystraja Even sled was taken in the Esso museum by Svetlana Bušueva (thanks to Natalia Aralova's mediation).

are characteristic of Evenk-style reindeer herding (Vasilevič & Levin 1951: 70, 75), and their presence might point to connections between the Lamunkhin Evens and some Evenk groups in the past. An Evenk origin of one of the Lamunkhin clans is mentioned by one speaker who contributed to the overall Lamunkhin Even corpus. Alternatively, the tradition of milking reindeer might have been borrowed from the Sakha (Holand et al. 2006: 355), a pastoralist people who milk both their cattle and their horses. A point in favour of this hypothesis is the fact that whipped reindeer milk is called *körtcek* (Text 5, line 2) < *küörčex*, the Sakha term for whipped cream.

Both wild and domesticated reindeer belong to the same species, *Rangifer tarandus*, yet the Evens (like other Northern Tungusic groups) designate them with different terms: *bujun* and *oron*, respectively. However, only very few reindeer in a herd are actually tame, namely those selected for riding, harnessing to a sled, or for milking, depending on the customs of the individual groups (Vitebsky & Alekseyev 2015: 414). In large-scale reindeer herding the mass of the herd are kept for breeding and slaughter, and Syroechkovski (2000) speaks of “semi-domesticated” rather than domesticated reindeer. This difference is reflected in the Lamunkhin Even lexicon, where *delmitce* refers to the half-wild reindeer that are herded and contrasts with *ju: oronni* (literally ‘house reindeer’; Figure 3.5), which refers to the tame reindeer; the hyperonym *hu:ma* designates the entirety of the herd. In addition, the Russian borrowing *stado* is now used to designate the administrative unit of the reindeer herd as a place of work. It is not uncommon for the semi-domesticated reindeer of the *delmitce* to join migrations of wild

3 Even traditional way of life

reindeer if these pass close to the grazing grounds of the former; wild reindeer, however, never join herds of semi-domesticated reindeer (Syroechkovski 2000: 120-121).

For an illustration of various traditional artefacts that are relevant to a reindeer herding lifestyle and an explanation of the work routine and daily life in a reindeer herding brigade, see the video recorded in the Sebjan-Küöl school, where Kliment N. Krivošapkin demonstrates a little exhibit of reindeer herding (<https://hdl.handle.net/1839/de0196ca-51eb-4c69-bbf3-ce0461893fab>). Some further terms pertaining to reindeer husbandry that illustrate the importance of this way of life for the Evens are included in Section 3.3.

Figure 3.5: The tame reindeer (*ju: oronni*) of brigade #9 in the camp at the end of the day. This is the reindeer brigade that Ekaterina Krivoshapkina talks about (Texts 2-8).

Before Sovietization, extended family units migrated with their reindeer herds along seasonally specific routes determined by the needs of the reindeer: “The movements of reindeer, and their hosts, are affected by the timing of the rut and breeding season, the date the black flies appear, or the mushrooms” (Anderson 2006: 97). In the 1930s to 1940s, most of the groups were settled and their animals were collectivized in so-called *kolkhozes* (‘collective farms’), which were later transformed into state enterprises called *sovkhazes* (‘state farms’). In this setting, herders and their families were grouped into brigades that were responsible for herding individual herds that all belonged to the state farm (Klokov 2012: 21); it

is these that are referred to with the term *stado* in Lamunkhin Even and *tabun* in Bystraja Even (Section 2.7). In the 1970s and 1980s, these state farms were specialized in meat production and offered considerable logistical support, such as free veterinarian services, mechanized means of transport (all-terrain vehicles, snowmobiles, motorboats), cheap access to helicopters, and various kinds of support for the herders (Klokov 2012: 24, Okorokov 2013: 38). In Kamchatka, the constant use of mechanized transport during migrations led to a loss of saddle- and pack-reindeer, and the Bystraja Evens forgot how to train reindeer for riding (Turaev 2017: 202). They therefore migrate on horseback and herd the reindeer on foot (Figure 3.6, 3.7). This contrasts with the Lamunkhin Evens, where saddle-reindeer and reindeer sleds were still a common sight in Sebjan-Küöl in 2008-2012.

Figure 3.6: Going to the herd on horseback in Central Kamchatka

Reindeer meat was heavily subsidized, being bought by the state from the farms at more than ten times the price it was sold at in shops (Turaev 2017: 196). In the 1990s, with the collapse of the Soviet Union, the state farms were mostly dissolved and the reindeer privatized; but the loss of state support in production and marketing of the meat as well as the loss of a market for the meat (since many immigrants from the European parts of the Soviet Union returned home) made these private enterprises unprofitable (Klokov 2012: 22). Since 2002, state support has again increased (Okorokov 2013: 39), and the reindeer herds in Sebjan-Küöl,

3 Even traditional way of life

Figure 3.7: Anatolij Solodikov herding his reindeer on foot in Central Kamchatka

for example, are managed by a ‘State Unitary Enterprise’ (*Gosudarstvennoe Unitarnoe Predpriyatie*).

However, even though reindeer herding recovered in some areas starting in the early 2000s, as a way of life it is becoming increasingly endangered:

“Another five to ten years, and the last of the older generation will pass away, those for whom the traditional way of life had sufficient meaning in and of itself. This will be insufficient for those who come after (if they come). For them, reindeer herding will only be meaningful if it is tied to the opportunities and advantages provided by a market economy. Without this, there will be no rebirth of reindeer herding or of the traditional way of life” (Turaev 2017: 213, my translation).

For example, although the main means of subsistence in Sebjan-Küöl, the village where Lamunkhin Even is spoken, is reindeer herding (Grigor’ev 2016: 127), the numbers of reindeer have diminished drastically in the last decade: In the years 2000-2009 there were still between 16,000 (Ignatyeva et al. 2022: 81) and 20,000 (Pakendorf 2009: 89) domestic reindeer herded in 12 brigades in Sebjan-Küöl; this had dropped to ~9,700 in 2016 (Ignatyeva et al. 2022: 81), and in the years 2018-2021 the reindeer head count fluctuated between ~7,200 and ~6,400 (Kalinin 2021:

33).² In addition, fewer and fewer young people want to take up reindeer herding as their profession (Kalitin 2021: 36, Ignatyeva et al. 2022: 83), and children are starting to lose interest in their traditional way of life and the Even language (Šarina 2015: 97).

In Central Kamchatka, where the Bystraja dialect of Even is spoken, Evens led a fully nomadic reindeer herding way of life (Bergman 1927) until they were settled in the 1930s in the wake of increasing Sovietization. After a period of decline during World War II, reindeer herding started to increase again from the late 1940s and flourished in the Brezhnev era, from the mid-1960s onwards; in this period it was one of the economically most viable branches of production in the district. However, already from the 1980s onwards young Evens were more and more removed from this traditional way of life. With the collapse of the Soviet Union and the privatization of the herds in the 1990s, reindeer herding collapsed as well: of the 20,000 reindeer in the Bystraja district at the end of the 1980s only 4,000-5,000 were left in 2003. This decline led to the loss of jobs in the reindeer herding sector (Gernet 2008: 62-78). However, in recent years the numbers of reindeer have increased considerably, fluctuating between ~8,000 and ~10,000 in 2018-2021 (Kalitin 2021: 30).

3.3 Some terms related to reindeer husbandry

Table 3.1 presents a selection of reindeer-related terms in Lamunkhin and Bystraja Even in order to illustrate the important role this domain traditionally played in the life of the Evens. The data are taken from the “Reindeer dictionary” compiled in the framework of the DOBES project by Natalia Aralova, Alexandra Lavrillier, and Brigitte Pakendorf, with assistance by Katharina Gernet, Evgeniya Zhivotova, and Luise Zippel.³ Some of the objects listed in the table are illustrated below with photos; these are indicated by an asterisk.

There are very many different colour terms, and consultants often differed in which terms they chose to designate a particular colour when shown photos of reindeer. This might be because (based on my personal and rather superficial impressions) the reindeer in Sebjan-Küöl have different coat colours than those in Kamchatka, so that consultants in one location were not familiar with the colours

²Note that Ignatyeva et al. (2022) and Kalitin (2021) provide numbers not for Sebjan-Küöl as such, but for the Kobjaj district. However, these most likely refer to the reindeer belonging to Sebjan, since this is the principal site of domestic reindeer herding in the district.

³The full dataset with sound files and photos can be accessed at <https://hdl.handle.net/1839/b281a803-805f-4793-bdb0-5e5304f85598>.

3 Even traditional way of life

found in the other. However, it can also be accounted for by the fact that there are several near-synonymous terms, such as Bystraja Even *onapu* ‘white-nosed’, *uŋepu* ‘white-lipped’ and *aŋtalan* ‘white-muzzled’. Furthermore, since the terms designate particular features that might co-occur, different terms are chosen to designate a reindeer depending on which feature a speaker wants to highlight. For example, in Bystraja Even, not only are there terms for white noses, lips, and muzzles, but also for a white belly (*ureplen*) and white legs (*ɬimniklen*); hence a reindeer that has a white belly, a white nose and muzzle, and white legs, as in Figure 3.8, is referred to with any of these terms. Similarly, the terms *burno/burna* and *me:ŋti* are complementary: the first designates the light-grey to white neck, flank, and belly of a reindeer such as that depicted in Figure 3.9, while the second designates the dark-brown back and legs; both terms were therefore used by the same speaker to designate the reindeer in this photo.

Table 3.1: A selection of terms related to a reindeer-herding way of life. Items marked with an asterisk are shown in the images on the following pages.

Designatum	Lamunkhin	Bystraja
AGE AND SEX OF REINDEER		
calf up to 1 month, irrespective of sex	<i>honŋatɕan</i>	<i>onŋatɕan</i>
male, 1-12 months	<i>e:nken</i>	<i>iaβkan</i>
male, 1-2 years	<i>iaβkan</i>	<i>mulkan</i>
male, 2-3 years	<i>iten, mojkɕan</i>	<i>iten</i>
male, 3-4 years	<i>ɲorkan</i>	<i>ɲorkan</i>
male, 4-5 years	<i>amarkan</i>	<i>amarkan</i>
male, 5-6 years	<i>ɟuɟti</i>	<i>ɟuɟti~ɟuɟta</i>
castrated reindeer	<i>atkitɕan</i>	<i>talan, atamat, gillak, ɬalɔm</i>
stud bull	<i>kɔrbe</i>	<i>korbe</i>
female, 1-12 months	<i>e:nken, ɲamukan</i>	<i>ɲamukan</i>
female, 1-2 years	<i>emniri</i>	<i>gulke</i>
female (older than 3 years, generic term ‘(reindeer) cow’)	<i>ɲamitɕan</i>	<i>ɲami</i>
cow not yet having given birth	<i>hatti</i>	<i>atti</i>

4 Glossing and transcription conventions

4.1 Transcription conventions

In the text versions intended for an academic audience, the Even text is transcribed using IPA, and so are Sakha elements in Lamunkhin Even. Russian elements, in contrast, are transcribed using the scientific transliteration system; however, the apostrophe indicating palatalization is omitted. Furthermore, old, established borrowings that are fully integrated phonologically are transcribed using IPA.

In the text versions intended for the Even communities the transcription is in the Cyrillic orthographies used by the speakers. Since not all of the texts were transcribed by speakers themselves, especially in Bystraja Even, I based my transcription on what material I had, extrapolating the spelling convention from forms transcribed by speakers to forms lacking such a transcription. In doing so, I aimed at a consistent spelling (to facilitate use of the texts in schools) and hence homogenized the frequent variants as far as possible. It should be noted that the community-based orthography differs from the standard in both dialects, as mentioned in Section 1.1; it is retained here since it is closer to the dialectal pronunciation and hence more useful for speakers and learners. Since these orthographies are informal and only meant for use by the communities, I refrain from providing a table with transliterations.

Variation in pronunciation is maintained in the transcriptions. For example, in Lamunkhin Even there is intra- and interindividual variation in the form for ‘grandfather’ (which is the euphemism for ‘bear’), which is pronounced as *abaga* and *abiga*, or the form for ‘catch’, which is realized as *hepken-* and *hepkun-*.

In the original files notable disfluencies like false starts, repetitions, hesitation vowels, and the lexical fillers *iak*, *ia-* (Lamunkhin Even, identical to the interrogatives ‘what’ and ‘do what’) and *uŋ-* (Bystraja Even) are transcribed. With the exception of the lexical fillers these were removed from the text selection to enhance readability. Fillers where the target was omitted are translated with ‘whatchamacallit’ or ‘thingummy’, and where possible the intended target is added in brackets; fillers that are followed by their target are not translated in

order to enhance the readability of the translations. Researchers interested in disfluency are thus advised to access the original text and sound files as archived. In the Cyrillic version intended for the Even communities the fillers were removed if they are followed by the target. In addition, clear errors (e.g. the omission of an Accusative case on a direct object) were corrected in both the glossed text and the Cyrillic version, albeit rarely and only after verification with other texts or notes taken during the transcription and translation sessions. Similarly, egregious insertions of Russian terms in some of the Bystraja Even texts (which were clearly triggered by the fact that the speakers were faced with Russian-speaking linguists) were corrected with the Even equivalents. Unfortunately, due to the geopolitical situation while working on this volume I was unable to check the edited texts with native speakers.

4.2 Glossing conventions

For reasons of space and readability epenthetic vowels are not separated and not glossed; instead, they are added to the item that they follow (e.g. instead of parsing *u:ɬakan* ‘his riding reindeer’ as *u:ɬak-a-n* ‘riding.reindeer-EP-PX.3SG’ the form is parsed as *u:ɬaka-n* ‘riding.reindeer-PX.3SG’). For the same reason, in the portmanteau glosses given to the 3rd person pronouns the Dative-Essive case is abbreviated simply as DAT; i.e. *noŋandun* 3SG.DAT ‘to him’ and not 3SG.DAT.ESS.

The list of abbreviations (pages ix-xi) only includes glosses that are abbreviations of labels. Some glosses that are unabbreviated words are therefore not included in the list. These are mostly semantic specifications for derivational morphemes: PLACE, RECEPTACLE, SKILL, GROUP.MEMBER, LOVE, ETHNIC, TIME, FETCH, HUNT, TRANSPORT, USE, EAT, MAKE.FOOD. Additional unabbreviated glosses are: KIN, RESPECTFUL, EXPRESSIVE, DIRECTLY, and SIDE. In the list, the glosses are represented atomically, as far as possible, e.g. the gloss AUG.CVB.SG is composed of AUG ‘Augmentative’, CVB ‘converb’, and SG ‘singular’. However, in some cases composite glosses were added to the list, even if one of the elements is listed separately. This was done 1) when the gloss of a single element might lead to confusion, e.g. ADJR(DESCR) ‘Suffix that derives adjectives from descriptive verbs’, where DESCR ‘Descriptive verb’ does not specify the meaning of the derived adjective, but the base of the derivation; 2) when one of the elements does not occur by itself or in other composite glosses, e.g. AUG.DYN ‘Dynamic Augmentative’ – where the abbreviation AUG ‘Augmentative’ occurs in many composite glosses, but DYN ‘dynamic’ does not occur elsewhere.

Given the frequent bidirectional consonant assimilation, it is not always possible to neatly parse all forms; for instance *jo:ŋɬɪram* ‘I remember’ is parsed as

jo:-ŋtɕi-ra-m [remember-DUR-NFUT-1SG], even though the verb root is *jo:n-*; the final alveolar nasal of the root assimilates to the initial velar stop of the Dura-
 tive suffix, the underlying form of which is *-ktɕi-*. Similarly, the form *ujamkam*
 (parsed as *ujamka-m*) is the Accusative case form of *ujamkan* ‘snow sheep’; the
 final bilabial nasal is the result of assimilation of the alveolar nasal of the root
 and the bilabial Accusative suffix *-β*. In forms with the “primary n” (see footnote
 on page 24 in Section 2.4.1.3) the *-n* was parsed as belonging with the following
 suffix, e.g. Lamunkhin Even *gə:-ni-ten* [say-PST-3PL] ‘they said’ (where the root
 of the verb is *gə:n-*), or Bystraja Even *badu-s-ni-βu* [ride-TAM1-PST-1SG] ‘I rode
 off’ (where the underlying form of the TAM1 suffix is *-san*).

Lamunkhin Even forms involving metathesis (see Section 2.3) are glossed as a
 unit, e.g. *amahni* ‘father.px.2SG’. Forms with the infix Dynamic Augmentative
 are also glossed as a unit, e.g. *amahjako:ki* ‘behind.advb.all<aug.dyn>’ (Text 13,
 line 38). The emphatic vowel rounding and/or lengthening in Lamunkhin Even
 is not glossed separately.

When the English equivalent of verbs is ambiguous between a reading as a
 noun or a verb, ‘to’ is added to the gloss, e.g. *gog-* ‘to.bark’ (to distinguish it from
 ‘bark (of a tree)’). In square brackets I indicate grammatical categories that are not
 overtly marked, e.g. the status of verbs as intransitive or transitive when the Eng-
 lish counterpart is labile, or the Vocative form of kinship terms. In parentheses, I
 provide descriptors for some morphemes that have particular semantic functions,
 e.g. whether adjectivizers derive adjectives with a meaning of time or of ethnic
 group, or whether a Comitative morpheme is in general use or restricted to kin
 terms.

5 Введение к текстам

В эту часть книги включены рассказы, записанные в разные годы в Якутске, в посёлке Себян-Кюёль Кобяйского улуса Республики Саха (Якутия) и в посёлках Эссо и Анавгай Быстринского района Камчатского края. Они представляют два существенно различных говора эвенского языка, ламунхинский и быстринский.

Главной целью книги является ознакомление лингвистов с эвенским языком вообще и с этими двумя говорами в частности, поэтому основную часть каждого текста составляет лингвистическая расшифровка латиницей с переводом на английский язык каждого предложения и морфологическим разбором эвенских форм (так называемым морфологическим глоссированием). Но чтобы эти интересные и богатые подробностями традиционного быта рассказы стали доступны и самим эвенкам, за лингвистическим разбором следуют эвенский текст в орфографии, употребляемой моими консультантами при расшифровке, с параллельным переводом на русский язык.

Важно отметить, что это устные рассказы. Поэтому они могут содержать повторы, оговорки, якутские или русские вкрапления. Этим они отличаются от более привычных читателю письменных текстов, где автор имеет возможность обдумать каждое предложение и отшлифовать свой рассказ. Насколько могла, я исправила оговорки и устранила повторы, а в некоторых случаях переставила предложения таким образом, чтобы рассказ получился более связным. Тем не менее рассказы стилистически носят именно устный характер.

Некоторые рассказчики говорили долго и затрагивали разные темы. В таких случаях я выбрала те части их рассказа, которые больше подходят к тематике книги (традиционные занятия эвенов – особенно оленеводство и охота, на Камчатке также рыболовство – которые казались мне наиболее интересными для западных читателей). Такие части я включала в книгу как отдельные тексты. Поскольку я старалась представить рассказы так, чтобы они составляли тематически связную последовательность, в некоторых случаях части одной и той же записи оказываются разделены и сгруппированы с другими рассказами.

Part II

Lamunkhin Even texts / Ламунхинские тексты

Geographical information

Unfortunately, I am unable to show the places along the migration routes of the seventh and ninth reindeer brigades (mentioned in texts 9 and 2, 3) on a map, but Figure 1 shows the location of places mentioned in texts 3 and 13.

Figure 1: The location of some settlements mentioned in Text 3 and Text 13 (Leaflet | Map data © OpenStreetMap contributors, CC-BY-SA, Imagery © Mapbox)

Введение к текстам

В эту часть книги включены рассказы, записанные в разные годы в Якутске и в посёлке Себян-Кюёль Кобяйского улуса Республики Саха (Якутия). Рассказы, записанные в посёлках Эссо и Анавгай Быстринского района Камчатского края помещены в часть III. Тексты представляют два существенно различных говора эвенского языка, ламунхинский и быстринский.

Главной целью книги является ознакомление лингвистов с эвенским языком вообще и с этими двумя говорами в частности, поэтому основную часть каждого текста составляет лингвистическая расшифровка латиницей с переводом на английский язык каждого предложения и морфологическим разбором эвенских форм (так называемым морфологическим глоссированием). Но чтобы эти интересные и богатые подробностями традиционного быта рассказы стали доступны и самим эвенам, за лингвистическим разбором следуют эвенский текст в орфографии, употребляемой моими консультантами при расшифровке, с параллельным переводом на русский язык.

Важно отметить, что это устные рассказы. Поэтому они могут содержать повторы, оговорки, якутские или русские вкрапления. Этим они отличаются от более привычных читателю письменных текстов, где автор имеет возможность обдумать каждое предложение и отшлифовать свой рассказ. Насколько могла, я исправила оговорки и устранила повторы, а в некоторых случаях переставила предложения таким образом, чтобы рассказ получился более связным. Тем не менее рассказы стилистически носят именно устный характер.

Некоторые рассказчики говорили долго и затрагивали разные темы. В таких случаях я выбрала те части их рассказа, которые больше подходят к тематике книги (традиционные занятия эвенов – особенно оленеводство и охота, на Камчатке также рыболовство – которые казались мне наиболее интересными для западных читателей). Такие части я включала в книгу как отдельные тексты. Поскольку я старалась представить рассказы так, чтобы они составляли тематически связную последовательность, в некоторых случаях части одной и той же записи оказываются разделены и сгруппированы с другими рассказами.

Краткий обзор ламунхинских текстов

Рассказы Ии Васильевны Кривошапкиной были записаны мной в марте 2009-го года в Себян-Кюёле и расшифрованы и переведены самой Ией Ва-

сильевой. Вся запись длится 24 минуты и содержит воспоминания детства Ии Васильевны, а также забавные случаи, которые ей рассказали её близкие. Для книги были отобраны только четыре отрывка из этих воспоминаний, которые наиболее подходят к общей тематике сборника. Эти отрывки приведены здесь под названиями «Кочёвка», «Неожиданные гости», «Уямканы» и «Счастливая прогулка». Они разделены и даны с другими текстами, с которыми они хорошо сочетаются тематически. Весь рассказ в записи латиницей и с английским и русским переводами доступен по ссылке: <https://hdl.handle.net/1839/7a0cc8f1-03e4-4f95-b129-2937691791e4>.

В первом отрывке, названном «Кочёвка», Ия Васильевна рассказывает о том, как она маленьким ребёнком кочевала с родителями – летом на учаке, а зимой в кибитке. Во втором отрывке, названном «Неожиданные гости», она рассказывает о том, как в двух разных местах, Даик и Куникит, в стойбища пришли медведи. Они сильно испугали людей, но к счастью не причинили никому вреда (если не считать пропажу ящика с маслом). В третьем тексте, который здесь называется «Уямканы», Ия Васильевна рассказывает о том, как они с отцом, младшим братом и знакомым оленеводом по дороге из стада в Себян-Кюэль столкнулись с большим количеством бежавших куда-то горных баранов. Они добыли столько баранов, что часть мяса пришлось закопать по пути и вернуться за ним через несколько дней. В последнем из четырёх текстов она рассказывает о том, как им с родителями и младшим братом во время прогулки удалось добыть двух горных баранов.

Рассказы **Екатерины Афанасьевны Кривошапкиной** были записаны в апреле 2010-го года в Якутске мной и Наталией Араловой. Запись была расшифрована Ией Васильевной Кривошапкиной, а на русский язык переведена самой Екатериной Афанасьевной. Вся запись длится 45 минут; из неё были отобраны семь тематически наиболее подходящих фрагментов, которые включены в книгу под названиями «Кочёвка с младенцем», «Детство в стаде», «Собаки», «Блюда из оленьего молока», «Обучение оленей», «Обработка шкур» и «Панты». Хотя в книге отрывки приводятся подряд, их последовательность отличается от той, в которой они были рассказаны. Весь рассказ в записи латиницей и с английским и русским переводами доступен по ссылке: <https://hdl.handle.net/1839/c5ac2119-2379-4335-9000-0e956706a75c>.

В первом отрывке («Кочёвка с младенцем») Екатерина Афанасьевна рассказывает о том, как она взяла с собой в стадо годовалого сына, где он кочевал вместе с ней, её матерью и отцом. Во втором тексте («Детство в стаде») она рассказывает, как ребёнком она проводила каждое лето в стаде, вместе

с родителями, младшим братом, тётями и многими двоюродными братьями и сёстрами. Вместе с оленеводами дети участвовали в выпасе оленей и таким образом учились пасти и лечить их. Кроме того Екатерина Афанасьевна научилась их доить. В тексте «Блюда из оленьего молока» она рассказывает, какие блюда готовят из оленьего молока: в сбитом виде получается «көрчэк», который после добавления варенья напоминает йогурт. Можно кипятить молоко и есть его в горячем виде или дать ему остыть и мазать на лепёшки. Иногда из оленьего молока делают продукт, напоминающий сыр; он называется «кэбель». Между текстами «Детство в стаде» и «Блюда из оленьего молока» помещено короткое описание собак, принадлежащих семье Екатерины Афанасьевны (текст «Собаки»). В отрывке «Обучение оленей» она описывает, как её семья приручала рабочих оленей, приучая их к соли. В результате рабочие олени у них были настолько ручные, что прибежали, когда их зовут. В следующем отрывке («Обработка шкур») Екатерина Афанасьевна объясняет, как она в стаде обрабатывала оленьи шкуры скребком и кожемялкой, замочив их гнилушками. В городе же из-за отсутствия гнилушек приходилось замачивать заваркой, а из-за отсутствия кожемялки – мять руками. В последнем отрывке из записи Екатерины Афанасьевны («Панты») она описывает, как в детстве она любила есть свежееотпиленные и обжаренные панты. Панты срезают только в тёплую, сухую погоду, чтобы рана на месте среза быстро высохла.

Текст **Марты Кирилловны Кривошапкиной** («Медведь») был записан мной в марте 2008-го года в Себян-Кюёле. Он был расшифрован Екатериной Игоревной Шадринной и переведён на русский язык Ией Васильевной Кривошапкиной. Весь рассказ в записи латиницей и с английским и русским переводами доступен по ссылке: <https://hdl.handle.net/1839/ae11869f-bebb-4d6d-ad60-89ed270a9d65>.

В этом очень живом рассказе Марта Кирилловна вспоминает случай, произошедший с ней, когда ей было десять лет. В конце лета отец проводил её и семилетнюю сестру из стада в Себян-Кюёль. Переночевав по дороге, отец решил поохотиться на горных баранов. Когда он уже поднялся в гору, к их стоянке подошёл огромный медведь. Отец прибежал обратно. Девочки со страхом наблюдали «поединок» отца и медведя. К счастью, после того, как отец зажёг ягель, медведь ушёл.

Текст **Раисы Дмитриевны Алексеевой**, который здесь включён под названием «Застряли в стаде», был записан мной и Наталией Араловой в феврале 2010-го года в Себян-Кюёле, а расшифрован и переведён на русский язык Ией Васильевной Кривошапкиной. Весь рассказ в записи латиницей и с английским и русским переводами доступен по ссылке: <https://hdl.handle.net/1839/ae11869f-bebb-4d6d-ad60-89ed270a9d65>.

[//hdl.handle.net/1839/48257ba9-2b32-4953-a6ce-8a727c53b502](https://hdl.handle.net/1839/48257ba9-2b32-4953-a6ce-8a727c53b502).

Раиса Дмитриевна рассказывает про лето в стаде, когда она с детьми очень долго должна была ждать, пока за ними прилетит вертолёт. Сначала они было решили поехать в посёлок на оленях и лошадях. Однако в пути их застал снег, а у них были только летние палатки, и почти не было продуктов, так как медведь сожрал запасы. Поэтому семья должна была вернуться в стойбище и там ждать вертолёта.

Из рассказов **Зои Афанасьевны Степановой** включены отрывки двух текстов, которые были записаны в Себян-Кюёле в разные годы. Первый, который здесь приводится под названием «Наледь», был записан в феврале 2010-го года мной и Наталией Араловой, расшифрован Екатериной Игоревной Шадриной и переведён на русский язык Ией Васильевной Кривошапкиной. Это часть длинной записи (50 минут), которую мы сразу разделили на более короткие тематические фрагменты. Текст «Наледь» в записи латиницей и с английским и русским переводами доступен по ссылке: <https://hdl.handle.net/1839/4ebae6e0-0706-4369-a016-d00b67d7e256>.

Второй текст («Как стать хорошим охотником») был записан мной на два года раньше, в марте 2008-го года; расшифровала его также я. Расшифровка была проверена с Ией Васильевной Кривошапкиной, которая сделала русский перевод. Это тоже фрагмент более длинной записи, которую сразу разделили на части. Текст в записи латиницей и с английским и русским переводами доступен по ссылке: <https://hdl.handle.net/1839/b366667b-f2d6-42ce-99b2-dcfddf821ed9>.

В «Наледи» Зоя Афанасьевна рассказывает про зимнее путешествие. Они с младшим братом и невесткой ехали на оленях из посёлка в стадо. Вечером нарты её брата неожиданно попали в наледь, и он по грудь оказался в воде. К счастью олени стояли устойчиво, так что он смог выбраться. Незадолго до этого им попала маленькая палатка для ночёвки, где они смогли высушить вещи и отдохнуть перед дальнейшей дорогой.

В тексте «Как стать хорошим охотником» Зоя Афанасьевна рассказывает забавный случай из детства своего брата: следуя традиции, тот хотел уделить почётной госте первую добычу, птицу. Та испугалась и бросила птицу на пол. В этом рассказе упоминается бывшая традиция эвенов не называть старых, уважаемых людей по имени, а либо использовать термины родства (бабушка, дедушка, тётя, дядя), либо называть их по имени старшего ребёнка, например «мать Никифора» или «отец Агафьи».

1 Migrating / Кочёвка

I recorded Ija Krivoshapkina on 20 March 2009 in my landlady's house in Sebjan-Küöl, with nobody else present in the room. The recording was transcribed in the local Cyrillic orthography by Ija Krivoshapkina herself; she also provided the Russian translation.

Ija Krivoshapkina was 29 years old at the time of recording and a teacher of Even at the Sebjan-Küöl school, with a university diploma in Even philology. She was my main consultant during all of my trips to Sebjan-Küöl from 2008 to 2012, transcribing and translating most of the recordings and answering my countless questions about the Even language.

The overall recording is approximately 24 minutes long and covers different events that happened during Ija Krivoshapkina's childhood or anecdotes told by her cousins. Four excerpts that fit the thematic focus of the volume were selected for inclusion here. Apart from this, these are: "Unexpected visits" (Text 9), "Snow sheep migration" (Text 11), and "Good fortune" (Text 15). The complete recording with full transcription, translation, and glossing can be accessed at: <https://hdl.handle.net/1839/7a0cc8f1-03e4-4f95-b129-2937691791e4>.

Synopsis

In this brief excerpt Ija Krivoshapkina tells about her earliest memories of life in a reindeer herd,¹ namely how she migrated with her parents as a three-year old. In summer or early autumn she sat on her riding reindeer (*utak*; Figure 1.1; see Figure 3.22 in Section 3.3 for a photo of an infant's saddle *əpe*) in a caravan led by her father, and in late autumn and winter she and her younger brother sat in a covered sled (*kibitka*; Figure 1.2) driven by her mother. At this time their dog flushed out a snow sheep (*Ovis nivicola*, also known as Siberian bighorn sheep) which her father was able to bag.

¹Note that the reindeer herding brigade in which she spent her childhood is one of those described in Vitebsky (2005).

Ну давайте расскажу про своё дет-ство, это наверно будет интересно, да? Моё детство прошло в седьмом стаде, у родных моего отца: моя ба-бушка, мой дедушка, вместе родив-шиеся с моим отцом там были.

Себя помню с трёх лет, как я ко-чевала. Имя своего верхового оле-ня до сих пор помню, его звали Ко-чай. Как говорит моя мама, у него были копыта такие плоские, боль-шие, поэтому его так и называли.

⁴As one of the “indigenous small-numbered peoples of the North” Evens have the right to shoot game for their own use, although they are not allowed to sell the meat.

ўчакан ңй гэрбэ биһин? Чокō гэрбэ биһин, гадан иаһалан ачча биһин.

Ўчаклай бадуддий дьōнчирам. Дьул-дэлэв тар нōву ўчаклай бадудди биврэн, мэйкинэнтэкэн төгэчэдди биврэн, дилан һовнадди биврэн, тар ўчаклай тэгэтникэн. Тарит бй һуклэһэнчэ биһэм үрүчүн, дальше эһэм өйдөр. Тар.

Как звали верхового моего брата? Его звали Чоко, у него второго глаза не было.

Помню как я сидела верхом на учаке своём. Передо мной мой младший брат сидел на своём учаке, рассказываясь сидел, у него голова шевелилась, сидя на этом своём верховом. Перед нами наш отец нас вёл за собой, после меня грузовые олени наши, потом мать тоже своих грузовых вела. Так спя кочевали, никаких бед не зная, не зная как съезжаем на шею оленя, как назад съезжаем, как набок съезжаем, так спя до нового места доезжали.

Потом тоже осень было, кажется, тоже мне три года было, тогда мы уже в кибитке едем. Рядом со мной сидел мой младший брат, впереди наша мать. Однажды наша большая собака начала лаять, как её звали? Её звали Рекс, лохматая, красная собака. Она поставила горного барана, самца. Этого отец застрелил. Так в поездке мы нашли мясо себе. Потом я наверно заснула, не помню дальше. Всё.

2 Migrating with an infant / Кочёвка с младенцем

This text is extracted from a long recording made on 01 April 2010 in the speaker's office at what was then the Department of Northern Philology at the Faculty of Philology, Yakutsk State University, by Natalia Aralova and myself. It was transcribed in Cyrillic orthography by Ija Krivoschapkina and translated into Russian by Ekaterina Krivoschapkina. The complete recording with full transcription, translation, and glossing can be accessed at: <https://hdl.handle.net/1839/c5ac2119-2379-4335-9000-0e956706a75c>.

Ekaterina Krivoschapkina was 39 years old at the time of recording. She has a diploma in Even philology and works as a lecturer at what is now the North-eastern Federal University in Yakutsk. She used to spend every summer in the reindeer herd with her parents, her brother, and her son. The overall recording is 45 minutes long; from it seven excerpts were chosen here. Apart from this, they are: "Childhood in the herd" (Text 3), "Dogs" (Text 4), "Reindeer milk products" (Text 5), "Taming reindeer" (Text 6), "Hide preparation" (Text 7), and "Eating velvet antlers" (Text 8).

Synopsis

In this excerpt, Ekaterina Krivoschapkina tells how she took her one-year-old son to the reindeer herd, where he spent his early years. She explains how the Evens migrate by reindeer caravan in summer (Figure 2.1), with a special reindeer, the *bebe:ruk*, carrying the baby's cradle (a cradle is shown in Figure 3.23 in Section 3.3), whereas in winter the infant is transported by *kibitka* (the covered sled illustrated in Figure 1.2 above).

This text contains several evaluatives derived from descriptive verbs, amongst others the only spontaneously produced form of the 'tenderness' marker -*ʃa:gagaj* (in line 36).

¹Note that Ekaterina Krivoshapkina corrects the term *turki* ‘sled’ for *hirga*, the Sakha (Yakut) form. She may have felt that the former is a Standard Even word and the latter is the dialectal form. In actual fact, however, both *turki* and *hirga* are used in the Lamunkhin Even corpus, with *turki* being a bit more frequent.

Мой сын Кирилл в тысяча девять-
сот девяносто пятом году родился.

рин. Тарит балдачалан мут - элэ городла балдарин - сразу тала билэклэвур хэррит, Сэбэндүлэ. Тарит өмэн анҗанин бчалан ирилду стадала сразу ньулгэһнит. Амму гэннэрин, тарит машинат эникэн биһэ, оронат ньулгэһнит. Кирилл өмэн анҗанин элэкэс бдгаран. Тарит эчин бэбэлэ тэгэттин. Эчикэн гадлан һэрүк, эли бэбэ. Тарит куҗав олок эти һоҗна биһин. Тар бэбэ дōлан ньайукукун дэссиврэн: «Гу, гу», гөникэн.

Тарав, бэбэлкэн орам, элэ иалгида эвэхэл «бэбэрүк» гөҗнэр тарак орам, ну, бэбэлкэн куҗав инупти орам. Тарав эйму элгэврэн. Тарит ан бастан эчин амму хэргэрэн. Амму эчин өмэн туркилкан биврэн, тала оһоку, турбав нэврэп. Нһан эчин дьаһак, тала чайникалбу, нһналбу, эгдээн нһнав нэврэп, тала мөлимким игин. Тарит амардалан адукун инучэ биврэн, тарит бй. Бй һан һойа инучэв элгэврэм, ирукалкәкан. Амаргаг инучэву ирукалкан биврэн. Тарит амардадув эйму. Или эчин: эйму дьулэһки хэргэрэн и бй эйму амардадукун, или бй эйму дьулдедун и эйму бй амардадув. Тарит дьэ амаргаг нөву Коля биврэн. Мут орондук һөнтэ өссө муралкан биһэп. Тиэми нөву Коля муралбу элгэврэн эчин, муралкан иавран тар. Тачин мут ньулгэникэн, ньайукукōн ньулгэникэхэл стадала иһкарап.

Потом, когда он родился, мы - он здесь в городе родился - сразу туда в посёлок свой поехали, в Себян. Потом когда ему исполнился один год, в стадо сразу укочевали, летом. Отец приехал, а так как машин не было, мы на оленях поехали. Кириллу только исполнился год. Потом так он сидел в люлке. Так на половине это вьюк, здесь люлка. Потом мой ребёнок совсем не плакал. В этой люлке тихонечко лежал: «Гу, гу», говоря.

Это, олень с люлкой, здесь эвены этой стороны называют *бэбэрүк* этого оленя, ну, оленя, на которого навьючивают ребёнка в люлке. Это моя мать ведёт. В начале так отец едет. Отец с санями бывает, туда печку, трубы кладём. И такой ящик, туда чайники, посуды, большую посуду кладём, туда ведра еще. Потом сзади немного вьючных оленей бывает, потом я. Я тоже много вьючных оленей веду, в том числе с жердями. Последний вьючный олень бывает с жердями. Потом позади меня мать. Или так: мать вперёд идёт и я после матери, или я впереди матери и мать после меня. Потом задний мой младший брат Коля бывает. Кроме оленей у нас ещё лошади. Поэтому Коля ведёт лошадей так, с лошадьми делает вот. Так мы кочуя, тихонько кочуя, доезжаем до стада.

Тар иһридур, Кирилл өмэнни օри-
дун иһридур, ирэк төррэ иһрит-

врэн. Тарит ноһан детсадла эчэ
бивэттэ, детсадла эникэн бивэттэ
упэчэл ньан абыгачал стадала би-
вэттин. Тала ноһман тутэ օракан
эчин кибиткэлэ тэгуникэһэл ньул-
гэрэр. Тиэми ноһан, бй омологову,
орам nahā hō айавран.

В этот приезд, в приезд, когда Ки-
риллу стал год, в какую же мест-
ность приехали? Давайте вспомню.
Куда же мы доехали? В Антавчан
доехали что ли, куда ли? Или я по-
забыла? Или как? Или мы доехали
в Һолкуни? Нет, кажется, доехали
в Антавчан.

Потом туда доехав, до того, как мы
доехали до стада, мой сын не хо-
дил. Так только сидел, на руках так
носили. Потом, доехав в стадо, ко-
гда мы его вели так за руки, уже
начал ходить. Там пухленькие ун-
ты эти, меховые чулки мать оде-
вала (ему). Так русской обуви не
было, это, как называют же, такие
маленькие эти ботиночки тоже. По-
том резиновые боты были, эти ему
большие были, поэтому мать эвен-
ские чулки одевала ему, эвенские
унты. Надев эти свои унточки, пе-
реваливаясь ходил мой ребёнок.
Брали его за руки.

Поэтому мой сын с одного года
до сих пор каждый год в стадо, с
наступлением лета, туда выходит.
Потом он в детсад не ходил, не хо-
дя в детсад с бабушкой и дедуш-
кой в стаде был. Там его с наступле-
нием зимы, так в кибитке усадив,
кочевали. Поэтому он, мой сын,
очень любит оленей.

3 Childhood in the herd / Детство в стаде

For details about the recording and the speaker please see the introduction to Text 2. The complete recording with full transcription, translation, and glossing can be accessed at: <https://hdl.handle.net/1839/c5ac2119-2379-4335-9000-0e956706a75c>

Synopsis

Ekaterina Krivoshapkina remembers her childhood in the reindeer herd. Every year her mother, who worked as a teacher in the Sebjan-Küöl school, would take her and her brother to spend the summer with their father who was a brigade leader. They would go together with a big group of cousins, and the children joined in the reindeer herding: the older children would join the night shifts (*iaβtci*- ‘herd at night’), and the younger children would help with the daytime herding (*kəstci*- ‘herd by day’). In this way they learned how to find suitable pasture for the reindeer, how to treat them if they fell ill, and how to milk reindeer cows. In the text “Reindeer milk products” (Text 5) she explains what they do with the reindeer milk.

¹The name of the river Hulapaṭčan contains the adjective *hulapa* ‘red’ and the Definite Diminutive suffix *-ṭčan*, i.e. it translates as ‘the little red one’.

²Sangar (Figure 1) is the administrative centre of the district in which Sebjan-Küöl is located.

³Təŋektəŋ is derived from *təŋke*, ‘patch of forest with big tall trees’; in that place there used to be a forest like that, but now it has been largely cut down for firewood.

ню, мы каждый год с наступлени-
ем лета, когда отдых начинался,
мы выезжали в стадо. В стаде ра-
ботает мой отец, в 9-ом стаде.

И сейчас он работает, много лет,
наверно более сорока, там он рабо-
тает. Эго зовут Афанасий Василье-
вич Кривошапкин. Там он работа-
ет очень много лет, сейчас он там
молодым оленеводам - как это на-
зывают? по-русски - «наставник» -
работает наставником. Очень мно-
го лет он бригадир был, в том 9-ом
стаде. Мать моя Анастасия Афана-
сьевна Кейметинова, она в Себян-
Кюельской школе работала учите-
лем истории.

Взяв отпуск, с наступлением кани-
кул, она нас к отцу отвозит. Туда
к отцу мы откочевывали, раньше,
как я помню, машин было мало,
поэтому мы из Себяна на оленях
выезжали. Вот прямо по руслу ре-
ки һуланьачан. Сейчас там дорога
же, машины ездят, сюда в город
едут, в сторону Сангара. По этой
дороге мы доезжаем до стойбища,
в местность под названием Төһэк-
чэн. В множестве детей мы в стаде
летом очень хорошо ездили.

Наши родные всему учили нас. По-
том самые старшие, мы, ездили к
оленьям, сопровождали моего отца.

Мой отец был бригадиром, потом он нас там по сменам делал. Мы с Катей бывали в одной смене. Старший брат моего отца был, по имени Василий Васильевич, оленевод. Вот с Василием Васильевичем вместе мы пасли оленей. Мой отец вот с моими младшими братьями делал: с моим младшим братом Колей, Андрей, они вместе. Потом Женья, Матвей, Толик - они в другую смену оленей смотрели. Вот так очень хорошо бывали, когда были детьми.

Тогда наши родные, и мать, и отец, много нам дали. Это с отцом я это, как пасти оленей, как, где их кормить, по какой горе, по каким этим кормить узнала я. Как кормить (оленей) хорошо будет, где много ягеля растѳт, где ягеля меньше бывает, какие растения олень любит - это всѳ я от отца узнала. И когда олень заболевѳет, как его лечить. Глагол ѳсть в литературном, *бѳгдѳтчѳттѳй* (лечить). Как лечить от отца узнала, когда бывает копытка или другое. Вот.

Ещѳ мать меня научила доению важенок. Я с десяти лет дою важенок. Смирную важенку вначале давали, престарелую смирную важенку. *ѳлбѳчѳ* - это старая важенка. Не двигающуюся, не пинающуюся важенку. ѳту доила, потихоньку доя постепенно научилась.

4 Dogs / Собаки

For details about the recording and the speaker please see the introduction to Text 2. The complete recording with full transcription, translation, and glossing can be accessed at: <https://hdl.handle.net/1839/c5ac2119-2379-4335-9000-0e956706a75c>.

Synopsis

In this very short fragment Ekaterina Krivoschapkina explains about the different dogs they have: dogs that help with herding and dogs that help with hunting. Note that it is rather unusual for Evens to have herding dogs (Alekseeva 2020: 47), a phenomenon that is generally considered characteristic of reindeer herding peoples west of the Yenisey (Tan-Bogoraz 1932: 37, Vasilevič & Levin 1951: 75).

Кроме оленей ещё у нас есть лошади, я говорила, да? У нас четыре лошади. Лошади есть и собаки.

Собак у нас тоже очень много: собака отца, собака Коли, собака матери и собака Кирилла. Некоторые собаки так для присмотра оленей днём, ночью отцу помогают. Кроме этого две собаки в походе на охоту, на горного барана ли, на медведя ли пойти, они тоже помогают. Эти охотничьи собаки, разные. Вот.

¹The word *abaga~abiga* ‘grandfather’ is the euphemistic term for ‘bear’.

5 Reindeer milk products / Блюда из оленьего молока

For details about the recording and the speaker please see the introduction to Text 2. The complete recording with full transcription, translation, and glossing can be accessed at: <https://hdl.handle.net/1839/c5ac2119-2379-4335-9000-0e956706a75c>.

Synopsis

In the original recording, this excerpt is the continuation of Ekaterina Krivoshapkina's childhood memories: after explaining how she learned to milk reindeer (Text 3, lines 35-42), she here goes on to say that she nowadays milks many reindeer every day in summer. She then explains about the different products they make from reindeer milk. Whipped milk is called *körtcek* – after adding berries it is similar to yoghurt. The milk is also gradually heated and eaten warm, or spread on bread after having cooled off. Another product that is occasionally made is *ke:bel*, a kind of cheese; for this, rennet is needed that is taken from a snow sheep lamb's stomach.

Reindeer milk has a much higher fat content than cow's milk, with 11-15% at mid-lactation and reaching 20% in late lactation, with 12-13% protein content. Furthermore, the fat globules form a more stable emulsion, explaining why it gets thick enough to spread when boiled. The change in chemical composition over the lactation period has an influence on the use made of the milk: "Normally the milk from the first part of lactation was consumed fresh; the second part was mainly used for cheese production..." (Holand et al. 2006: 358).

²Ekaterina Krivoshapkina changed the structure of her sentence midway – the present participle of eat would have worked well as the complement of ‘like, love’, e.g. *tēßtə varenieβan ne:riži jeptij aja:βram* ‘I like to eat (that) having put berry jam’; for the sentence to end as it does she should have used the same-subject Conditional-Temporal converb, i.e. *tēßtə varenieβan ne:riži jepmi ho: dahli biβren* ‘if one eats it having put berry jam it is very tasty’.

 towards the evening the milk becomes like this, becomes hard.’

³In the beginning, Ekaterina Krivoschapkina resorts to the placeholder *iak* (literally ‘what’) a lot, because she didn’t remember how rennet is called in Even. And it is actually the product made with the snow sheep rennet, the cheese, which is called *ke:bel*, although some people also call the rennet itself *ke:bel*, as here. The lump of rennet can be used over a long time, as each time only a little bit of it is used. This kind of reindeer milk cheese is made very rarely.

отпуск еду, 20, 25, иногда даже около 30-ти важенок дою, вот.

Это, много молока надоив, вот в такую миску, в такую посуду (льём), и вот столько становится. Каждый день утром мать оттуда слив, в такую маленькую посуду слив, делает *көрчэк* так, взбалтывая мутовкой. Очень вкусно бывает это. Когда ягоды вырастают, налив ягод, варенье сделав, туда с этим сделав, очень хорошо. Почти как йогурт становится, взболтанное.

Потом кроме этого мы молоко кипятим. Кипятя молоко, тоже там это знать надо. Просто на печку не ставишь. Там на печку поставив, постепенно так разогревая, потом постоянно так помешивая, однообразно помешивая. Не так (быстро), а вот так, тихонечко помешивая, кипятим. Вот когда вскипит, это молоко густым становится. И там мать говорит, - «Не сделай комковатым!», - говорит. Вот кипятя, или оттого, что плохо помешаешь, или когда вовремя не помешаешь, это начинающее кипеть молоко так становится комковатым, по-русски сказать, становится «комком». Поэтому чтобы не сделать комком, так очень внимательно смотря вот ждёшь, когда вскипит. Потом взяв с печки, и так сразу в горячем виде едят. Но я больше это остывшее люблю. На лепёшку так намазав, потом поверх так

ли биврэн. Тарав мут *hō hō*яа өкэ-

ирилив коудос мут тар өкэньу дьэб-
гэрэрэп.

ягодное варенье положив кушать,
очень вкусно бывает. Это мы очень
много молока едим.

И мать *кэбель* делает из этого мо-
лока. Из внутренности живота гор-
ного барана, из внутренности детё-
ныша горного барана вот это взяв,
повесив, *кэбель* становится, такой
маленький. Наверно, вам показы-
вали. Потом в надоенное молоко
это из *кэбель* вот так кладёшь. Ну,
допустим, вот надоенное днём (мо-
локо) кладёшь, потом к вечеру это
молоко так затвердевает. Став твёр-
дым, как-то так, как сказать мож-
но? - как сыр становится. Потом это
так в чай кладя или само по себе
так в таком виде съедаешь. Тоже
очень вкусно бывает, вот. Поэтому
днём это всё лето мы это молоко
едим.

¹See, for example, Anderson (2006: 91) for an account of an Evenki reindeer herding cooperation whose reindeer are “seen as mostly ‘wild’ and not possessing the high level of training and attention to herders that the herds of the past used to have. An illustration of this is the current lack of any reindeer trained for saddle riding...” due to the lack of time the herders can devote to taming their deer.

Обучение оленей: Текст по-эвенски с русским переводом

Муттулэ оронти һойа. Үчакалти ко-
 нечно биһэ. Би үчаку уже тйк - адй
 анҕанилкан одни - тунҕан анҕа-
 нив уже, тунҕис ирилдув одын та-

У нас оленей много. Верховые оле-
 ни, конечно, есть. Мой верховой
 олень сейчас - сколько ему лет ста-
 ло - уже много, пять лет уже, пятое

рак у́чаку бадудаку. У́чаку конечно һойа биврэн, тачин, омологов-да у́чакан.

Тарит тар у́чакалбут, оралбу бэкэб-бэн амму Афанасий Васильевич таккаккаран, ньан нёву Коля. Но́жар-тан таккаккарап. Мут оролти бэкэч-чэндьур у́нив һара.

Ньан мут ён таккаккарап? Орон, кётлен биһи́нин, э́жкэн биһи́нин, һонҗачан биһи́нин эһни биһэ - уже һонҗачан амардадун э́жкэн, эһни. Һонҗачан, тар ёмэн игин илалкан һонҗачан гё́нэр, гё́лие? Э́жкэн бракан, август иландук, августу мут э́жкэчэлбур эчин һэ́пкунидьур у́ниду таккаккарап, һаакитаду, ни́утэду, эчин йдэрду у́йчиникэ-һэл. Ньан таду но́жардутнан таку бё́никэн - «так» гэрбэ «соль», гё́лие? Тарав таккаккарап.

Тиэми мут оралти бэкэччэндьур эстэ гулун биһэ. Но́жартан бутун-ни, таку нугаһнакат, куньяварар муттулэ. Ньан мут оралти муту бэкэччур иадьит һара, ньё́чидич гё́ми «по голосу узнают» гэрбэ, ко-ласчит. Коля ньё́риды: «Эмэлдэ!» гё́никэн, милтэрэ бэкэччэндьур ку-ньяварар. Бй ньё́риды, дэлмичэлэ йриды, бадьикар орон эмнэкэн, дэлмичэ эмнэкэн, дэлмичэлэ й-врэм, у́ниҗэлби дьавриды, тарит дьэ ньамичалби мэ́ндэврэм: «Эм-элдэ, эмэлдэ, ма, ма, эмэлдэ!» гё́ми дириҗэйэккэн куньяварар, тара. Эй-му җаттакан ньан тачин куньяварар.

лето моё́ будет, как я езжу на этом учаке. У меня учаков конечно мно-го бывает так, и учаков сына.

Потом этих верховых оленей, всех оленей мой отец Афанасий Васи-льевич обучает и мой младший брат Коля. Они учат. Наши олени все знают верёвку (привязь).

И как мы учим? Когда этот олень маленький, когда он оленёнок, не когда он новорождённый оленё-нок - после новорождённого оле-нёнка большой оленёнок же. Һонҗа-чан - это одномесячный называют һонҗачан, да? Когда он становится большим оленёнком, с августа ме-сяца, в августе мы своих оленей так поймав, обучаем привязи/узде, к дереву, корням, на привязи привя-зывая. И туда им соль давая - «так» - это соль, да? Этому учим.

Поэтому наши олени все не явля-ются дикими. Они все, когда соль вынимаем, бегут к нам. И наши олени нас все по этому знают, по-русски сказать «по голосу узнают», по нашему голосу. Когда Коля вы-йдя говорит: «Идите!», полно все бегут. Я выйдя, зайдя в стадо, ко-гда утром приходят олени, когда стадо приходит, я выхожу в стадо, взяв верёвки свои, потом своих ва-женок ищущу: «Идите, идите, на, на, идите!» скажу, полным-полно бе-гут, вот. Мать когда зовёт, тоже так прибегают. Потом сейчас, когда Ки-рилл зовёт, тоже прибегать стали.

Тарит тйк Кирилл Һаттакан, Һан куньари бчал.

Тачин Һойа орам Һапкунэрэп, инэу-тэн, тарит Һамичалбу Һойав Һапкунидьур дьэ Һиргарарап. Һиакиталкан тёр биҺэкэн, Һиакитаду эчин уйриды, Һиргарарап. Һиакита ачча тёрэлкэн биҺэкэн эчин амму иав овран: Һирньайу. Голу чикириды, эчин Һиакитав чикириды, бөдэлэлкэн иариды, иҗала уйриды, тар этит Һомнар уйриды, тар Һирньайду мут Һамичалбу уйгэрэрэп. Һө мёкук Һамичалбу, эчин Һёкири Һамичалбу амму Һан Һёву Коля дьавгарар. Никандукун эчин дьавридьур, тарит бй Һиргарарам эчикэн, Һайукукан. Тарит тар мёкук Һамичал ҺёкиҺүэрэдэ, Һәллив-да ҺёкиҺиндыр, эрэу-нэв-дэ ҺёкиҺиндыр. Һәдун бэй итиланда ҺёкиҺиүгэрэр. Тара.

Тарит Һайукукан мут таккаврап тар Һамичалбу. Тар уһиду, такту, бэйдү татча Һамичал Һүрэлтэн, эҗкэлтэн Һө Һан нумак биврэр, чем тар дэлмичэлэ уһив эти Һәр орондук гёми. Тиэми бэй бэкэчэн муттулэ, стадала эмчэ бэй бэкэчэн, миаунан. «О, эрэк иак мөдан! Һу ороһлон бн эчин бутунни дириүёйёккэн куньантакаһал, иак нумакалтан», гёүнэр. Тара.

Так много оленей привязываем каждый день, потом важенок много поймав, доим. Если местность с деревьями, к дереву так привязав, доим. Если местность без деревьев, так отец это делает так: привяз типа козёл. Срубив дерево, так дерево срубив так, с ногами сделав, привязав к камням, привязав, чтобы не двигалось, к этим козлам мы привязываем важенок. Очень брыкливых важенок, которые так пинаются, мой отец и младший брат Коля держат. Взяв за шею, потом я дою так, потихоньку. Потом эти беспокойные важеньки и пинают, и по рукам пинают, и сюда пинают, иногда и по лицу человека пинают. Вот.

Потом тихонько мы обучаем этих своих важенок. У важенок, которые приучились к привязи, к соли, к человеку, дети, их оленята тоже очень спокойными бывают, чем вот олени, которые в свободном стаде не знают привязи. Поэтому все люди у нас, приехавшие в стадо, все удивляются: «О, как это удивительно! Ваши олени как так все кучой прибегают, какие ручные», говорят. Вот.

7 Hide preparation / Обработка шкур

For details about the recording and the speaker please see the introduction to Text 2. The complete recording with full transcription, translation, and glossing can be accessed at: <https://hdl.handle.net/1839/c5ac2119-2379-4335-9000-0e956706a75c>.

Synopsis

Ekaterina Krivoschapkina explains how they prepare animal hide in the herd, by scraping it with a *ko:ɬaj* (see Figure 3.26 in Section 3.3), soaking it with *hilte* (rotten larch, Figure 7.1), and softening it (*moŋŋa-*) with a *kerde* (see Figure 3.26 in Section 3.3). However, in town she lacks the *hilte* and has to use brewed tea instead. She also doesn't have a *kerde*, but is hoping that her mother will send her one from the village. She will then be able to prepare the hide from reindeer legs (*ohol*), so that she can have fur boots (*unta*) sewn from them. Such fur boots are an absolute necessity in the extremely cold Yakutian winters (Figure 7.2).

И от матери, от родных я узнала
как очищать скребком лапки оле-
ньи, шитьё. И лапки даже сейчас я
сама скребу, мну. Вот сейчас здесь
в город приехав, вот из Себяна с
отпуска привезла лапки, чтобы ун-
ты пошить. Потом здесь сама с сы-
ном скребу скребком и мну. Только
здесь гнилушек нету.

Там в стаде мы гнилушками за-
мачиваем эти очищенные лапки
свои. Потом гнилушками обрабо-
тав, продержав так, когда раствор
проникнет, когда промокли, так
мнём. Здесь из-за отсутствия гни-
лушек я иногда этим делаю вот:
чай заварив, замазав чаем, потом
подержав, сколько-то часов подер-
жав, мну.

Потом кожемялки у меня тут то-
же нет. Если нет кожемялки, этим
делаю, так руками растягивая. По-
том мать обещала найти кожемял-
ку. Если пришлёт хорошо было бы.

А вот в стаде мы всё так как бы «по-
этапно» говоря делаем: очистив
скребком, промочив, помяв, мнём
кожемялкой. Потом шьём и унты,
и что угодно.

8 Eating velvet antlers / Панты

For details about the recording and the speaker please see the introduction to Text 2. The complete recording with full transcription, translation, and glossing can be accessed at: <https://hdl.handle.net/1839/c5ac2119-2379-4335-9000-0e956706a75c>.

Synopsis

In this extract Ekaterina Krivoschapkina explains about some of the food products traditionally eaten by Evens. A delicacy is roasted velvet antlers (*nime:t*). The young antlers of reindeer are soft and are sawed off and eaten after burning off the velvet in the fire. Even later the endpoints of the antlers are soft and can be eaten, although the larger part of the antler body grows hard and bony. The velvet antlers are cut in dry sunny weather and chewed and sucked with relish by children. The beneficial properties of velvet antlers are known to Russian (and Southern Korean, Turaev 2017: 197) companies who produce tonics from them. Another source of vitamins in the past was the root of the Siberian lily (*nuba:*) which was dug up and eaten raw or cooked.

Панты: Текст по-эвенски с русским переводом

Ньян ирили, июнь илāндун нймэ- Еще летом, в июне месяце, мы
 ту дьэбгэрэрэп, орон нймэббэн. Һō едим панты, оленьи панты. Бывает

⁴Nowadays these roots are not especially gathered for food, they are only eaten out of curiosity, or if people get hungry during a reindeer herding shift, then they might dig them up and eat them; they can be eaten raw or cooked.

дахли биврэн. Тиэми стададу тэг-этми һо ай биврэн. Бэкэббэн эчин дахлив дьэбгэрэрэп. Нймэту куңал һо айāvгарар.

Нймэту эчин ибга погода-ньун бракан чикивранни. Удан-гу, иңэй-һи-гу биһэкэн, эстэн чикиввар. Иа-ми гёми, тар орон һаңникан көкэврэн, нймэтэн эникэн олгоро, тар чикидаңатнан иан. Тиэми эчин ньолтэлкэн, һо эчин һөкки инэңи бракан-ньун нймэту чикиввар.

Би амму таракам һойа куңаду чикивран дьэ: мут Колянхун, тар Татьяна Афанасьевна дигэн куңадун, Елизавета Афанасьевна илан куңадун, тарит тадук Толяду, Матвейду, миан куңаду нймэту эчин чикивран. Мёнкэн һойа эчин чиккаттиды, бэкэббэн далгариды, бёврэн тарит. Ньан энъэнти-дэ тар, эйму нёңилни-дэ, Тамара Афанасьевна-да далгаккаран. Өмэтту бэкэччур эчин далгачантакаһал дьэбгэрэрэп дьэ. Дьэптэкэт көтлэн куңал, нёңилти, эчикэн һибаңакон ойаккаран, һуңэл эчикэн ёруникэн. Дэлби, дэлби мукуккаран, тар ойбан дьэбэһнидур, дёван һуңэлбэн мукутникан.

Тар нймэттук һо һойа иалбу оврар, эһни, тйкэ тар «таба компания» эчин - ньүчидич гёми «лекарственной средствалбу» гёлие? - нймэттук. Настойкат ёникан, һо һойа иав иаврачал эбит, эһни. Һо һойа эниндук бэлгэрэчэ тарак.

очень вкусно. Поэтому жить в стаде очень хорошо бывает. Всё такое вкусное едим. Панты дети очень любят.

Панты срезают только, когда становится хорошая погода. Если дождь или холод, не срезают. Потому что этот олень истекая кровью умирает оттого, что его рога, то что срезано, не высыхают. Поэтому панты срезают, когда очень такой жаркий день становится.

Мой отец тогда многим детям срезает: нам с Колей, четырём детям Тамары Афанасьевны, трём детям Елизаветы Афанасьевны, потом отсюда Толя, Матвей, десяти детям так панты срезает. Один много так срезав, всё на огне приготавлив, даёт потом. Ещё и мать вот, и младшая сестра матери, и Тамара Афанасьевна обжигают на огне. Все вместе так на огне обжигав едим. Когда едим, маленькие дети, младшие братья и сёстры такие испачканные становятся, бедные, кровь так вытекающая. Сильно сосут, эту кожу съев, внутренность, кровь высасывают.

Из этих пантов очень много этих делают же, сейчас вот «таба компания» - как говорят по-русски «лекарственные средства», да? - (делает) из пантов. Делая настойкой, очень много этого делают же, оказывается. От очень много болезней помогает это, оказывается.

Дьалбу-да гёһнэр, ноһартан эмиэ кётлэн биһиһивур, көчүкэн биһиһивур ньан нймэту дьэбникэн, улдэв дьэбникэн дьэ, өкэһу дьэбникэн, төвтэ һиэрэкэн, төвтэв дьэбникэн иһучэл. Таракам мут дьалти куһа биһиһэтнэн вообще битэминдэ, иак-та гэрбэ ачча-һни. Овоцида, фрукта-да гэрбэ ачча. Тиэми ноһартан тар орон иаван дьэбникэхэл иһуникэхэл бэй өчал. Тйк ньүчидич гёми, «авитаминоз»-та эчэл бра, иак-та цинга-да иак-та эникэхэл бра. Тар улдэв дьэбникэн, өкэһу дьэбникэн, һуһэлу дьэбникэн, һуһэл ианикан, ньан тар нймэттук ...

Ньан тар ирэк-тарак һиэврэн, эһни, тар нуба гёникэн, ньёчэ тарак. Нубав, тарак ниһтэвэн, дьэбникэн. Ну, «ниһтэ» гэрбэ ньүчидич «корень». Тарак иаван дьэбникэн. Һимбйр морковкамдас, картошкамдас. Тарав эчин илникэн дьэбникэн. Ньан эчин чиккатникан ноһартан упётнэн иэкэлэ, һиллэ өһкэврэчэ. Тара.

И родители мои говорят, они тоже, будучи маленькими, едя панты, едя мясо, едя молоко, когда растут ягоды, ягоды кушая, выросли. Тогда, когда наши родные были детьми, вообще ничего, ни витаминов, ничего не было же. Ни овощей, ни фруктов нет. Поэтому они оленье это кушая, растя, стали людьми. Сейчас по-русски если сказать, не стали авитаминоз, ни цинга, ничего не становясь. Вот это мясо кушая, молоко кушая, кровь кушая, кровь что-то делая, еще вот благодаря пантам ...

Еще, всякое растёт же, эта лилия даурская, это растение. Лилию даурскую, это корень её едя. Ну, *ниһтэ* - это по-русски «корень». Что-то этого кушая. Всё равно как морковка, картошка. Это так, снимая кожуру, кушая. Ещё так разрезав их бабушка в котёл, в суп бросала. Вот.

9 Unexpected visits / Неожиданные гости

For details about the recording and the speaker please see the introduction to Text 1. The complete recording with full transcription, translation, and glossing can be accessed at: <https://hdl.handle.net/1839/7a0cc8f1-03e4-4f95-b129-2937691791e4>.

Synopsis

In this fragment, Ija Krivoschapkina tells about two events when a bear came to the reindeer herders' camp. The first happened in a place called *Daik*. She first explains the origins of its name, which was thus called in honour of a boy who died while hunting snow sheep. She goes on to tell about the visit of a big bear in the reindeer herding camp, which took place while her parents had gone back to fetch the load that had been left along the way (*iruŋka*) during the preceding day's migration. Fortunately, some men were able to shoot the bear before it did any harm.

The second event happened in a place called *Ku:nikit* (literally 'the place of screaming'). The dogs had been barking for several days without anyone paying much attention, until they noticed that a box with butter was missing from the supplies. They realized with a shock that this had probably been eaten by a bear. And indeed, the following night the camp was stampeded by horses frightened by the bear. The men, who had been particularly vigilant, immediately jumped out of their tents with their guns and managed to shoot it, even though it was a very dark night. Note that Evens tend to refer to bears by euphemisms (see Section 3.1); in Lamunkhin Even this is *abiga~abaga* 'grandfather'.

‘The grave of this boy is still (there), previously his clothes, his gun, everything was (there) they say, now it’s gone somewhere, someone (lit. ‘something’) took (them) or what, now they’re gone.’¹

¹The grave was a traditional Even grave on a high wooden platform, not a burial in the ground. That is why the grave goods would have been visible to people from the outside. Note that the sense has shifted – in Tungusic languages *mo:* generally means ‘tree, wood, firewood’ (Cincius 1975: 540-541).

 ‘They had left that somewhere close by.’⁵

³Here, Ija Krivoschapkina uses the indirect Narrative Past instead of the direct past tense form *ɲulgerit* to create the effect that she is telling a story rather than about a concrete episode that happened to her.

⁴The *iruŋka* is a part of the household load that is moved a few days prior to the people moving, if there is too much to move all at once, and that is left somewhere along the way.

⁵Here, the indirect Narrative Past expresses the fact that the speaker herself did not see where they left the load.

 было стада, седьмое стадо, Татьяна
 Петровна наверно рассказала, да?
 Есть местность с названием Даик,
 это моё любимое место, всё видно,

¹¹Autumn begins at the end of July. Eastern Even dialects have a term *məntɕɛ* to designate ‘early autumn’ as opposed to *bolo(ni)* ‘late autumn’, but in Lamunkhin Even *bolo(ni)* is now the general term for ‘autumn’.

биһин. Тйк-дэ тала бивэчэхмэм.

просторное, широкое место было. И сейчас хочу туда съездить.

Его рассказ такой. Был мальчик по имени Даик, парень. Чтобы накормить своих родных он залез на гору, на большую гору, на горных баранов пошел охотиться. Забравшись на гору, если рассказать покороче, он попал под снежную лавину или под поток грязи, в что-то такое попал, так и умер. Поэтому, говорят, по его имени назвали эту местность. Могила этого мальчика до сих пор есть. Раньше у него там была одежда, ружьё, всё у него было, сейчас это его куда-то делось, кто-то забрал или что, нету там сейчас. Только я наверно этого не видела, все люди это видели, эту могилу.

Ещё в этом месте, в этом Даике, были родные Анатолия Афанасьевича Алексеева, ты же его знаешь, бабушка Дуня, дед, старик Пётр. Очень был шутливый, смешной старик, всех шутя веселил, рассказывая о том, что не было, как вправду. Мы это считали за правду, верили. К этому старику, к своей матери, Алексеев приезжал.

Однажды так, что было, только что приехали на этот Даик. Назавтра мои мать и отец поехали за грузом, оставленным в пути. Где-то недалеко оставили, оказывается. Мы то-

Өмән укчэнэк:

гда с младшим братом играли на
реке. Вдруг, когда мы так играли,
мы долго не слышали, как эта ста-
рушка нас звала, эта бабушка Дуня.
«Идите идите», она по-якутски го-
ворила. Когда мы оглянулись, сто-
ит эта бабушка, мы пошли к ней.
Пришёл медведь в нашу палатку,
оказывается. Испугавшись, она по-
шла искать нас. Люди пошли стре-
лить этого медведя.

А мы, когда ушли наши родители,
с братом мы очень испугались, что
они наткнутся на этого медведя,
подвергнутся съедению, или что-
нибудь с ними там случится. Как
раз родные быстро вернулись. Уви-
дев этого медведя они вернулись с
дороги. Вернулись. Мы очень об-
радовались с братом, что родные
вернулись.

Потом пришли Алексеев с дедом
Петром. Этого медведя убили, ока-
зывается. Это был большой мед-
ведь. К счастью он не узнал, что па-
латки там стоят, палатки не узнал,
с его стороны ветер был, кажется,
он не взял запаха. А родные опять
пошли за этим ирунгка, за грузом.

В Даике так было. Это моё люби-
мое место, а ещё есть местность
под названием Куникит. Это тём-
ное, с густым лесом, хочется задох-
нуться. Очень там медведей много,
постоянно приходили медведи, ко-
гда мы там останавливались. Один
рассказ:

Тоже были дед Пётр и бабушка Ду-
ня. Их палатка стояла на краю стой-
бища. Целую ночь собаки не да-
ли спать, ихние собаки, несколько
дней, три дня где-то не дали спать.
Мы не обращали внимание, счи-
тая, что они наверно лают на ло-
шадей.

Через несколько дней вдруг они
увидели, когда они в своих вещах
начали копаться, не оказалось од-
ного ящика с маслом. Или полови-
на не стало, или совсем не стало,
короче, медведь съел, они так ре-
шили, по зубам или по другому,
как-то они узнали. Тогда был Ана-
толий со своими там, очень мы ис-
пугались. Мужчины сказали, «всю
ночь будем караулить, не будем
спать,» - сказали.

Потом, так в эту ночь пришли ло-
шади, по-настоящему пришли ло-
шади, чуть наши палатки не рас-
топтали, из-за чего-то они испуга-
лись, кажется. Узнав, мужчины на-
чали хватать свои ружья, начали
на улицу выскакивать. Перестрел-
ка - а будет ли перестрелка? - на-
чали стрелять, начали кричать, лю-
ди начали бегать. Мать, говоря нам,
чтобы мы не выходили, сама вы-
глядывает с палатки. Мы выгляды-
ваем тайком из окна. Люди бегают
в нижних подштаниках, с чем-то
ещё, как это называется, в портках,
некоторые в трусах, кажется, с ру-

үрүчүн, нуңалкаһал. Дьэ нуңат
дэлби нэмкэчэллэ.

Абигаккам ма́чал бичэл, көтлэккэн
абига, гиаванап-гу, гиавану ча́гарап-
ку хутэн бичэ. Тарав иттит мутэ,
тиманараптун. һа́таһри-киэ биһин,
долбу, иак-та эти ичур биһин. Бо-

ча́дьин игин, муданни бичэ́дьин.
Тачин оддин, гө, тарак.

жьями. Ружьями начали стрелять.

Маленького медведя, оказывае-
тся, они убили, маленький медведь,
или прошлогодный или позапро-
шлогодный детёныш был. Мы это
видели на завтрашний день. Бы-
ло очень темно, ночь, ничего не
видно было. Осенью было наверно.
Июль наверно заканчивался, был
наверно конец. Так кончился.

10 Bear / Медведь

I recorded this text on 17 March 2008 in Sebjan-Küöl in my landlady's house, with nobody else present in the room. The Cyrillic transcription was done by Ekaterina Shadrina, and the text was translated into Russian by Ija Krivoschapkina. This is practically the entire narrative as it was recorded, with only the last few sentences left out. The complete recording with full transcription, translation, and glossing can be accessed at: <https://hdl.handle.net/1839/ae11869f-bebb-4d6d-ad60-89ed270a9d65>.

Marta Krivoschapkina was 56 years old at the time of recording. After finishing school she had worked in the reindeer herd as a so-called *čumraboṭnica* (yurt worker). This is a highly important member of a reindeer herding brigade, since she is responsible for the physical welfare of the herders, taking care of all of the essential household activities in a reindeer herding camp: “They get up before everyone else and go to bed later than everyone. The yurt workers prepare food four to nine times per day, feed the herders and clean the dishes. In addition, they dry and repair the clothes, bake bread, and prepare wood, ice and water” (Okorokov 2013: 40, translation mine). They often also prepare hides and sew fur clothes and saddles (see Text 4 for a first-hand account of the life of a yurt worker).

Synopsis

This story captures very vividly what could happen on the long trek from the herd to the village when the children had to go to school. A bear came upon the overnight camp where the narrator, who was then ten years old, and her seven-year-old sister were on their own, while their father had gone to try and shoot a snow sheep. He came running and luckily managed to scare the bear away by setting fire to reindeer moss, but not before a very dramatic confrontation between the father and the bear across the campfire.

This narrative contains numerous examples of different augmentatives, notably the only examples in the Lamunkhin Even corpus of the finite Verbal Augmentative *-baha* as well as several instances of the Augmentative converb *-ja:ʃi*

(see lines 52 and 69 for examples of both forms). It also contains several examples of the Assertive mood borrowed from Sakha (Yakut) - see lines (47), (50), and (66).

Тарит бй нёву Кāча улгимидни: «Тарав амантй иами кўниддан, табар?» - гёһикэн. Бй буоллар: «Тёһ һанинтикин һйралча, уйам-

Однажды мы, мой отец, я и моя сестрёнка Катя - наш отец нас вёз в школу. Потом когда наступил вечер, когда стало темно, мы переночевали. Переночевав, когда мы вскипятили чай, мой отец взяв бинокль, целился на то-сё, к горам. Потом говорит: «Там на горе есть горные бараны» говорит мой отец. «Давайте я туда пойду, а вы здесь оставайтесь, туда поднимусь», сказал, «в горы». Мы сказали «ну да, иди».

Мы остались, а отец поднялся в гору. Мы пристально смотрели вместе с сестрёнкой, что он делает. Также пристально смотрели на горных баранов. Поднявшись к горным баранам, поднялся. Потом слышался его выстрел ружьём. А потом, кажется, промахнулся на горных баранов: вдруг видим, мой отец крича бежит прямо вниз с горы. Оо почему он бежит, мы удивляясь смотрели пристально вдвоём.

Тогда я была десятилетней, а сестрёнка Катя семилетней. Ну вот учиться в школу ехали. Ей было семь лет. Мой отец сильно крича бежит прямо вниз. Моя сестрёнка Катя спросила: «Наш отец, почему кричит вот?». А я: «Он рассердился на дух земли, не убив горного барана, рассердившись, вот сильно крича бежит вниз», я гово-

кам этиды мара, һираллиды табар дэлби кунинтакан һэргилэ тутэддэн,» - гөнэм. «Э-э,» гөнни тар. Дьэ көйөттөп: дэлби һэргилэ.

рю. «Да», сказала она. Ну смотрим, очень вниз.

Потом вдруг я посмотрела вниз по течению, туда. Посмотрю вниз, идёт медведь. Говорю сестрёнке: «Катя, вот идёт медведище,» говорю. Было наверно 50 метров. О-о, мы очень вообще испугались. Сестрёнка собралась плакать. Я говорю потом: «Не заплачь, если заплачешь он сюда придёт, нас увидит».

Наши олени лежат здесь тихо, у нас ещё собаки. Собаки тоже лежат. Эти заметят, вдруг они заметят, я испугалась про себя. Сестрёнке не сказала. А сестрёнка готова была плакать: «Туда вверх в гору убежим». Там виднелся кедровый стланик. «Туда убежим,» говорит. «Если убежим он нас настигнет, настигнув съест,» говорю я. Испугалась, собралась заплакать. «Не плачь громко, услышав сюда придёт,» говорю.

Мой отец сильно кричит, немножко вниз спустился. Вдруг увидев моего отца, этот медведище пошёл к нему. Он пошёл к нему, к отцу, не приходя к нам, пошёл к отцу, медленно. Пойдя, идя просто. А отец, когда этот медведище

граната,» говорю. «Ты не бойся,»
говорю.

Потом с отцом вдвоём этот медве-
дище так друг друга сделали. Вот
вдруг медведище, очень слышно
здесь, сделал «прт прт». Сделав,
так медленно так сделав, прямо
туда ушёл, откуда пришёл. Ушёл
туда, откуда пришёл, потом мы
очень смотрели. А отец бедный
очень жалкий пришёл, мокрый в
поту, который так льётся. А потом
сказал так: «О-о, чуть ли не случи-
лось несчастье,» сказал. «Да,» го-
ворим. Пристально смотрим туда,
куда идёт медведь. Мы сильно ис-
пугались, это мне в сердце сильно
ударила, поэтому до сих пор это
постоянно вспоминаю. Вот такой
рассказ.

⁵There doesn’t seem to be a specific term for ‘grandchild’ in Even (cf. Lavrillier & Matić 2024).

⁶Although the sheep all disappeared, they did manage to find some and shoot them, but it took some effort.

⁷Here, the Sakha attenuative *hin* ‘a bit’ gives a meaning not of ‘a little bit (of meat)’, but ‘barely, with difficulty’.

⁸The pack reindeer died because the load was so heavy, and also because it was a piebald, and those are weak, as are white reindeer.

В стадо ехали на оленях, приезжая осенью тоже на оленях, очень хорошо было так кочевать. Когда бываешь ребёнком бывает хорошо, а вот когда уже взрослый плохо, ругань, крики, и тебя ругают. Когда маленький, знаешь только как бы на верхового оленя сесть.

Однажды осенью мы домой в Себя́н едем, из стада. Когда мы ехали, вдруг, всю дорогу, по горе, кто-то такие нас сопровождают, за нами бегают. Я подумала что это олени, сначала. Эти мои вдруг оказались горными баранами.

Несколько сотен горных баранов, столько много, как оленьё стадо ходит, я впервые видела. Везде и всюду, всё горные бараны, все горы в горных баранах. Куда-то они кочевали. Впервые видела, только однажды видела, что горный баран так кочует.

В месте, где мы ночевали, мы не смогли их найти, они исчезли, то-

бивэчэддидьур. Бэриптэ уйамкал, өмэм-дэ эһэп бакра. Гө, идьэңгэлдэ гэрбэ, өссө аңааккалда гэрбэ бдни. Бөтүр абыга бичэ тарак, этикэн бичэ таракам, ньан куңалби һэрүг-гэрэн, һиэлби, школала һэрүггэрэн. Тачин дьёридьур һэрридьур дьёругу, адйв-гу, һойав эмиэ ма́ра, гө.

Эмиэ һин улдэв бакридьур һэбэңдулэ иһрит. Тарав таһагаһат бат-таһаһачантакаһал нэһилэ иһрап, өмэн инучэт көкэрэн игин һотарандула. Тара улдэһүр һимбйр эчэлти эмэнэ. Һёруку нодаридьур, амарра гадьип гөникэн, улдэмэку эмурит, өмэн һёруку нодаридьур оттон. Һан улдэв һимбйр эмэнит оттон тала аңааттаһүр төрлэ. Тёру чоңкаридьи, амму тала эмэнин. Тарит адй-гул инэни бридиы гэн-нэрин, эмурин тарит. Һёруку-дэ, улдэв-дэ. Тара.

гда как до этого очень много их ходило. Бараны исчезли, не одного не нашли. Ну, сделаем отдых, ещё (один раз) переночуем, решили. Тогда был дедушка Пётр, старик был тогда, тоже вёз своих детей в школу, своих внуков. Ну, вдвоём отправившись они двоих или сколько там, много добыли.

Тоже найдя мясо доехали до Себяна. Груз наш не могли навьючить (свободного места не было), еле доехали, один грузовой олень по дороге сдох. Это мясо мы всё равно не оставили. Просто выбросили вьюк (с вещами), что возьмём потом, только мясо привезли, один вьюк бросили. А остальное мясо мы оставили ещё раньше, на том месте, где ночевали. Вскопав в землю, отец туда положил. Через несколько дней он поехал за этим и привёз потом. И вьюк и мясо. Вот.

12 Stuck in the herd / Застряли в стаде

This was recorded on 19 February 2010 in Sebjan-Küöl by Natalia Aralova and myself. Raisa Alekseeva had come to the flat that we were renting, where she told several anecdotes from her own and others' experiences. She spoke for an hour in total, touching upon several different topics, and we immediately broke down the recording into several shorter pieces. The excerpt selected for the volume comes from the middle of the session. The text was transcribed in the Cyrillic orthography and translated into Russian by Ija Krivoschapkina. The recording of this excerpt with full transcription, translation, and glossing can be accessed at: <https://hdl.handle.net/1839/48257ba9-2b32-4953-a6ce-8a727c53b502>.

Synopsis

This narrative tells of the end of a summer that Raisa Alekseeva spent in the reindeer herd with her children and husband and of their troubles with returning to the village. After first waiting for a helicopter, they were told that this had been cancelled and that they should make their way towards the village by themselves – only to hear while they were on the way that the helicopter had come to the herd after all, but that they had missed it. The experience was made more arduous by the fact that a bear had eaten most of their food stores; in addition, the weather turned cold and it started to snow, but they only had light tents to sleep in. It was only after returning to the herd and waiting for several days that they were finally picked up and flown to the village, where the school year had already started. The anecdote thus sheds light on the way that traditional elements of the nomadic lifestyle (migrating by reindeer and horse, sleeping in tents, cooking over a fire) combine with modernity introduced during Soviet times, namely the helicopter that flies families from outlying reindeer herding territories to the village. The text contains several examples of the Necessitive borrowed from Sakha (Yakut); see lines (4), (6), and (18).

гда Уйбанчика не было. Аа, есть оказывается, был, маленький, трёх-летний. Анжелике семь лет, она должна была в первый клас поступить – нет, шестилетняя.

Этим летом за нами должен был прилететь вертолёт, мы этим летом ждали, всё лето ждали. Наступила осень. Когда наступила осень, «вертолёт вот летит, то летит», так сидим. Это у ручья по названию Лукин, во втором стаде. Так сидя сказали по рации: «Вертолёт-та не будет, двигайтесь, машина приедет отсюда». Продукты наши все уничтожил медведь, продуктов нету. Из маленького количества продуктов, это жалея, как во время войны, по одному по-маленьку сахар давая. Потом я сказала: «Из этого Лукина не выезжаете, подождём вертолёта». А бригадир – это старший брат моего мужа, Алексеев Иван – «Выезжаем,» – сказал.

Они поскакали, сзади мы поскакали. Мы должны доехать до местности Хэбэчэн. Они уехали, мы позже приехали. На перевале задержались, наступила ночь. Там переночевали. Летней палаткой, походной палаткой что-то делаю. Темнело, не одной звезды не видно, облачно.

В этой темноте наш отец разжёл костёр, дети поставили чайник, вещи сложили, покрыли, делая палатку,

каңур ӧникан, һукләһәпти иав иарап. Тала, тар ӧлбукә ойлин һалапанат даһрап, удан тикчин гӧникән. Куңалти дӧлби дьэбәмэлчӧл, дьэ һаһаһриду чайаңур һуйуттӧп. ехали?» - говорю. «Если бы мы бы-
ли в стаде, сейчас мы бы сидели в
Себяне.»

Сахар кончился, мяса нету, как
итальянцы кушали макароньы. То
немножко сахара, что было, я толь-
ко своему младшему сыну заме-
шивала. У меня есть несколько кон-
фет, по-одному даю. Как блокада
Ленинграда.

И туда поехать нету, выпал снег.
Когда говорит по радице, машина
не выехала. Потом Алексеев Уйбан,
его старший сын, младший сын,
и племянник уехали в Себян. Мы
там находимся. Они туда уехали,
мы в стадо вернулись. Это в пять
часов дня. В снег.

Место, куда мы должны поехать –
нужно подняться в гору. Так под-
нимаясь, моя лошадь здесь стояла.
Наш отец наверх заставил поднят-
ся. До стада добрались в два часа
ночи, в темень. Все вместе в их па-
латке заснули, в маленькой палат-
ке.

Встали утром. Наш Иван поехал в
амбар за продуктами. «Мы верто-
лөтом перебросили,» - сказали. Мы
палатку свою поставили. Потом он
приехал вечером. Бедные наши де-
ти, взяв свой мешок с сахаром, при-
шли домой и налив чай себе, чай с
сахаром сидели пили.

Тарит тар через илан инеңили, дигэн, ээ тунңан инеңили бөртөлөт-эт эмнэн. Даже миан инеңили эбит. Миан дыапкан сентябрду элэр эмнэп.

Потом через три, четыре дня, ээ, через пять дней прилетал наш вертолёт. Даже через десять дней, оказывается. Восемнадцатое сентября сюда приехали.

13 Aufeis / Наледь

This was recorded on 23 February 2010 in Sebjan-Küöl by Natalia Aralova and myself, in the flat we were renting. The overall recording is over 50 minutes long and touches upon various topics, which were cut into separate pieces in the field. This excerpt is taken from such a recording fragment from the beginning of the session and covers approximately two-thirds of the fragment. The text was transcribed in the Cyrillic orthography by Ekaterina Shadrina and translated into Russian by Ija Krivoschapkina. The recording of the fragment from which this excerpt was taken, together with the transcription, translation, and glossing can be accessed at: <https://hdl.handle.net/1839/4ebae6e0-0706-4369-a016-d00b67d7e256>.

Zoja Stepanova was 60 years old at the time of recording. She was a primary school teacher, social pedagogue (*socpedagog*) and leader of a children's folklore ensemble, *Merlenke*. She had studied in Saint Petersburg and is quite opposed to the mixing of Even and Sakha that characterizes current-day Lamunkhin Even, strongly favouring the use of Standard Even as a unifying speech form. She thus seems to consciously avoid Sakha borrowings in her speech and uses Standard Even forms like the adjective *aj* 'good' instead of dialectal *ibga* (e.g. line 33 of the text) and the Necessitive suffix *-nna* (see lines 3 and 4 of Text 14, "Hunting tradition") instead of the more commonly used form of Sakha origin *-iakta:k*.

Synopsis

This text provides a very vivid account of what can be involved when travelling in the traditional way by reindeer sled. Zoja Stepanova tells about a trip in winter from the village to the reindeer herd to visit her father. She was travelling with her younger brother and her sister-in-law when suddenly her brother's sled broke through *aufeis* (a thin layer of ice that forms when water flows over frozen rivers), landing her brother in water. Fortunately they had only just passed a tent along the way that was set up for travellers and were able to make their way back there, where they were able to dry their wet clothes at the fire.

The rivers leading to Sebjan-Küöl are notorious for their stretches of *aufeis*, making them hazardous to travel on (Figures 13.1 and 13.2). Truckers who make

the journey tend to travel in groups, so that they can pull each other's trucks out of the icy water when they break through the thin sheet of top ice.

Figure 13.1: *Aufeis* on the river leading towards Sebjan-Küöl

⁴Tabalax (Figure 1) is a mainly Sakha village in the Verxojansk district in which two Even families live.

⁵The precise relationship of the boy to Zoja Stepanova is actually unclear: *eken* ‘older sister’ refers both to ego’s older sister as well to the younger sister of one of ego’s parents (see the schemata on p.104 (Standard Even) and p.113 (Arka-Tompo Even, a geographically and linguistically close dialect of Lamunkhin Even) in Lavrillier & Matić 2024). While the term used to designate the offspring of ego’s older siblings is not known, *nə:* ‘younger sibling’ is the term used for the offspring of ego’s parent’s younger siblings. It is thus possible that the child was a cousin of Zoja Stepanova’s rather than her nephew.

 ‘Suddenly our reindeer stopped for some reason.’

⁸When it is very cold (colder than -40°C/-45°C) fog develops in settlements through the heat from the houses as well as from the smoke from the fires and exhaust fumes. In this case, however, the patch of thin ice and open water into which they rode would have been warmer than the surrounding air, creating fog.

Я вам сейчас по-эвенски расскажу.
Это было в 1975-ом году. Мы с бра-
том Афанасием и невесткой Еле-
ной ехали в стадо. Я на отпуск, что-
бы встретить отца, ехала.

Было очень холодно, не знаю, сколь-
ко градусов было. Чтобы не обмо-
розиться, я платком закрыла лицо,
чтобы только глаза видно были. Я
ехала позади, сама управляя оле-
нями. Передо мной ехал мой брат,
сзади было много нарт. На этих
нартах сидела невестка Елена. Это
жена моего старшего брата, Елена
Стручкова, она была из Табалаха.

Почему она сама не ехала, она по-
ранила руку. Когда она хотела при-
ехать в поселок - у меня был ма-
ленький брат, ребёнок старшей

сестры, они того воспитывали, мой брат (с Еленой). Сколько же лет ему было, четырёхлетний ребёнок. Он держа вот нож бегал и этим ножом что-то делал, когда она (нож) трогал, её рука вот так распухла. Она не лечила это в поселке, она поехала в стадо. Мы говорили ей, - «Лечись», - не смогли (уговорить). «Не буду», - сказала, - «Я там буду сама лечиться», - сказала.

И едем мы, я очень соскучилась по отцу, поэтому, чтобы быстро доехать, спешила. И там в Курунгнахе стояла палаточка. Это палатка, где люди ночуют. Во сколько мы доехали, в 7 вечера, когда закат - солнце заходило. Потом Афоня говорит: «Что мы будем делать, здесь ночуем или нет?». «Не будем ночевать», - говорила я, чтобы быстрее доехать.

Проехали, проехав в темноте, едем. Снизу, впереди, все в пару. Вдруг наши олени почему-то стали. Я подумала: «Почему встали?». Вижу, мой брат по воде ходит. Вода его посуда. Я, испугавшись, повязанные платки все развязала, так бросила. Елена туда вскочила, здесь находится, на льду стоит, крича. «На что кричит?» - думаю, из-за пара ничего хорошо не видно.

Оо, бй нэлэллэм, нӧч нэлэллэм, эрэ ноҗан туркин эчиккэкӧн лодка-мдас мэлумэчидни дьи, нӧву мӧлэ гиркачиддан. Мину җаттан, эрид-ни: «Эмн-и!» - эчин тийуми бӧт-тэн. Тала омкандула ойчиракат, Афо-ня ката, эчин, бӧкӧччӧнни эрӧнӧн иҗӧмдӧнӧн, айи-киӧ, эчиккӧккӧн ойчиракан эһни бакаркитта. Тарит ӧриһип палаткачандулӧр мучурап, мут.

Тала палаткала эмӧсирӧкӧт, гол-да иак-та ачча! Тйкӧрӧп бӧй таро-

Я испугалась, очень испугалась, и его нарты как лодка качаются, мой брат ходит по воде. Он меня зовёт: «Иди!» - и протягивает мне свой посох. Когда я пыталась взять его посох, весь посох скользкий. Не могла его вытянуть, сама чуть не упала в воду. «Уходи! Уйди отсюда подальше!» - сказал на меня, когда он сказал, чтобы я ушла, я назад, прямо назад, подвинулась. Когда я очень испугалась, Елена там крича стоит.

Еле-еле он так по нартам что-то де-лая (перепрыгивая), хорошо, что олени у него хорошие были. Если бы плохой олень был, там он бры-каясь Афоню заставил бы упасть. Олень его встал. Он сам почувство-вал, что плохо будет, если туда пой-ти. Такой олень бывает, сам по себе умный олень. К плохому не идёт.

Поэтому по нартам что-то делая вышли. Всё замерзло так, потом вернулись назад. А назад возвра-щаясь, посюда, не поехали по той дороге, по которой приехали, так по горе поднимаясь. Когда мы под-нялись в гору, у Афони вот так всё, что замерзло, так, когда он подни-мается, не скользит. Потом верну-лись к той своей палатке.

Когда пришли к палатке, ни дров, ничего нет! Современный человек

чин, «дбулэп бэй», - бйдэ амму гѳүнэрин - «ѳк-та ѳк-та палаткав тачин эһни эмѳнэр». Тала обязательно дъэблэкэкэн-гу бидьин, голу эчин итавридьур, ѳй-гул эрэ һэрэдникэн һатаралавридьи-гу иаридьи-гу бэй анһадын гѳникэн, һонтэ-дэ бэйу дьомкатти биһитнэн. Тикэрэп куһалдулат тарбачан ача.

Бй, дъэ голу дурурэм, тогу дурурэм. Афоня тэллэ оралби кандунами ньѳдни. Елена ѳалан бутѳнникэн дѳсчин. Бй тогу дуруридьи иаридьи, дъэ дъѳптѳп иав, иак биһин, олда консерва. Тарав дъѳптидьур һуклѳһнэ, бй долбанив коңдас эникэн һуклэрэ, эрэ тогу дурутникэн. Нѳву иадан гѳми, һѳтчѳ биһин, тиѳми дэрѳмкѳдэн, ноһан һѳттидьи эниллэкэн-гу иаракан-гу мут бэй этѳп ѳр гѳникэн, тарав мѳргѳтми эһѳм һуклѳһнэ.

Дъэ бадьикар ѳѳрилчѳлэн дъэ һэрѳһнѳп. Тали тар мѳли эһѳп һэррѳ, ѳгидѳ эчин, ѳгидѳлѳ һэрѳддѳп. ѳгилѳ һѳ кѳньѳли һѳтаран. Тарит ѳмнѳкэн тар һѳргѳһки тикѳддѳкѳт ньѳн оралти ѳн-гул иачалатнан, бй нѳйи буллидьи ноһантикийѳкин һѳрридьи, ноһандун тѳдичиссими бѳлѳссими иак турки һѳрдѳлин, чѳнам! Афанасий, - «Һѳрр-ѳ! Бугун ѳли, һѳрри! Бѳлдыһѳдѳк һй иак биһѳнни, урунья һѳрри»,- гѳнни дьи. Дъэ бй ньѳн амаһкийѳакѳки һѳррѳм.

такой, а «прежний человек» - мой отец говорил - «никогда палатку так не оставляет». Там обязательно будет еды немножко, приготовив дрова, что кто-нибудь проезжая, припозднившись, человек здесь ночует, о другом человеке думали. У современных детей такого (представления) нет.

Я дрова разожгла, огонь разожгла. Афоня вышел на улицу чтобы оленей своих кангдунать (чтобы привязывать кангдун). Еленина рука болела, она лежала. Я разожгла огонь, мы покушали, что было, рыбные консервы. Покушав они легли спать, я всю ночь не спав, вот огонь сжигаю. Чтобы мой брат отдохнул, он был уставшим, поэтому чтобы он отдохнул, если он устав заболит, что-то с ним случится, с нами плохо будет, об этом переживая не спала.

Когда рассвело утром мы поехали. Так по воде мы не пошли, поверху едем. Наверху очень плохая дорога. Потом вдруг внизу, когда мы спустились вниз, наши олени опять как-то что-то сделали, я пожалев брата прямо идя к нему, ему пытаюсь помочь, прямо под нарты прошмыгнула! Афанасий, - «Уходи отсюда в сторону! Чем помочь ты.... Что ты есть, иди». Я опять назад пошла.

Дъэ тачин, тачин хэрэһнит. Хэр-
рѳп, айи-киэ инѳ. Кѳллѳккѳн ньѳл-
тѳккѳн биһни, тали хэрѳдѳннѳп,
айи. Эртики хэрми дѳапки стадо
биһни, эртики миан ѳмѳни стадо.
Тала амму тар дигѳн анѳанилкан
хѳркѳчѳнньун дѳѳридыр-ньун би-
дыѳннѳ. Апкит бичѳ тара, хэрѳдѳн-
нѳп, айи-киѳ тикѳддѳп ѳчикѳн, тѳ-
ла апкит, ѳчин ичудни, балаткак-
кан дѳѳ ѳчикѳн, ханинчанни. Тру-
бадук ханинкакѳн, ѳчин тикѳпти,
ѳгдѳн тикѳпти биһни, тадук хѳр-
гили иттѳкѳт, ѳмѳн куѳаккан ньѳд-
ни, кѳллѳккѳн куѳаккан. Кѳйѳттѳн
муту, ѳли ичудни, иав-гул ирка-
дни, иркачалѳн амардадукун ам-
му ньѳйѳттѳн. Гудѳйѳ-киѳт, тар
иаһаллав ичудни, хѳвди ѳтикѳн,
ѳтикѳн ньѳн тар куѳачѳн. Би хѳч
ѳрѳлдѳрѳм. Тара.

Так поехали. Едем, очень хороший
день. Маленькое солнце есть, так
едем. Если сюда поехать, 8-ое ста-
до, сюда поехать 11-ое стадо. Мой
отец там находится вместе с четы-
рѳхлетним мальчиком. Там уще-
лье, едем, хорошо, спускаемся так,
там ущелье виднеется, палаточка,
и дымок. Из трубы дым, так спуск,
большой спуск ѳсть, оттуда вниз
когда смотрѳли, один ребѳночек
вышел, маленький ребѳнок. На нас
посмотрѳл, здѳсь видно, он что-то
крикнул, когда кричал, сзади вы-
шел мой отец. Очень мило, в гла-
зах видно, старѳй старик и ѳтот ре-
бѳнок. Я ѳчень обрадовалѳсь. Вот.

14 Hunting tradition / Как стать хорошим охотником

I recorded Zoja Stepanova, with whom I had been staying for several weeks, on 16 March 2008. She spoke for about 15 minutes and touched upon various topics that were transcribed separately. This text is the third fragment; I transcribed it, and Ija Krivoschapkina checked the transcription and provided the Russian translation. The recording of this fragment with the transcription, translation, and glossing can be accessed at: <https://hdl.handle.net/1839/b366667b-f2d6-42ce-99b2-dcfddf821ed9>.

Zoja Stepanova was 58 years old at the time of recording. As mentioned in the introduction to Text 13, she is quite opposed to the mixing of Even and Sakha that characterizes current-day Lamunkhin Even and strongly favours the use of Standard Even as a unifying speech form. She fairly consistently uses Standard Even forms like the adjective *aj* ‘good’ instead of dialectal *ibga* (line 3 of the text) and the Necessitive suffix *-nna* (lines 3 and 4 of the text) instead of the more commonly used form of Sakha origin *-iakta:k*.

Synopsis

This short text contains a little anecdote about how the speaker’s younger brother had twice as a child tried to observe the custom of sharing his first hunting spoils with a respected older visitor. Unfortunately, this visitor got startled at the touch of the dead animals (first a bird and later a tarbagan marmot) and dropped them both times – much to the dismay of the little boy, who was worried that her behaviour would jinx him (*majukan-*). The text also contains interesting information about the traditional Even system of avoiding respected people’s names and teknonymy.

‘My grandmother, my mother’s older sister, we used to call “mother of Dunja”, “mother of Nikifor”.’⁴

²In Tungusic kinship systems, older siblings of ego’s parents and ego’s grandparents are designated with the same terms (*upe:*, *abaga*), whereas younger siblings of ego’s parents are designated with the same terms as those for ego’s older siblings (*eken*, *akan*; cf. Lavrillier & Matić 2024: 104-106). Hence the terms used to address older people are ambiguous, although the best equivalents in English are probably ‘grandmother’, ‘grandfather’, ‘aunt’, and ‘uncle’.

³Note that the Accusative case marker and the 1SG Possessive are conflated in the form *ammu* ‘my father’.

⁴See the note for line (11) for why the mother’s older sister would be designated with the term for grandmother.

знали её имени, вырастя только
мы узнали её имя. У нас, у эвенов,
старых людей по имени не назы-
вают. Скажут «бабушка», скажут
«дедушка», скажут *акā* (дядя), *экэ*
(тётя). И старые люди не называют.
Моего отца например так называ-
ли, «отец Агафы», по старшему
ребёнку. Мою бабушку, старшую
сестру матери, называли «мать Ду-
ни», «мать Никифора». По соб-
ственному имени не называют.

Потом мой брат, убив птицу *недлен*,
уделил этой своей бабушке. Она
сидела в доме, эта бабушка, к нам
пришла в гости. Когда он дал со
словами, «бабушка, на!», схватив,
когда она схватила это было *болда-*
ку (неприятно на ощупь), на это ис-
пугавшись, сказав «опопоп», бро-
сила на землю. Потом мой брат ни-
чего не сказал.

Потом позже, опять что-то убив,
убил то ли тарбагана (горного сус-
лика), то ли что. Когда вот попы-
тался дать бабушке, когда, опять
схватив, испугавшись «опопоп»,
бросила. Так говоря «Я сейчас ба-
бушке не буду уделять добычу, ба-
бушка меня сглазит, она, когда че-
ловек пытается уделить ей добы-
чу, схватив пугается». На это мои
родные очень, и мать смеялась, и
эта бабушка смеялась. Несмотря на
это, этот мой брат, став взрослым,
был хорошим охотником на горно-
го барана, на тарбагана.

15 Good fortune / Счастливая прогулка

For details about the recording and the speaker please see the introduction to Text 1. The complete recording with full transcription, translation, and glossing can be accessed at: <https://hdl.handle.net/1839/7a0cc8f1-03e4-4f95-b129-2937691791e4>.

Synopsis

In this excerpt, Ija Krivoschapkina tells how she and her family went out for a walk in a place called *Ku:nikit* (see Text 9 for another episode that took place there) during her father's day off and unexpectedly came upon two snow sheep. Her father was able to shoot both of them, providing the children with such rare delicacies as the eyes and the raw fat from the back of the head. They took the intestines and liver back with them to camp that day and feasted upon their return, and went back later to fetch the meat. This episode took place in the early 1990s, after the collapse of the Soviet Union, when products and especially meat were scarce. Obtaining so much good meat at once was indeed a stroke of extremely good luck.

Хэррəп дивнидьур: бй, амму, нəву, эйму ǫникан. Ибга-киэ урэкчэндэв ойчирап, нǫчэл дэлби тутэнэддэп тали эбинтэкэн, иав-гол нэкэддэп.

Был день, когда отец отдыхал от своей смены. В этот день, чтобы просто так не лежать, мы решили пойти посмотреть этих горных сусликов. А у отца только большое ружьё, карабин. Как мы собирались большим ружьём стрелять этих тарбаганов? - Наверно взяли просто так, на всякий случай. Ну, пошли гулять, и тарбаганов тогда не было, кажется.

Пошли вчетвером, я, отец, младший брат, мать. Поднялись хорошо на гору, с братом вместе вот бегаем играя, что-нибудь делаем.

- Эгдэмэйэл биһэп, эһэп-дэ эбид-дэ оттон, иав-гол нэкникэн гирка-вачаддап дэлби, тутэнэддэп игин, дэлби гиркавачаддап, һэйелин. Өм-нэкэн тарит айукайа олукаду ам-му гөнни: «Эдьилдэ, һагара, эдьил-дэ иар, дэссиһилдэ,» - гөнни. Дэс-сиһнэп. «Ичэлдэ,» гөнүнэн, «һэрги-лэ ичэлдэ,» - гөнүнэн. Иав-да эһэм иткэрэр бй. Иак биһни? гёми мэн-дэчэссиврэм, мэндэчэссиврэм.

Тар айукайа иттэку, дьёр анаһма-йал тогачадда, уйамкамайал, анаһ-майал тогачадда. Элэкэс иттэм тар-бачан чугастук анаһу. Дэлби миа-нам. Амму оттон карабиндбай ну-гаһайдага дй. Нугаһнидбы дьёри-кэмүтнэн макаттин, кэнтэрэкэмин нэмкэрин.

Һөкөһнидьур аталлап, дэлби өрэл-дэрэп, гөдөмөкэн иһмэбэн амму дьэбукэнни, иаһалбан-да дьэптит үрүчүн. Дэлби өрэлдэрэп. Оттон он мэндьур тарав һэрудьип ул-дэвэн, ургэ-киэ буоллага, гёлиэ. Чалмиван-һун һэргэлдэ гэрбэ ьд-ни, дёван: тар һакман, миавман игин һэругэлдэ гэрбэ ьдни.

Ургэ-киэ биврэчэ эбит тар чалмин-да, иан-да. Дьин нэйилэ дьуләр, балаккалар иһрап. Инэһ һэррит, ньёлтен биһиһин, долбу вообще, һатараладдакан, долбу-да эһни биһэ, дьапканду-гу уйунду-гу иһрит. Дал-да-киэ чалмив ирирэп, долбаниһ-ман тараһур дьэптэп.

- Мы уже большие, мы не играем наверно, что-то делаем, ходим, бе-гаем, ходим по верхушке горы. Од-нажды потом вдруг неожиданно отец сказал: «Не делайте чего-то там, тихо, ложитесь,» сказал. Лег-ли. «Смотрите,» говорит, «вниз смотрите,» говорит. Я ничего не ви-жу, Что там есть?, ищу, ищу.

Потом вдруг вижу, два самца ба-рана лежат, большие горные бара-ны, самцы, лежат. Впервые я ви-дела с такого близкого расстояния самцов. Очень удивилась. Отец ко-нечно же вынул свой карабин. Вы-нув, обоих застрелил, прямо в туло-вище застрелил.

Спустившись мы их освежевали, очень обрадовались, жир на затыл-ке отец нам дал попробовать, ка-жется даже и глаза мы ели. Очень обрадовались. Как мы это сами можем унести, мясо очень тяжё-лое, конечно же. Мы решили взять только вот внутренности: печень, сердце решили взять.

Очень тяжело бывает, оказывает-ся, внутренности и другое. Еле до-брались домой, до палатки. Мы ушли днём, когда солнце было, и ночью, вообще когда темнело, да-же не ночь, где-то в восемь, девять часов пришли. Очень вкусно при-готовили внутренности, на ночь глядя это ели.

Тиэми аһи буйусэ́кту кэ́ньэли гэр-
бэ иак адьит эһи биһэ эбит, аһи
биһэкэн наоборот ибга биврэчэ
үрүчүн дьомкаккара́рам. Иак-та
мэһэйэн ачча биврэчэ.

Тар Кү́никит гэрбэ төрлэ бичэ. Ибга-
киэ төрэлкэн стадо биһин, тар на-
ды стадо. Тйк-тэ тала бивэчэһмэм.
О́к-кул бивэтчим-ту, гө. Тара.

Поэтому вот, то, что женщина в
охоте плохо, это не правда, я ду-
маю, что наоборот бывает хорошо.
Никакой помехи в этом нет.

Это было в местности Куникит.
Очень с хорошими местами бы-
ло вот это седьмое стадо. И сейчас
хочу туда съездить. Ну, наверно
когда-нибудь съезжу. Вот.

Part III

Bystraja Even texts / Быстринские тексты

Geographical information

Several of the texts evoke earlier settlements, such as Tvajan (Text 1, Text 7, or Text 8), Laučan (Text 6), or Bystraja (Text 8). Others evoke rivers, such as the Icha (Text 10), the Ketačan (Text 7), or the Managič and the Oblukovina (Text 11). Unfortunately, it was not possible to map all of these, but Figure 1 gives an indication of the location of the settlements. It shows how far schoolchildren had to travel at the beginning and end of every schoolyear between their home village (Laučan in Text 6, Tvajan in Text 7) and the boarding school in Esso.

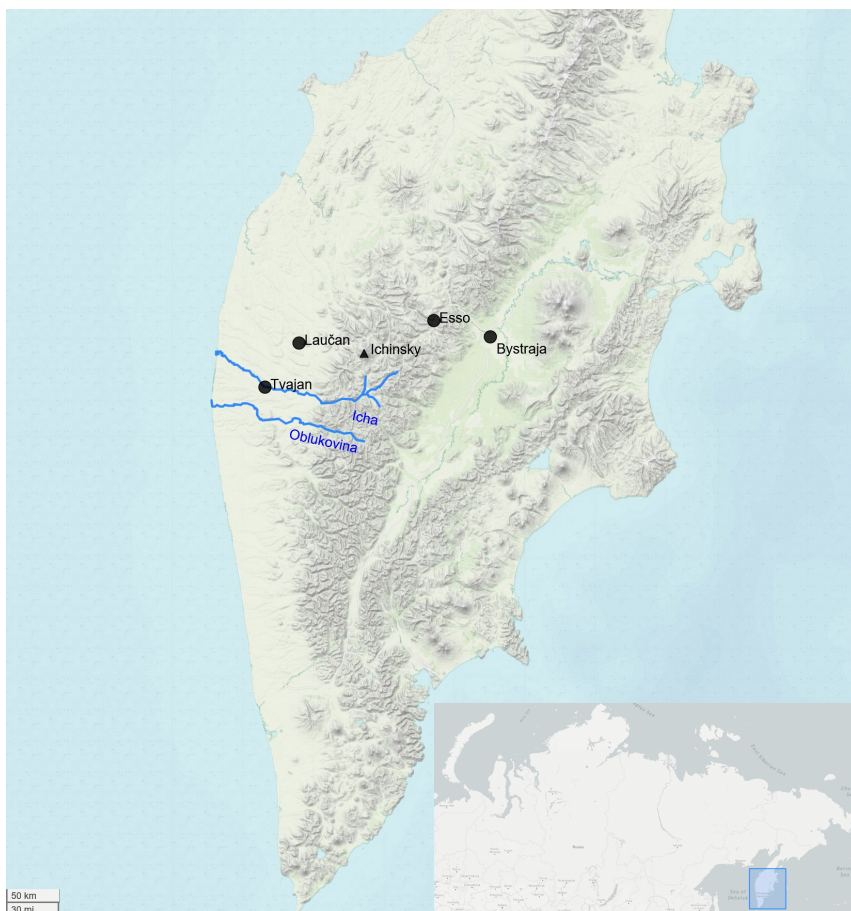

Figure 1: The location of some settlements and rivers mentioned in the Bystraja Even texts; the triangle indicates the location of the Ichinsky volcano (referred to in Text 7, 36). (Leaflet | Map data © OpenStreetMap contributors, CC-BY-SA, Imagery © Mapbox)

Введение к текстам

В эту часть книги включены рассказы, записанные в разные годы в посёлках Эссо и Анавгай Быстринского района Камчатского края. Рассказы, записанные в Якутске и в посёлке Себян-Кюёль Кобяйского улуса Республики Саха (Якутия) помещены в часть II. Тексты представляют два существенно различных говора эвенского языка, быстринский и ламунхинский.

Главной целью книги является ознакомление лингвистов с эвенским языком вообще и с этими двумя говорами в частности, поэтому основную часть каждого текста составляет лингвистическая расшифровка латиницей с переводом на английский язык каждого предложения и морфологическим разбором эвенских форм (так называемым морфологическим глоссированием). Но чтобы эти интересные и богатые подробностями традиционного быта рассказы стали доступны и самим эвенкам, за лингвистическим разбором следуют эвенский текст в орфографии, употребляемой моими консультантами при расшифровке, с параллельным переводом на русский язык.

Важно отметить, что это устные рассказы. Поэтому они могут содержать повторы, оговорки, якутские или русские вкрапления. Этим они отличаются от более привычных читателю письменных текстов, где автор имеет возможность обдумать каждое предложение и отшлифовать свой рассказ. Насколько могла, я исправила оговорки и устранила повторы, а в некоторых случаях переставила предложения таким образом, чтобы рассказ получился более связным. Тем не менее рассказы стилистически носят именно устный характер.

Некоторые рассказчики говорили долго и затрагивали разные темы. В таких случаях я выбрала те части их рассказа, которые больше подходят к тематике книги (традиционные занятия эвенов – особенно оленеводство и охота, на Камчатке также рыболовство – которые казались мне наиболее интересными для западных читателей). Такие части я включала в книгу как отдельные тексты. Поскольку я старалась представить рассказы так, чтобы они составляли тематически связную последовательность, в некоторых случаях части одной и той же записи оказываются разделены и сгруппированы с другими рассказами.

Краткий обзор быстринских текстов

Тексты Евдокии Григорьевны Адукановой («Жить с оленями» и «В школе») и её сына Артёма Николаевича Солодикова («Охотник») были записаны мной и Наталией Араловой в июне 2009-го года на рыбалке на реке

Маныч. Запись Евдокии Григорьевны была расшифрована мной при участии Елены Николаевны Черкановой; перевод был сделан Еленой Николаевной и Риммой Максимовной Егоровой. Эта запись доступна по ссылке <https://hdl.handle.net/1839/4089b186-d7d0-4e88-b8c0-570e52c29db5> в записи латиницей и сопровождается английским и русским переводами.

Запись Артёма Николаевича была расшифрована Наталией Араловой с участием Елены Николаевны Черкановой, которая сделала и перевод на русский язык. Этот текст в записи латиницей и с английским и русским переводами доступен по ссылке <https://hdl.handle.net/1839/92a55473-e864-4ce7-8b3d-9908ac2617a6>.

В первом тексте («Жить с оленями») Евдокия Григорьевна описывает свою жизнь в табуне. Отец выдал её за оленевода, когда ей было шестнадцать или семнадцать лет. Она рассказывает о том, как долго она ехала к мужу и как затем вместе с ним работала сначала оленеводом, а потом чумработницей. Во второй части записи («В школе») Евдокия Григорьевна рассказывает про свой первый год в интернате в Эссо, где она страшно скучала по отцу. В конце учебного года детей на оленях развезли по домам. Дома Евдокию Григорьевну утешали лакомствами - *нялакчой* (сырые, мелко нарубленные внутренности) и сушённым мясом *ылты*.

Артём Николаевич рассказывает про охотничью жизнь. Зиму он проводит на охотничьем участке, добывая пушнину, которую он сдаёт в Госпромхоз. Летом он работает в Госпромхозе на строительстве домов и занимается рыболовством. Для этого он в основном употребляет вершу (*катэн*) и сеть, но иногда ловит и мариком.

Текст Пелагеи Михайловны Банакановой («Детство в табуне») был записан мной в Эссо в июле 2009-го года; расшифровала его тоже я. Расшифровка проверена с Риммой Максимовной Егоровой, которая сделала и русский перевод. Весь рассказ в записи латиницей и с английским и русским переводами доступен по ссылке (файлы с названием PMB_childhood): <https://hdl.handle.net/1839/4446755b-c35a-46e4-8ad6-e31e1e4812fd>.

Пелагея Михайловна рассказывает про своё детство в табуне, где она с двенадцати лет помогала родителям, выпасая оленей с отцом и братьями и выделывая шкуры и занимаясь шитьём с матерью. Жизнь была трудной, но хорошей.

Рассказ Геннадия Афанасьевича Солодикова («Работа оленевода») был записан мной и Наталией Араловой в июле 2009-го года в оленьем стойбище в Срединном Хребте. Запись расшифрована и переведена на русский язык Риммой Максимовной Егоровой. Она доступна по ссылке (<https://hdl.handle.net/1839/4446755b-c35a-46e4-8ad6-e31e1e4812fd>):

//hdl.handle.net/1839/0fff3edb-0b03-493e-8d1f-d4b8e764fc6d) в записи латиницей и сопровождается английским и русским переводами.

В своём рассказе Геннадий Афанасьевич описывает, как пасут оленей быстринские эвены. В отличие от ламунхинских эвенов, они уже не ездят на оленях, а пасут пешком, пригоняя табун к стойбищу на время обеда.

Тексты **Валентины Иннокентьевны Ахметовой** были записаны мной в Анавгае в июле 2007-го года; расшифровала их тоже я. Расшифровка была проверена с Валентиной Иннокентьевной, она же перевела рассказы на русский язык. Запись оказалось достаточно длинной (26 минут) и была сразу разделена на несколько тематических частей, две из которых публикуются в этой книге. Эти две части в записи латиницей и с английским и русским переводами доступны по ссылке: <https://hdl.handle.net/1839/b1163a38-8d3f-4abf-b1df-bd4d6b4afc91> и <https://hdl.handle.net/1839/3ce5ca96-1e58-43e6-ad43-14fdab81d8d7>.

В первом рассказе («Работа чумработницы») Валентина Иннокентьевна описывает работу чумработницы. Зимой бывало полегче, так как табун долго стоит на одном месте, а летом нужно перекочевать каждые три дня. Она всегда старалась готовить вкусную еду для оленеводов, включая пельмени, плов, а однажды даже холодец из оленьих копыт. Во втором, более коротком тексте («Хранитель оленей») она рассказывает про свою невестку, жену старшего брата, у которой была шаманская кукла, оберегавшая оленей от опасностей во время остановок в кочёвке.

Текст **Раисы Максимовны Солодиковой** («Воспоминания про детство») был записан мной в Анавгае в июне 2009-го года и расшифрован Наталией Араловой при участии Риммы Максимовны Егоровой, которая сделала и русский перевод. Запись длинная (почти 30 минут); в книгу включены лишь те отрывки, которые наиболее подходят к общей тематике книги. Чтобы рассказ получился более связным, некоторые предложения переставлены. Весь рассказ в записи латиницей и с английским и русским переводами доступен по ссылке: <https://hdl.handle.net/1839/764a1d1c-d40b-4863-86a9-42f711bea656>.

В начале текста Раиса Максимовна вспоминает про своё раннее детство, когда она жила в табуне со своими родителями. Когда ей было примерно шесть лет, семья переехала в Тваян, где Раиса Максимовна впервые увидела (кусковой) сахар, сухофрукты и яблоки. По окончании тваянской начальной школы дети должны были учиться в интернате в Эссо. Путь из Тваяна в Эссо и обратно проделывали на лошадях, мимо Ичинской Сопки и через табуны, где оленеводы угощали детей свежей оленьиной. Ехали очень долго, от пяти до двенадцати дней. А летом вся семья перебиралась

на рыбалку, где заготавливали много рыбы, по большей части на корм собакам.

Текст **Риммы Максимовны Егоровой** («Транспорт до появления машин») является отрывком более длинного рассказа про её жизнь. Он был записан мной в Эссо в июне 2007-го года, расшифрован Алексеем Евстроповичем Ичанга и переведён самой Риммой Максимовной. Весь текст в записи латиницей и с английским и русским переводами доступен по ссылке: <https://hdl.handle.net/1839/18dea9b9-8130-49b0-b7cb-28568a0410a3>.

В этом отрывке Римма Максимовна описывает, каким образом перемещались в Быстринском районе до появления машин. Зимой и продукты, и людей возили главным образом на собаках, летом на лошадях.

Тексты **Наталии Александровны Тылкановой** были записаны мной в июне 2009-го года в Эссо; расшифровала их также я. Расшифровка проверена с Риммой Максимовной Егоровой, которая сделала и русский перевод. Наталия Александровна рассказала несколько отдельных историй, из которых в книгу включены две. Эти две истории в записи латиницей и с английским и русским переводами доступны по ссылкам: <https://hdl.handle.net/1839/027850b3-7d02-4f5e-a65d-181bb78ac895> и <https://hdl.handle.net/1839/bf99b745-98f9-47b9-8b1c-21ed3e461146>.

В первом тексте («На рыбалке») Наталия Александровна рассказывает, как она в детстве жила на рыбалке со своей бабушкой и еще одной пожилой женщиной. Целыми днями они заготавливали рыбу. К досаде бабушки еще одна жившая там женщина, полуслепая старуха, никак не помогала, к тому же каждый вечер она где-то пропадала. В конце концов Наталия Александровна рассказала бабушке, что старушка проверяет напластанную рыбу в дымокуре.

Во втором тексте («Голубоглазый») она рассказывает, как однажды на рыбалку приехал сосед из посёлка, который её сильно удивил своими голубыми глазами – она даже не могла поверить, что он такими «бусинками-глазами» мог что-нибудь видеть.

1 A life with reindeer / Жизнь с оленями

This recording was made by Natalia Aralova and myself on 18 June 2009 in a traditional homestead (*rybalka*, i.e. fishing camp) on the Managič river (*Manyč* in Russian) in Central Kamchatka. Evdokija Adukanova and her partner lived year round in the homestead together with her three sons (a fragment of a narrative by one of them, Artëm Solodikov, is included in this volume, see Text 11), a granddaughter of hers, as well as various (great-)grandchildren of pre-school age. In the summer, the camp filled up with further children of school age. The recording took place in the traditional yurt (visible in the background in Figure 3.1 in Section 3.1), where Evdokija Adukanova and her partner live. This was the focus of the camp's life in summer, being the kitchen, dining room and living room.

I transcribed the recording and verified the transcription with Elena Čerkanova, Evdokija Adukanova's daughter, who also provided a first translation into Russian. A second Russian translation was provided by Rimma Egorova. This is the first part of Evdokija Adukanova's narrative; the second part is included below in Text 6. The complete recording with full transcription, translation, and glossing can be accessed at: <https://hdl.handle.net/1839/4089b186-d7d0-4e88-b8c0-570e52c29db5>.

Evdokija Adukanova was nearly 77 years old at the time of the recording. She had four years of schooling and had worked as a reindeer herder and yurt worker (*čumrabotnica*) all her life.

Synopsis

Evdokija Adukanova tells how she left to get married when she was 16 or 17 years old. She first had to travel by dog sled from her parents' home in Laučan to the village called Tvajan (Figure 1), where she waited for the reindeer herd that she and her future husband were going to join to come by on their migration route. She then spent many years in a reindeer herd, working first as a reindeer herder and later as a yurt worker, always travelling by reindeer. When she wasn't

looking after the reindeer or cooking pots of food for the herders, she would prepare hides and sew traditional Even leather and fur clothes.

⁴At this point in time Evdokija Adukanova was not married yet.

⁵Semën Čerkanov was the leader of one reindeer brigade, Barkavtov the leader of a different brigade. It is likely that her future husband was a herder in Barkavtov’s brigade, since he later went to this brigade to fetch riding and pack reindeer (see line 22). So she would have met him only at this point, and the two of them then joined Čerkanov’s brigade.

⁶This would have been in the late 1940s.

Жить с оленями: Текст по-эвенски с русским переводом

Би тэлендим он биддыву орду, он
 би этикэңнеддыву.

Я расскажу как жила в табуне, как
 я выходила замуж.

Акму мину буддын. Би оҕника-
 кан урриву, этикэңнериву. Евстап

Отец меня отдавал. Я плача уехала,
 вышла замуж. Евстап Степанович

¹³ *Esemdetit* here gives a meaning of ‘I am not afraid of doing anything, I do everything’.

Степанович гырбы эмнин как раз, гадинин. Нян уридянниву. Урриву нян икутич җиндашниву. Гор уиндаддывун, апрель аткикам. Нян җындиву Тваяндула. Таду биддыву, пока биддыву, Тваянду.

Июнеле орымҗыл нулгыритын Ичча бардалан Тваянду. Ньягич эрыгыр орыр нулгыддытын. Нонын Семён Черканов биче нулгырин, би тала җындиву. Таду гургавчидиру. Потом тадук Бэркэвутче нян нулгыритын, амалтаткан нулгыддытын. Няныши темуёддытындэ Тваямҗил. Мэнткылтын ортын оя бишин уныт тарыкым. Мэр ормур темуёддытын оя бэй. Челябин му-дакритын, темуёддывыр оддытын нян нуддывыр кимэдиллуши.

Элыкышкылды нудми би мурыныч бадушниву. Мурыныч нулгыдилливу. Нян уринивун. Тымин нян тарак мин этикэму этикэҗичеву гадириныши второй табунтыки Бэркевуттыки учақылҕавыр, инучылҕавыр, и учаққакуда. Бу орыныч-э нулгыдиллу. Нян бадушниву. Бадуриву. Орынду элыкыш урриву, учақту. Нян аич нулгыриву, ычивудэ эткэтты, бадуриву орынду. Эрыгыр эрыгыр, нян тачин авқариву эрыгыр орыныч нулгыдэи. Инучелбудэ семь голов, и учаку – дяпкиву. Аич нулгыддыву. Нян тар эрыгыр, эрыгыр, эрыгыр нудду чашки, нулгыдилливу.

как раз приехал, забирал. И поехала и плакала. И уехала прямо на собаках. Долго ехали, в апрель месяце. И приехала в Тваян. Там была, пока, в Тваяне.

В июне оленеводы перекочевали на ту сторону Иччы, к Тваяну. Снизу олени кочевали. Сначала Семён Черканов прикочевал, я туда пошла. Там будем работать. Потом оттуда Баркавтовы прикочевали, друг за другом кочевали (одно звено за другим). Потом забивали те, кто жил в Тваяне. В те времена много было своих частных оленей. Своих оленей забивали многие люди. Всё закончили, забой оленей закончили, потом готовимся кочевать.

Когда первый раз стала кочевать, я на лошади поехала. Начинала кочевать на лошади. Потом оставились на стоянку. И завтра вот этот мой муж, за которого я вышла, наконец-то поехал во второй табун к Баркавтову за ездовыми, за грузовыми и мне ездового. Я стала кочевать на оленя. И поехала. Ехала. На оленя села первый раз. Потом ехала хорошо, не падала, ехала на оленя. Всё время, всё время, так привыкла всё время кочевать на оленя. Вьючных семь голов, и мой учак восьмой. Хорошо кочевала. Всё время кочуем дальше, я стала кочевать. И привыкла быть в

Нян би авқариву орду биддэи. Ае орду бишин, ае умыкич.

Элыкыш ордула одми, третий пастушка бишиву. Ортыкида эрыгыр нян, раз говорят, нян орроттымда ортыки. Урекчендули ойчикатчоттым, урекчендули. Ортыкида орроттым бадикар, коятневаттым. Эүенэваттым, говатты «Ортыки урли», нян орроттым. Нян тымингыл дюдэ бидми, эчин ајанисчиддэттым, кочаиддэттым, скоблилиддэттым. Потом и ајандыву, би тарықым уже мэнкэнэй ајандыву гекив. Унтагаида, эвригэидэ ајанноттым, всё. Нян ајандыву челяван, олерымдэ екев.

Потом урритын нян ноңуртыныши селотки. Мину умыккэн эмэни-тын. Умыккэн нян, всё равно уже амалқариву челяван ныктэи. Ајандыйигылда, мэн эрыгыр ајанноттым. Умыккэн, челяван мэнкэнэй ныккоттым. Дяпкан нюлэк аңуыну бишин. Сентябрьла мэн полный дяпкан нюлэк аңуыну одын. Ајанноттымда, ишудэ эрыгыр кочайрымда. Эрыгыр орду одыву, эрыгыр нулгываттым орыныч. Ычиву гору туркучидды орынду, элыкыш орду бими. Нян эрыгыр аич одыву.

Потом ывгилэ нян ывышки эрыгыр, совсемь эрыгыр, чумработни-цада одыву. Эрэк екев элэ кимдэи, пастухалда дебдэтын. Эммотты пастухал, нян эйду уличимэлчи-рым. Алықалбида сразу аврым, че-

табуне. Ой, хорошо было в табуне.

Только что стала в табуне жить, была третьим пастухом. Всегда в табун, раз они говорят, иду в табун. По горам поднимаюсь. В табун ходила утром, смотреть. Ходила смотреть, говорили "иди в табун" и я шла. И вот завтра, дома будучи, шью что-нибудь, шкуру скоблю. Шила, тогда я уже сама шила всё. Унты, меховые чулки шью, всё. И шила всё, и сварила еду.

Потом они уехали в село. Меня одну оставили. Одна, всё равно научилась все делать. Шитьё своё, я всё время шила. Одна всё сама делаю. Мне было восемнадцать лет. В сентябре полные восемнадцать лет стало. Шью и шкуры выделяю. Всё время в табуне стала жить, постоянно кочевала на оленях. Я не долго ничего не умела делать, только начала жить в табуне. И всё время стала хорошо (жить в табуне).

Ближе к этим годам стала чумработницей. Готовила пастухам кушать. Приходят пастухи, я их быстро кормлю. И тарелки сразу мою, всё, в то время делая хлеб. Потом когда хорошо я научилась, ничего

ляван, челяван, хлебиґникэмэкэн. Потом ылкан амалқариди ышым-дэтит, гекив нэндекэвдэ кочайрым аҗандаи. Пастухыңылбидэ тэтудэи унтағатын кочаййоттым, аҗанноттым. Нян тары.

я не боюсь делать, всякое, и кухлян-ку скоблю, чтобы шить. Я своим пастухам, чтобы они одели торба-за, скоблю и шью. Вот и всё.

2 Childhood in a reindeer herd /

Детство в табу́не

I recorded Pelageja Banakanova on 13 July 2009 in Esso and transcribed the recording in 2016. Rimma Egorova verified the transcription and provided the Russian translation. The fragment included here is the beginning of the recording; after about seven minutes Pelageja Banakanova switched to Russian, so the text ends somewhat abruptly. The annotated recording can be accessed at: <https://hdl.handle.net/1839/4446755b-c35a-46e4-8ad6-e31e1e4812fd>.

Pelageja Banakanova was 68 years old at the time of recording. She had six years of schooling and after that worked in the reindeer herd with her parents.

Synopsis

Pelageja Banakanova tells about her childhood and adolescence, which she spent in a reindeer herd together with her parents. Since there were too few herders for the number of reindeer, she started to work from age 12. She helped her father herd by day, learning everything about reindeer, but she also helped her mother prepare hides and sew. Even though they didn't have much to eat, and even though they migrated all the time, she considers that life in the herd was very good, and would like to go back if only she were younger.

Теми амалқариву гургавчидэи, челявантэ гургав арым. Рыбалкалэ эрыгыр бишиву ынтилнуми, былливу челялантэ гургалэ.

Табычыши ордуши эрыгыр акнуми кусчириву орылбы. Эрыгыр кусчириву, минду ай бишин былдэку орду. Челяван орылбы ашукут амалқариву. Нонын туркуттиву, няи амалқариву, каждый орымгырбывутындэ. И орылды иррочимкэ оңқыватта, як ороту нёчев иррочим, челяван амалқариву.

Кусчидэи аймакан, тармы ычиву явчир. Агдывуткан нуву явчирин акнуму. Тарыкым абылта бишин. Орбун оя бишитын, а абылта (бэил). Акму явчирин агдыгнуму долбы, а миннун иныһон кусчирин. Ыкмуныши дюла биддэттын. Аһанаддэттын, олетеддэттын, илкатаддэттын, и умыккэн биддэттын дюла.

Һинчарбун дюр бишитын. Аил умыкич бишитын, як учаһылбун-

Мои родители были оленеводы, родители, отец, мать, и ещё бабушка и бабушка, все там работали. Тогда я ещё не училась в школе, и когда открыли школу, пошли мы учиться. Когда мне стало двенадцать лет, я стала работать в колхозе, родителям помогала, всегда работала. И поэтому научилась работать, всю работу знаю. И на рыбалке всегда была с родителями, помогала на всех работах.

И ещё в табуне всегда с отцом пасла оленей. Всегда я пасла, мне, как же, было хорошо помогать в табуне. Всех оленей почти знала. Сначала не могла, а потом научилась, каждого оленя и имя их (знала). И олени какие, то, что они паслись, какую траву (ели), цветы, всё научилась.

Пасти хорошо, но не пасла ночью. Старший и младший братья пасли ночью с отцом. Тогда мало было (людей). Оленей много было, а (людей) мало совсем. Отец ночью пас со старшим братом, а со мной весь день пас. А мать же дома была всегда,шила, варила, стирала, одна была дома.

Собачек у нас было двое. Очень хорошие были, ведь олени наши ез-

да ычилдэ нэллы җиныйлди. Тарыкымыши учақылбун ычилдэтитты җиныйтта нэллы, тармы буйла туттоттын нэлуки, ой-е нэлуки бишин-э.

Табычыши эрығыр эрығыр бу нулгыривун. Отаваткан, акму мурыныч бадурин эрығыр, а бу амырдадун ыкнумур нулгыривун. Ируқалбунда бишин оя. Эрығыр челялин туру би кояттиву, эбденич, ай-е бишин-э. Орыл оңқыривутында эрығыр кояттиву, тик теми терыну дёҗирым.

Аңандаида амалқариву, ишуда кочайдаи, идэидэ, дуктурудаи, челяван амалқариву. Умуда томкадаи амалқариву. С двенадцати лет уже би быллив ынтилби. Олэттивуда эрығыр. Тик ордула ишуда метуда, гекив, ошолуда улэватты, дюганиду икутич ушиңытты. Би челяван арам что ыштын улэватты. Можно олгитми нян тугэниду кочайдин, унтав гекив аңандин. Сумкагаида эрукыдэ муңгэрэда аңандин. Челяван арым би.

Тарыкымыши деплеуанда ачча бишин. Орын уллычэмэн олешнотту, тарав бадикар дебешнотту и ишычин, уже атырылчав, эмедянну. Иныңунон кусчиридюр, акнуму кусчиддётту. Ышуда говатта, «Демшу». Чаиңунда ачча, сахар, хлебынунда ачча, ышу тарав говатты, мунду ай бишин. Кучэлыкэкэм уллыкэкэм дебешну нян иныңунон

довые не боялись собак. Тогда ездовые совсем не боялись собак, но в лесу бегали волки, много волков было.

И вот ещё, всегда, всегда мы кочевали. Отец на лошади всегда ехал, а мы сзади с матерью кочевали. И грузовых оленей было много. Всегда всю землю я видела, интересно, хорошо было. Как олени пасутся видела, и поэтому я до сих пор всё помню.

И шить научилась, шкуры обрабатывать, размягчать, краской мазать, всему научилась. Нитки сучить научилась. С двенадцати лет я уже помогала родителям. И ещё я варила всегда. Сейчас в табунах шкуры, шкуры от голов всяких, камуса выбрасывают, весной прямо разбрасывают. Я всё знаю, что нельзя выбрасывать. Можно, высушив, всё зимой обработать, торбаза всякие шить. Сумки себе, выючные сумки, сумки шить. Всё знаю я.

Тогда же и еды-то у нас не было. Оленьё мяска сварим, это утро поедим, а вечером, уже потемну приходили. Целый же день пропасли, с отцом мы всегда пасли. Никогда мы не говорили, что мы голодные. Чая нету у нас, сахара, и хлеба у нас нету, не говорили это, нам хорошо было. Немножко мяска съедим и целый день не евшие ходим,

ач дебчелыч гиркыватчотту, ышу деммотты.

Табыч ордуши бими эрыгыр челяван орылбы кояттивун бу, аич. Амалқаривун, тарықымта куңал бими, ағдыгнуми. Тик тэрыну би дёучиваттым. Тик носэгчэн бими ортыки урымчу дюганидуда, челяван кусчимчуда, иавчимчуда.

Темүемида орын уллывэн алладин олёттотту. Иаванда ышу улыватты, икиривэндэ, челяван уютотту и гекич челяван уңуотту. Явандат ышу ушиңытчотты. Икиривэндэ гекич, нимыттондэ, бу челявантэ уңнивун, ычивун ушиңуотты.

не были голодными.

И вот, когда мы в табуне были, всегда всех оленей смотрели мы хорошо. Научились тогда-то, когда были детьми, со старшим. До сих пор я помню. Сейчас была бы я молодая, в табун бы уехала весной, всего бы пасла днём и ночью.

И забитого оленя мяса как надо варили. Ничего не выбрасывали, и кости все вываривали и по-всякому всё делали. Ничего не выбрасывали. И кости всякие, панты, мы всё делали, ничего не бросали.

3 Herding reindeer / Работа оленевода

This text was recorded on 01 July 2009 in a reindeer herding camp in the mountain tundra in Central Kamchatka by Natalia Aralova and myself. Gennadij Solodikov spoke for 17 minutes in total, of which the first five minutes are included here. The initial transcription with a Russian translation was done by Rimma Egorova. The complete recording with transcription, translation, and glossing can be accessed at: <https://hdl.handle.net/1839/0fff3edb-0b03-493e-8d1f-d4b8e764fc6d>.

Gennadij Solodikov, who was about 56 years old at the time of the recording, was a trained radio operator. He had lived all his life in the herd, working both as a radio operator and reindeer herder.

Synopsis

Gennadij Solodikov provides a reindeer herder's perspective on reindeer herding in Kamchatka. They get up very early and accompany the herd on foot, drinking tea while there. If all is quiet they might even try to shoot some ducks. The herd is driven back to the camp at lunchtime, where the reindeer circle continuously (Figure 3.1), while the herders eat lunch and drink tea, before taking the herd back out to graze (Figure 3.2). Lamé and ill reindeer are taken out of the herd and treated at the camp, while less severely affected animals are treated in the herd.

Figure 3.1: A herd of reindeer circling near the camp, at lunchtime. The ground where they are circling is already quite bare, since the herders camped in this one place for longer than usual. The horses with which the herders migrate from camp to camp are grazing in the background.

Figure 3.2: The herder Anatolij Solodikov watching his reindeer in the Alpine tundra of Central Kamchatka

Что я расскажу? Утром встаём в пятом часу, еще когда солнца нет. Чай попив и в табун (идём), и что же, хорошие, хорошо находятся олени. И мы идём. Идём и собираем всех. И, собрав, там бываем и чай пьём тоже. Если хорошо всё, кто-то охотится на уток и разным занимаются. А когда они начинают пастись - пусть пасутся, а мы около них будем, смотрим как они есть. Хорошо и по воде ходят.

И оттуда смотрим - день настаёт, солнце. Олени начинают быстро ходить, ну ладно, к дому потихоньку начинаем гнать. И олени идут домой, питаюсь. Кто воду пьёт, а кто бегают просто. И вот до дому пригоняем, и на паляну, где ловят оленей, приходят, и начинают ходить по кругу. А мы идём чай пить и там чай пьём, обедаем. И сидя мы смотрим, когда они начнут есть. Если стоят, то пусть стоят. А днём иногда, где есть снег нетаящий, *онир* (это снег, который не растаял), и вот там пусть они кружатся, пока не захотят есть. Кружатся, и вот пока смотри, чтобы они никуда не ушли.

И если хромые есть какие-нибудь - будешь лечить. И с водой хоро-

аич даяыткыраллы - эдэш қалу-
кан и қолуқанн. Дюгынидугыл
аич, нян и укчи одықын, нян бор-
гышындир орчарши. А тачингыл
аич. А уныт яв гундим?

А орылгыл челяди биватты: җи
дюллә нәмаччәттән, җи тар ангич,
җи дегәнгич - челяван авчиваттә.
Ан амыргыл биваттә, ан дюлепки
авчиваттә. Вот амырла биддын,
нян долитын җындин и укәл дюл-
ля. Нян коятникан-э ирәвкә орату
дебдим - оҗытур уҗындыр нёҗчи-
ватты, эрәвтыкан яруваттын, нян
тарав ярудин. Унәт нёҗчиддин эры-
гыр. Иркышиндинны или кека-
шиндинны - тарықым иллоттын.
Оой, якавулут биваттә, он! Ирыпту
тыкуллотту. Нян моч-е дюльгидыт
гирқымы нян нушмалатын икутич
или оҗытлатын, тар ясыллатын.
Иркышыддинны - тарықым-мак
турдир. Нян турридюр тар оҗқы-
диллә. Орыл орылгычин.

Нян и тадуқ дюллә тығытныкан
он, или турубалюдинны или тәбә-
киҗгаи қолыдинны. Нян адунда
он, доқланыл биваттә. Доқланыл-
бы тар или дютки җынудинны,
орылбә таду бәгдәтникан, а унтәль-
бә, ирәккә эстән аич уҗнә - доқлан
тарылбә кусчиныкандә даянықан.
А тармә тик быди яқ медикамен-
тын бидин? Ачча якта.

шо держите - не морите без воды
и поите. Весной-то хорошо, а когда
жара настанет и они разбредутся,
твои олешки. А так-то хорошо. А
что скажу ещё?

А олени все бывают: кто впереди
бежит, кто справа, кто слева - вез-
де лезут. Некоторые задние быва-
ют, некоторые всё вперёд рвутся.
Вон сзади был, а потом через них
пройдёт и уже среди первых. И вот
глядя какую бы траву съесть - но-
сом водит, бегаёт, то эту попыру-
ет, то другую попырует. И всё бе-
жит всегда. Крикнешь или свист-
нешь - только тогда остановится.
Вот какие бывают! Аж рассердим-
ся. И вот палкой спереди подойдя
по носу сделаешь, по глазам. Крик-
нешь - только тогда задержатся. И,
задержавшись, начинают пастись.
Олени как олени.

И так вот, рассиживаясь, или в би-
нокль смотришь или табак свой ку-
ришь. И вот иногда там хромые бы-
вают. Хромых вот или домой ве-
дёшь, оленей там лечить. А других,
которые не хромают, тех когда па-
сёшь ловишь (чтобы лечить). Но
сейчас вот какие медикаменты бу-
дут? - Нету ничего.

4 In the reindeer herd / Работа чумработницы

I recorded this text on 7 July 2007 in Valentina Axmetova's kitchen in Anavgaj. We had spent several days working together, so that there was already some familiarity between us. I did the transcription and verified it with Valentina Axmetova, who also provided the Russian translation.

This excerpt is approximately eight minutes long. It is part of a longer recording that totals 26 minutes; this was cut up into thematic chunks at the time of transcription in the field. The next text (Text 5) is another little fragment from the same recording session. Valentina Axmetova switched to Russian a lot, probably due to the context of speaking exclusively to a person with whom she had been speaking Russian for several days. I edited this and the following text by replacing many of these Russian insertions with the Even words that she herself had suggested during our translation sessions. The recording with transcription, translation, and glossing can be accessed at: <https://hdl.handle.net/1839/b1163a38-8d3f-4abf-b1df-bd4d6b4afc91>.

Valentina Axmetova was 67 years old at the time of recording. She had eight years of schooling, and had worked in different professions, including as a yurt worker (*čumrabotnica*) and herder in the reindeer herd.

Synopsis

With this text Valentina Axmetova provides a yurt worker's perspective of life in a Kamchatkan reindeer herd. In the winter the herd can be in a large pasture for several months at a time, and so the herders can construct a large and comfortable yurt. In this yurt the yurt worker cooks meat and various dishes introduced by Russians like borsht, plov (an Uzbek-style rice dish), or pelmeni (a type of ravioli). She also bakes bread on the stove (Figure 4.1) – and since she uses her bumpy pots as baking pans the bread comes out very pretty, with patterns from the bumps.

In summer they have to move every few days, because the grass gets trampled by the reindeer hooves. Everything is packed the evening before, and Valentina Axmetova cooks a pot of meat (Figure 4.2 and 4.3). After breakfast the last dishes

are packed, the yurt is taken down, the horses are saddled, and they move on (Figure 4.4). Upon arriving at the new camp the fire is lit and the yurt is put up again (Figure 4.5). They migrate as early as possible to avoid the heat of day, when horse flies and mosquitoes irritate the reindeer. At the end, Valentina Axmetova tells how she once secretly collected enough reindeer hooves to make meat jelly, providing the herders with a pleasant surprise for breakfast the next day.

Figure 4.1: Baking bread by the fire. Note that this photo was taken in the traditional homestead on the Managič river (see Text 11), where they use standard baking pans and not pots, as used by Valentina Axmetova (who furthermore was able to bake bread on the stove in winter).

Figure 4.2: A pot of freshly slaughtered reindeer meat boiling over the fire

Figure 4.3: A platter of cooked meat

Figure 4.4: Migrating by horseback. The herd is driven separately on foot.

Figure 4.5: Setting up the new yurt

¹In winter the reindeer herds camp on plateaus, where there is a lot of reindeer moss. In summer they move to the mountains, where the bushes are small. This is important because in summer the fur between the hooves hasn’t grown out yet, and big hard bushes can damage the skin between the hooves. This in turn makes them susceptible to a bacterial infection called *kopytica* or *kopytka* in Russian (‘hoof rot’ in English).

⁶The episode Valentina Axmetova narrates here happened only once while they were migrating on horseback - reindeer hooves are very heavy, and the horses have to carry a very heavy load as it is, so she couldn't always take hooves along with her. It was different when they used snowmobiles to migrate, since one can take more things (and the snowmobiles can do the trip several times), and then she used to openly take along 'spare' hooves for meat jelly.

 ‘The herders were happy, and my husband says “Where did you get so
 many hooves from?”’

⁷They only slaughter a reindeer when they have arrived at a new camp (not every time, though), so that they don’t have to carry so much on the pack horses when they move. Since Valentina Axmetova took along the hooves from the previous slaughter, she now had enough hooves (plus the head and a few leg muscles) to make meat jelly; the hooves of just one reindeer are not enough.

Работа чумработницы: Текст по-эвенски с русским переводом

Тугэниду гору ылытчотту умынду турду. Иманныкыши тикэ. Лишь бы тур эгден бидэн, специально тугэни пастбищен, кусчимүэ бинни тур. Ылканта эгден тур. Таду иламда аткикам ылытчотты. Юртавыши тэввотты эгдемкеру. Табыч нямуда. Тала долан ылытчоттын камин. Пастухал орротты, умында пастух или дюрдэ мов молиддэтты, а дюрдэ орротты ортыки, орбы эженэватты. Нян тар.

А би олетидиллоттым. Котелиндеи каминдула тэврым, мо эрыгыр оя биваттын, ням-е биваттын юртаду. Нян тар олетидиллоттым уллыңи, тобакчанди онноттым, тимниккоттым. Гекив олеваттым, супуда, капуста бишыкын – борщ. Кашавда плов, пелмемдэ ныкиддэтту. Табычыши хлебивмиши, дюллэ лепёшкив ныккотты, титэл, потому что ычил ар он хлебу ныккоттын, ылкан хлебу. Табычыши тестов ныккотты эгденду кастрюляду, челядун оя бидэн хлеб. А потом, вот в девяносто пятые годы уже амалқаритын хлебу ныктэвыр.

Би ныккоттым гекиду кастрюляду. Ирэлкэ кастрюля, эррочиндэ эррочиндэ тэввоттым. Эчин поднимется. Поднялыкын – прямо на печке ылытчоттын кастрюля. Ичинни края уже румянные, нян тавгидаван. Умыкич далла биваттын и нод

Зимой долго стоим на одном месте. Потому что снег. Лишь бы земли много было, специально есть зимние пастбища. Ну обширная земля. Там могут три месяца стоять. Ставят большую юрту. Тепло, внутри стоит камин. Пастухи уходят, один или два готовят дрова, а два идут в табун оленей смотреть. Вот.

А я начинаю варить. Котёл ставлю на камин, дров постоянно много бывает, очень тепло в юрте бывает. Потом начинаю варить, мясо топориком разрубаю, вот на мелкие куски. Всё варю: суп, капуста когда есть - борщ. Каша да плов, пельмени делаем. А когда хлеб делаем - раньше делали лепёшки, потому что не знали, как хлеб делать, настоящий хлеб. Потом, ну тесто делают в большой кастрюле, чтобы всем хватило, чтоб много было. А потом, вот в девяносто пятые годы уже научились хлеб ставить.

Я делаю в разных кастрюлях, какие кастрюли, и такая и такая, ставлю. Когда поднимется - прямо на печке стоит. Увидишь, края уже румянные, и обратную сторону. Вкусно бывает и красиво, хлеб. С рисунком хлеб получается, потому что

биваттын, хлеб. Рисунокылкэн, потому что эренкэ битый биваттын, онда тали икутич битые. Нод умыкич хлеб.

Дюганидуши эрыгыр илам иныну бишнотту, дюрбы илам иныну, нянда чашки нуддэтту. Тикэши орыл орату дебникэн эрыгыр гиркыр и нёче дэсчишнын. Гору ыштын илытчотты.

Бу эчин ныккотту: Ишычин оилбы эйду нэкэтту челядюр, этикэмудэ, бидэ и пастухи биддыл умивры эйду. Палаткада дован эйду муңгэрэлэ иннотту. Юртачемун пустой илыттын. Тала эйду нэче, якта ачча. Челядиши нэкэтче муңгэрэлэ. Только улаватту чашкалби.

Ишычин би олеваттым улыву, котёлу, хлебыңудэ оя. Таравуши улыву олечев, икут тачин олечев, нэдым элыкклэ. Нян нэду. Тарав бадикар илуддуткэн, илуру дебешну. Тарав челяван муңгэрэлэ (нэдым), элэ биддэттын. Тала би кухняи нэдым эйду, челяван, алыкалбы, ирқарбы, крушкав, челяван. Нянта тала нэмэлчирым, аныши палаткачарбыр аталлы. Вобщем, облегчённо утром.

А меллотту туннан часла бадикар. Табычыши мурылбы оняттылбы гадималчиватты и намымалчар, нян бадушнотту-ю чашки. Нян тар уже связь биваттын, с центром, полодинацатого. Бу тарыкым уже уриватту. Нулгыватту

дно битый бывает, как-же там прямо битый, и хлеб очень красивый.

Потом летом всегда три дня побудем, два три дня, опять дальше кочуем. Потому что олени шипля траву постоянно идут, и трава ложится. И поэтому долго не стоят.

Мы так делаем: Вечером все вещи складываем и пастухи и муж, и я. Что внутри палатке, всё в вьючные сумки складываем. Только юрта пустая стоит. Там всё сложено, нету ничего. Всё же сложено в вьючные сумки. Только чашки оставляем.

Вечером я отвариваю в котле мясо, хлеба много. Вот это мясо варённое, прямо так отварённое складываю в мешок. Утром поели, почеевали. Всё это вот тут в вьючную сумку пустую складываю. Туда я всю свою кухню складываю, посуду, ножи, крушки, всё. Всё туда быстро складываю, другие палатки снимают. В общем облегчённо утром.

А встаём в 5 часов утра. Потом идут за привязанными лошадьми, быстро заседляют и уезжаем дальше. Связь бывает с центром (Анавгай) полодинадцатого. Мы к этому времени уже останавливаемся на новом месте. Кочевали по прохлады.

эрыгыр иҥынисчирив. Бадичиши бу иллидюр нуддотту. Потому что иныҥ овод геки, куличанда, а бу, эдэвыр укчиду бадур, бадитмакан меллотту.

Би быди тарықым темуёдми кокчирбы умнунтын тихаря этикэндукий элыккэ нэваттым, муҥгэрэлэ нэваттым. Когда намадиллотту этикэму говаттын: «Ями быди эрэк ургын эчин быди?» Говаттым: «Нян челяди инкэ тавыр патроңылши талавыр бишы, тарак ургын биваттын.»

Табыч уринидюр темуёддэтту, мин-и уже кокчиңылбу оя оватты. Нян би олеваттым холодецуҥаи. Тарылбы кокчирбы досталлоттым нян тар олеваттым, и тымин бадикар холодецыч завтракайддэтты. Пастухал окаңчиватты, этикэму говаттын: «Авгич эр дын кокчиңылши?» Би говаттым: «Талакка муҥгэрэлэ нэкчириву.» Челядюр ининиддэт-е. Этикэму говаттын: «Теми эчикэн ургываттыне!» И вот холодецудэ дебботты.

Гекич би старалась олеттэи даллыч. Пирожкивдэ ныккоттым. Ук биваттын – ну что же? Аяввоттым би улиттэи даллыч. Би тестоҥгаи ныккоттым. Пакет целофановыйла тестоҥи нэдым, нян алкамчала ноккоттым. Вот, уже эр дын оваттын, я быстренько уроню, нянда нокичиддэттым. Эчин иллыкында урониллоттым нян досталлым, и нянда окаңчиватты бэил.

Рано встали и поехали. Потому что днём и оводы и комары, поэтому, чтобы по жаре не ехать, рано встаём.

Потом когда забивали на мясо оленя, я собирала копыта с сухожилиями, и не говоря мужу, вложила в вьючную сумку. Когда начинают вьючить, муж говорит: «Почему такие тяжёлые?». Я говорю: «Там же все твои патроны, это же всегда тяжёлое бывает».

Потом когда останавливаемся, забиваем оленя, а у меня уже копыт много. И я готовлю холодец. Эти копыта достаю и варю, и завтра утром завтракаем холодец. Пастухи радуются, муж говорит: «Откуда у тебя столько копыт?». Я говорю: «Я же их во вьючной сумке держала». Все смеются. Муж говорит: «Вот почему так тяжело бывало!». Вот и холодец кушают.

Я старалась вкусно готовить. Пирожки делала. Жарко бывает, ну что же? Я любила вкусно кормить. Я тесто делаю, в пакет ложу, и подвешиваю на крючок у остова. Вот уже такое делается, я быстренько уроню, опять вешу. Так раза три делаю, а потом достаю, и опять мужики радуются.

5 Protective doll / Хранитель оленей

This short text is only two minutes long. It is part of a longer recording that totals 26 minutes, which I had cut up into thematic chunks at the time of transcription in the field. For details about the recording, the speaker, and how the text was edited please see the introduction to Text 4. The annotated recording of this excerpt can be accessed at: <https://hdl.handle.net/1839/3ce5ca96-1e58-43e6-ad43-14fdab81d8d7>.

Synopsis

In this little text Valentina Axmetova tells about the wife of one of her older brothers, who was a shaman. During a trip by reindeer to the village called Tva-jan, when the brother, his wife, and an old reindeer herder were by themselves, she took out an old leather doll that she had inherited from her mother. This doll watched over the reindeer so that they didn't need to be watched by the humans.

Хранитель оленей: Текст по-эвенски с русским переводом

Мин агдыву бишин, Афанасий Инно-
 кентьевич. Ноŋын бишин оры-
 мŋы. Агдыву Кирилл Иннокен-
 тьевич, Тваянду бидми, ноŋманда

У меня был старший брат, Афана-
 сий Иннокентьевич. Он был олено-
 водом. Когда мой старший брат Ки-
 рилл Иннокентьевич жил в Тваяне,

тярурин, Тваянтыки ордэн. Ноуын
эмувкэнин пастуха, этикэкэм, геҕан.

И вот илнидюр нулгыддытын но-
уыртын. Угикаму немножко ша-
ман бишин, челядюр говатты. - Та-
рак угикаму, аҕдыву атыканни, би
говаттым «угикан». - Ноуыныши
старинное, ноуын ыниндукин Па-
ка бичэдук бэкэн старинное би-
шин, истук аҕанатла. Кухлянкалат-
тын, унтында бишин, авоннида –
корбака.

И уринидюрыши ноуыртын аб-
дулбы эчин вот нодыч нэватты,
элэ муҕгэрэн биваттын. Табыч та-
равыши нугваттын, бэкэкэкэм. Бэ-
кэкэныши нимкаҕында биват-
тын. Тала илуваттын абдулдула.
Потом нипкэваттын. И орылыши
икутич эли тоҕалаҕчиддэтты. Ыидэ
ынны ноумутын кусчиватты. Вот
тачин тары. Ноуын немножко кол-
довала, челядюр аритын.

он его (Афанасия) позвал, чтобы он
уехал в Тваян. Он прислал старика
напарника.

И вот втроём они кочевали. Моя
сноха была немножко шаманом,
все так говорили. - Вот это сноха,
моего брата жена, я говорила ей
«угикан». - У неё от умершей ма-
тери Пака была кукла старинная,
сшитая из шкуры. В кухлянке бы-
ла, в торбазах, в шапке корбака (би-
сером расшитой).

И когда останавливались, вещи
ставили красиво (в ряд), вот здесь
бывали вьючные сумки. И оттуда
вытаскивала куклу. У этой куклы
палка была. Там она ставила куклу
к вещам. Потом закрывала (покры-
тием от дождя). А олени же прямо
рядом лежат. Никто их не выпаса-
ет. И всё. Она немножко колдовала,
все знали.

6 To school / В школе

For details about the recording and the speaker please see the introduction to Text 1. The complete recording with transcription, translation, and glossing can be accessed at: <https://hdl.handle.net/1839/4089b186-d7d0-4e88-b8c0-570e52c29db5>.

Synopsis

In this excerpt Evdokija Adukanova tells of her first year in boarding school in Esso. She was nine years old at the time and missed her father terribly. Luckily her older brother looked after her very well. At the end of the school year she and other children were taken back home by some reindeer herders. When she got home to the little settlement Laučan (Figure 1) and saw her mother chopping *pa:laktca* (finely chopped fresh raw offal, a delicacy, see Figure 6.1), her emotions got the better of her and she burst into tears.

 ‘My younger brother.’

⁴The verb *po:me-* (mostly pronounced *po:ma-*) is actually not a verb that takes the Nonfuture or Past tense suffix in *-d-*, this must be an idiosyncratic pronunciation of Evdokija Adukanova’s. The compound suffix *-na.si*, glossed as *-AM.IPFV*, gives a ‘go and do and return’ reading (Pakendorf & Stoyanova 2021) - which actually doesn’t fit the context here, since her brother died after she had left, but before she had come back.

⁵Here, *iami* ‘why’ has a mirative reading.

Тарыкым уюн анĵыну бишин, уюн.
 Уридянниву оҥникакан, оҥҥоттым-
 е, акми энтэкэе гылэриу. Анĵа-
 чидилмида элгеду долбы оҥиддѣт-
 тым, эчин, уллаи додун оҥҥоттым.
 Сестрав Домна Григорьевна – ноҥ-
 нун эчин укываттым – «Эдий
 оҥкир, долдыдикил, одли!». Нян
 уклышноттым, ышым аватты.

В то время мне было 9 лет. Поеха-
 ла плача, плакала, скучала сильно
 по отцу. Когда ночевали по дороге,
 я ночью плакала, вот так под одея-
 лом плакала. Сестра Домна Григо-
 ревна - с ней спала – «Не плачь, а
 то услышат, перестань!» (сказала).
 Засыпаю, даже не знаю (как).

⁸The large intestine of reindeers is dried and then roasted over the fire, and eaten together with the dried reindeer meat *elte*.

Эссола эмниву, нян коровалбыда элыкыш иттиву, свиньявда. Учительун орыч бишин, Григорий Трифонович Солодилов. Ае, ае. Як би, ньучидыч торэдэи ариву? – ычиву ар. Тачин. Онайдаида, таңдаида амалқариву, аич-о ылкан.

Тармы всё равно гылэриву акми энтекэе. Тугэниду эмнин, январьлаши ңиндарин, тар. Нян би гуным: «Папа, тик би урдим дутки.» – «Яду?» – «Ытым эду таңадды.» – «Таңадли, нэгидикил!»

Агдыгу Сергей Григорьевич тарак минудэ аич этурин. Аич-е этурин. Посылкагакун ыкмие эмувкэватты. Тарав он нэкчиваттын, қамуда явда, қам. Тарав исычин дебеддэттым уклышындэи. Мину нэдни уклышындэку, агдыгу эду тыгычиддэттын. Анчиндуву, уклышындэку би. Уклышноттым. До завтраккэ ышым укыватты. Бадикар нян меллидипу. Оңымадиллым. Пока тачин оңымаддыку, няндыши агдыгу эммоттын, эңенэваттын. Илья Кирилличтэ бишин. Мину кояттитын, этуритын энтекэе.

Эчикэн нығни, дүганиду, июняла, концелендэ и начало июльяла гадиватты орыныч муну, орымьылдук. Тарықымкэ ычиву амалкар бадудай орынду. Дядявуда бишин, Абрам Фёдорович. Ноңында эммоттын. Нян орынду бадуваттым. Нян ңынну, ордул-е бадудду, Эссогич ой-е куңал биватты. Анда эгдемкэрел, уже асаткар очыл.

В Эссо приехала, увидела коров в первый раз, и свиней. Наш учитель был эвен, Григорий Трифонович Солодилов. Очень хороший. Я по-русски говорить умела? – Не умела. Вот так. Писать, читать научилась совсем хорошо.

Всё равно сильно скучала по отцу. Зимой в январе он приехал на собаках. И я сказала, «Папа, я поеду домой.» – «Зачем?» – «Не буду тут учиться.» – «Учись, а то наругают!»

Старший брат Сергей Григорич, тот за мной хорошо смотрел. Очень хорошо смотрел. Даже посылку для нас родители присылали. Вот эту посылку как хранил, юколу, и ещё что-то, юкола. Это вечером кушаю перед сном. Меня ложил спать, и брат около меня сидел. Со мной рядом, чтобы я заснула. И засыпаю. Наверно до завтра спала. Утром опять просыпаюсь, плакать хочу. Пока так хочу плакать, опять старший брат приходит, проверяет. Иля Кирилич был, вот они меня смотрели, следили сильно.

Вот весной, летом, в июне, в конце июня и начале июле приезжали за нами на оленях кто-то из оленеводов. Тогда-же наверно научилась ездить на оленя. И дядя у меня был, Абрам Фёдорович. И он тоже приезжал. И вот на оленях ездила. И вот едем, по табунам едем, из Эссо много детей было. Некоторые большие, уже девушками стали.

Нян элгеду дали одын Лаучантыки, би уже арым, что дали одни. Тар Нэбурэ гырбын тардала Лаучандулэ, тала дюллэ посевной бишин, тала ҥынниву. Нян мину сразу Лаучантыки урурин этикэн, Андрей Петрович, Лаучантыки. Нян амаҗаву бишин, Николай Павлович гырбын. Тарак мину ҥынуурин, ирануурин, «Таряла, таряла» гунни, «тар дютын».

Агдыгу нёмадын, Павел Григорьевич, тарықым элыкыш мин таҥнышиддыку. Нян таду иттым, ями куҗакакакан тэллэ эвиддын. Мину иттиди тарыдит дютки ималчишинин. Нуву Яков, тарак эвиддын. Мин нуву. Нян иддым дюлай, ями ыкму нялакчыв-е товтиддын. Нян орын нялакчыван товтиддын дебесчиддын. Би нян, ириди дюлай, оҗаладдымыши, иттиди акму и ыкму. Нян мину накыдилл-е умыкич, дебдэкудэ ылтывдэ бур, нэды элэ. Моминавда далгатты умыкич. Уллыҕытын-е нокуттын эчин. Как раз темуёддытын, уллы нокуттын. И эвидилливу нунуми. Нян тары.

По дороге, близко стало в Лаучан, я уже знаю, что близко стало. Та сопка по имени Небуре (=лохматая, мохнатая) там в Лаучане, раньше посевное поле было, туда приехала. Вот сразу меня в Лаучан отвёз старик Андрей Петрович. И дедушка был, Николай Павлович зовут. Тот меня привёз, проводил, «Вон там их дом», сказал.

Старший брат умер, Павел Григорьевич, когда я только что поехала учиться. Вот там увидела, ребёнок маленький на улице играет. Меня увидел, сразу домой заскочил. Младший брат Яков был, тот играл. Мой младший брат. Вот захожу домой, мать рубит свеженину (лёгкие, почки, печень в сыром виде). Вот олентя свеженину рубит и кушает немножко. И я вошла в дом, увидела мать с отцом, и как заплакала! Стали меня успокаивать, и кушать мясо сухое дали, положили сюда. И сушённую прямую кишку жарили. Мясо висит вот. Как раз забивали, мясо висит. И я играть стала с младшим. И всё.

7 Childhood memoirs / Воспоминания про детство

I recorded this autobiographical narrative on 29 June 2009 in Anavgaj, in the kitchen of Raisa Solodikova's youngest daughter. The text was transcribed by Natalia Aralova together with Rimma Egorova (the speaker's sister), who also provided the Russian translation. The fragment included here is about one third of the total memoir; I selected the parts that are connected to life in a reindeer herd or fishing camp, including a description of how the school children travelled by horseback and on foot from one herd to another to get back home at the end of the school year. To make a more chronologically cohesive narrative, I rearranged several sentences. The original recording with transcription, translation, and glossing can be accessed at: <https://hdl.handle.net/1839/764a1d1c-d40b-4863-86a9-42f711bea656>.

Raisa Solodikova was approximately 63 years old at the time of the recording. She had 11 years of schooling and worked as the school librarian. She is the older sister of Rimma Egorova from whose autobiographical narrative the following text (8) was taken.

Synopsis

The text begins with some of the earliest memories of Raisa Solodikova, when she lived with her parents in the reindeer herd: she remembers how her younger brother was born and how he nearly crawled into the fire when he was six months old. When she was about five, the family moved to the village Tvajan (Figure 1), where she saw many items for the first time, for example lump sugar, which she used to play knucklebones with. Dried fruit she mistook for mushrooms, wondering why her father had bought those when so many grew in the forest.

After finishing the Tvajan primary school the children had to go to boarding school in Ezzo, and at the end of the school year they were brought back home by people who worked in the collective farm. The journey on horseback and on foot could take up to 12 days in bad weather. It took them past Ichinsky

(Figure 7.1), a volcano in the Sredinny Range in Central Kamchatka, and through several reindeer herds, where the herders welcomed the children with freshly slaughtered reindeer meat and raw offal.

In summer Raisa Solodikova's family moved to a fishing camp, and the children who still went to primary school would walk the three kilometres to school from there every day. She had to help her father by bringing fish he had caught to neighbours, and once got a fright when the moon shone out behind clouds, giving her the feeling it was chasing her.

Figure 7.1: Ichinsky, one of the largest volcanoes in Kamchatka

Воспоминания про детство: Текст по-эвенски с русским переводом

Кууы бими тар орду бу эрыгыр бишивун, би дѐнчирым тар орду бичеи. Нуида Гена бакутчеван дѐнчирым, минду тарыкым бишин дюр ануану, адыкана, дяпкан аткикан. Тарав дѐнчирым, Гена бакурин Быркауай гырбын урэкчэн. Эг-

Когда мы детьми были, вот в табуне мы всегда были, я помню, как в табуне жила. Я помню, как младший брат Гена родился, мне тогда было два года и сколько же? восемь месяцев. Вот это я помню, Гена родился, Биркауай называется сопка.

ден урэкчэн бишни. Икаваттыккэ тарав Эссола Нулгурымҕыл: «Быркаҕай, Быркаҕай, эрыгырда танмучыддын». Ноһун айдыт эрыгыр танмутчоттын. Бу Тваянду бими биноклич коячиддэтту тарав Быркаҕаю, мыгдын эелэн ойчиридюр.

Табыч нян дёҗчирым, тачинда илананҕану бишин, тары. Аич тарав дёҗчирым, Гена тар тогтыки миркышнин. Би ноһман ыкми утми ашукут эмэниву. Нян элдырда мурындырыл эмнитын тар. Гена тогтыки миркыддын. Ноһун нюһун аттикаһын бишин тарыкым тар.

Табыч нян туғэниду сорок девятый – пятидесятый год уже селотки нулгыривун. Нян орғич эмниди элыкыш би сахару ичиддиву, кусковою. Орду бими ывиддэтту дёлыч, «буркаҕи» говатты эчин, тар тарыч ывиддэтту, говатты «камешки». Би нян сахару иттиди тачин ывидилливу. Ычиву тар сахару ар. Яблокукан тар би аявалливу тарыдит. Би нян магазинтыки орроттым, униемҕы дюдэдун нургыныддэттым, яблокоҕаи гасчими. Элыкыш тар сухофруктывда иттиди, би гырбуттыву, дывыннит олгитча. Тарав тар-е, говаттым «Яду нян дывынниту акму унин, оякка буйли, тар дывыннит».

Бу бишивун Тваяндула. Нонынкына таҕниву таду селоду Тваянду. Нян начальный школав оддидюр

Большая сопка есть. Поют вот эти, в Эссо, Нулгуровские: «Биркаҕай, Биркаҕай, всегда затуманенный». Она и впряду всегда затуманена. Когда мы в Тваяне были, биноклем смотрели вот этот Биркаҕай, на вершину горы забравшись.

И ещё я помню, также три года было мне. Я хорошо помню это, Гена к костру пополз. Я его, за матерью погнавшись, чуть не оставила. И хорошо, что всадники приехали вот. Гена к костру полз. Шесть месяцев ему было тогда.

И вот зимой 49-го, 50-го года мы в село перекочевали. В первый раз увидела сахар кусковой. Когда в табуне жили, играли с камушками, «буркаҕи» называются, и вот так мы играли, называется «камешки». И вот я, сахар увидев, так стала играть. Не знала вот сахар. Яблоки вот я полюбила сразу. И вот я в магазин пойду, перед продавцом нургели танцевала, прося себе яблока. В первый раз увидев сухофрукты, думала, что это грибы сушёные. И вот про это вот говорила «Почему грибы сушёные отец купил, в лесу их же много».

Мы жили в Тваяне. В начале училась там в селе Тваян. А начальную школу закончили, потом поехали

нян Эссотки упкутнэри вун, таду интернатту бишивун. Нян учебный год оддыкын бу орротту мурыныч. Муну гадиватты колхоз мурылдин. Бадушнотту, ой-е биватты. Мурылбун адунда абыл биваттын, нян эгдедмыр алгандыватты. А кучукэр бадуватты.

Нян адунда тылка, окат тылкаучирыкын, гишыддэтту. Тар горую ыннотту, мемда иныу адунда. Тачин тар, уданда бишыкын оявда, дюрдюлыкудэ иныу. Тармы эбдендэ биваттын, умыкич. Быйди турын таргида, Срединный Хребет говатты, нод умыкич. Тала урэчен бинни, Ичинская Сопка, вулкан, ипиуэй. Тали эрыгыр, адун, баи биваттын. Эрыгыр тали, тар окрэли туркидыватту. Нян Кетачам уннидюр нян чашки нян гишидиллотту, эдэвыр - окат энтекэе уунин. Нян уречилтэ тылкаучириу ыннотту.

Нян тачин уннидюр нян орылдулида ыннотту. Орымныл-е муну аич арчимкыватты, темуёддэттыдэ. Бу тар гекив нян нялакчытыддэттуда улывдэ, дюрбыдэ иныу таду биддэтту. Нян тар орротту чашки, тар Тваякла тар.

Тваянду нян утэддидюр нян былыдиллотту. Колхоз картопиунонда пололыддэтту, сенокостуда коровыл сеноугатын уыддэттуда. Нян оддидюр нян тэлидяктыки орротту. Нян тачинта тэлидякту тар бы-

в Ессо учиться, там в интернате жили. Когда учебный год заканчивался, мы уезжали на лошадях. За нами ехали на колхозных лошадях. Мы начинали ехать, очень много нас было. Лошадей у нас иногда было мало и старшие шли пешком. А младшие ехали.

Иногда полноводие было, когда река была полная, мы обходили. Долго шли, десять дней даже. Вот когда дождик шёл, и много дней, 12 дней даже. Но интересно было очень. Сама земля на той же стороне, Срединный хребет называется, очень красивая. Там же сопка есть, Ичинская сопка, вулкан, ипиуай. Там всегда – иногда – погода хорошая бывает. Всегда там по тундре ехали. Кетачан проехали и дальше объезжали, чтобы (в речку не упасть), речка сильно (текла). И всё равно по полноводной реке проходили.

И вот так мы сделали, проезжали по табунам. Оленеводы нас хорошо встречали, забивали оленей. Мы ели нялакчу (сырые внутренности, мелко нарубленные), мясо, два дня иногда там были. И вот уезжали мы дальше до Тваяна вот.

В Тваяне вот, отдохнув, мы начинали помогать. Колхозную картошку пололи и на сенокосе коровам сено делали. И, закончив, на рыбацкий стан уезжали. И вот так на рыбацком стане там тоже помога-

лыддѣттутты. Яраҕа ҕиылыни, тары улиҕатында каму олгитчотту, ниримчаван гекив, ышһи якта уһиҕытчотты. Оллы уһһон ышу тачиннун уһиҕытчотты, челяван кәһгулылэ уллотту оллыв, тала муниче одан. Няһ тарав ҕиылытты дебботты.

Няһ оддыкын, тар август мудакаптыкын, няһда урыддѣтту тачин тар Эссотки. Адунда ҕыннотту аһидали отарандули, тараккал амнык, нюһымдэ, надамда иһиһу ҕыннотту. Мин акму бичеши ҕуһыч ҕынноттын Эссодук Тваянтыки иламда иһиһу. Умныкын бу бадуриуһун, тали тар акму муһу Эссотки ирануһин тар, тунһымтэ иһиһу ҕынниһун. Куһылыши оя бишитын, ҕуһыч.

Акмуши дюлбыда отчоттын. Адунда ордула кәнели оддыкын няһ ноһман ортыки урувкэватты. Тала няһ аич уже орбы уһныкытын, няһда орроттын селотки.

Би кучукән бими эрыҕыр аканды боддоттив. Адунда акму ортыки орроттын, әһенэваттын, урувкэватты. Би няһ дюганиду мурыһыч няһ бадуваттым ноһыннун эрыҕыр. Боддотмағыһ бишив. Алганда авышкида уррыкын, би бодышноттым.

Няһ туғәһиду пиломатериалу уһыдѣтты. Лесопилкатыһ бишин, буйла окат улилын, тала. Няһ дюгани оддыкын талаттытты рыбалкаҕавыр

ли. Яранговые собаки – там им на корм тоже сушили юколу, хребты, ничего не бросали. От рыбы все эти части никто как попало не кидал. В яме закапывали рыбу, чтобы *мунича* (квашеная рыба) стала. И вот это собаки же и ели.

И когда кончается, когда август закончится, уезжаем опять в Ессо. Иногда там по дороге ехали, вот это быстро, шесть или семь дней шли. Мой отец покойный на прямки ехал из Эссо в Тваян три дня. Однажды мы ехали там, вот наш отец нас до Эссо проводил, пять дней только ехали. Детей много было, (поэтому) на прямки.

Отец дома строил. А иногда, когда в табуне плохо становилось, и вот его в табун отправляли. И вот, когда хорошо в табуне уже сделают, опять уезжает в село.

Я, когда маленькая была, всегда с отцом ходила. Иногда отец в табун ходил посмотреть, за него посылали. И вот я весной, летом на лошади ездила с ним всегда. Я была любительницей с ним ходить. Даже пешком, когда он куда-нибудь идёт, я тоже за ним.

И зимой пиломатериал делали. Лесопилка у них была, в лесу около реки. И вот когда лето наступало, там же рыбалку делали. И до на-

ныккотту. Нянь болони оклан бу нянь школатки тар рыбалкадук таунаватту. Қоч иланда километр биваттын. Нянь ишычин нянь урокур упкуттидюрь нянда орротту рыбалкатки, бадикарь нянь бадич орротту школатки. Ышуда опаздаллотты. Тачин тары.

Нянь адунда мэркэр элгычиддэтту. Умныкын нянь тачин тар ууми генуми Валя Тылкановағли, муһну бэриритын, бу гела рыбалкала ғыннивун. Имһын уже, сентябрьлак амнык имһываттын, нянь ынтилбун нянь ғылэтыдиллитын. Кэһгуһылэ кета нукуя оя уһыддын. Коячидми нянь ашукут тар би ируниву ониһағду тар муһлэ. Элдырда Валя элгыи эшындин уһнин миһну. Нянь бу нэғивривун, ышу нянь уһһотты.

Эрығырь дюганиду уллыһун биваттын, темуёдырыл боритматчотты. Нянь һидэ темуёваттын тачинда бориттотты эрығырь. Оллыв нянь – акму ноһын челядукун дюллэ уһһоттын, уже майла быйчиллоттын оллыв. Нянь уһниди бориваттын тачинта, нянь мину һынувкэваттын. Говаттын, «Эрэлдудэ һынуһли, таралдуда». Тымин нянда тар уһтылду нянь һынууддэттым тар, имһымдэ. Тар, би тар аткиканыч умныкын ыһулливу. ступления осени я вот в школу с рыбалки ходила. Наверное, три километра было. И с вечера, сделав уроки, опять уходили, утром вот рано идём в школу. И мы даже не опаздывали. Вот так.

Иногда сами мари́ком ловили рыбу. Однажды, вот так делая с другой Вале́й Тылкановой, нас потеряли, мы на другую рыбалку пришли. Темнота, ведь в сентябре уже рано темнеет, и родители стали искать. В яме много было брачной кеты. Там смотрела и чуть не скатилась по песку в воду. Хорошо, что Валя ручкой мари́ка меня вытаскила. И нас отругали и мы больше не шалили.

Весной-летом мясо у нас всегда было. Те, кто за мясом ехал, делились. И вот другой кто-то ехал за мясом и так же он делился. А рыбу – отец, он и раньше всех делал, в мае ловил рыбу. И сделав, делил также и меня посылал относить. И говорил, «Вот этим отнеси, тем тоже». Завтра опять другим несла я, в темноте уже. И вот, я вот луны однажды испугалась. Относила далеко живущим и пока несла, стемнело. И вот месяц за облаками, как будто за мной гнался. И вот я, испугавшись, плача бежала. (Спросили) «Что с тобой?» Я сказала: «Меня месяц гоняет». И вот сказали: «Вот об-

кан нёҗчириву. – «Ясчинни?» – Гуным: «Мину аткикан улуттын.» – Нян гунитын: «Аткикан тоғэчин уҗныкын, улуригчин ныкрын.»

Тачин тары. Чаш, одыддипыши.

лака делают и как будто (месяц) гонится».

Вот так. Будем заканчивать.

8 Modes of transport / Транспорт до появления машин

This excerpt comes from an autobiographical text that I recorded on 7 June 2007 in Esso, in Rimma Egorova's kitchen. I extracted the parts that deal with the traditional modes of transport (mainly by dogsled and horseback) that were still in use in the 1950s and 1960s, as well as some sequences that touch upon the fishing camp. The text was transcribed by Aleksej Ichanga and translated into Russian by the Rimma Egorova herself. The entire recording with transcription, translation, and glossing can be accessed at: <https://hdl.handle.net/1839/18dea9b9-8130-49b0-b7cb-28568a0410a3>.

Rimma Egorova was 53 years old at the time of the recording. She had a college-level education and had worked in various jobs during her life. Amongst others, she used to translate the Even supplement *Ajdit* to the local newspaper of the Bystraja district, *Novaja žizn'*, from Russian into Even. Rimma Egorova was the main consultant of the DOBES team between 2007 and 2016, helping us with transcriptions, translations, and numerous questions on the Even texts, as well as providing numerous recordings. She is the younger sister of Raisa Solodikova who provided the preceding text (Text 7).

Synopsis

Rimma Egorova tells how she used to go sledding with her younger siblings and cousins while her parents were at work, sometimes even taking a dog sled. This leads her to describe how in winter dog sleds were the main means of transport of both goods and people; in summer this transport was done with horses. She mentions how her older siblings had to come back from boarding school by horseback and how the family used to wait for them, leaving for the fishing camp when they finally arrived. At the fishing camp her mother had to prepare a lot of dried fish for the collective farm. This way of life continued even after the inhabitants of Tvajan were resettled in Bystraja (Figure 1), an abandoned logging camp.

Я – Римма Максимовна Егорова. Я – эвенка. Я родилась в Тваяне. Тваян находится далеко от Эссо.

Когда я была маленькой, я ходила в садик, но мало я туда ходила, не хо-тела. Всегда я младших своих води-ла. Родители работали, а мы зимой катались с горки на саньках, целый день. Иногда брали собачьи нарты.

У нас собак много было. Наш отец деньги, почту возил откуда-то в Тваян. Всё время на собаках ездил. И в Эссо на собаках ездил, кого-нибудь в больницу увозил на со-баках. Дальше, когда снег таял, на лошадях ехали эвены. В то время все имели собак, и лошади были. Не было машин. Один тракторыш-ка был, привозил из базы продук-ты. Из Эссо те, кто жил в Эссо, тоже так-же ездили в Тваян.

Эрығыр кууалбы уруватты, шко-
лав оддыкытын. Уруватты дютки-
тын, каникулы одыкын, мурыныч.

гиддёттын. Няныши эмнивун ывы-
шки, Быстройтыки. Тачинтытэ
ынтилбун эрығыр рыбалкаддётты.
Буши Эссола таңнивун. Нян тары.

Всё время детей возили, когда шко-
лу заканчивали. Увозили домой,
когда каникулы наступали, на ло-
шади. Много лошадей собирали. И
дальше мы ждали, мои старшие,
Рая, Гена, из Эссо приезжали. Я все-
гда ждала. И потом вот же на ры-
балку мы ездили, когда приедут.
Там мы много ловили рыбы, для
колхоза рыбу. Всё время отец наш
был бригадиром, а мама наша ры-
бу разделывала. И дальше приеха-
ли сюда на Быструю. Всё так же ро-
дители всё время рыбачили. Мы
же в Эссо учились. Ну всё.

9 At the fishing camp / На рыбалке

I recorded this short anecdote on 13 June 2009 in Esso. Natalia Tylkanova told four little stories (each around 2 minutes in length) in Even, of which two are published here, namely this one and the following one (Text 10). I transcribed the text with the help of Rimma Egorova, who also provided the Russian translation. The annotated recording can be accessed at: <https://hdl.handle.net/1839/027850b3-7d02-4f5e-a65d-181bb78ac895>.

Natalija Tylkanova was 58 years old at the time of the recording. She had a college-level education and worked as a kindergarten teacher.

Synopsis

This tells of a summer when Natalija Tylkanova was about six years old, when she stayed with her grandmother in a fishing camp. With them were another old couple, husband and wife (the Istap and Konna referred to in Text 10, line 9), and a half-blind old woman called Irina. The husband fished, and Natalija Tylkanova's grandmother and the wife spent all day until late in the evening cleaning the fish and hanging it up to dry (Figure 9.1). The half-blind old Irina was with them because there was no-one in the village to look after her, since everybody was working in the fields of the collective farm or making hay. Natalija Tylkanova's grandmother got very irritated with Irina because she would disappear somewhere as soon as the women who had cleaned fish got back to camp. At the end Natalija Tylkanova told her grandmother that Irina was going to the smokehouse every evening (probably to check how much had been produced that day).

³Natalia Tylkanova’s grandmother and the husband and wife had been secretly and somewhat sarcastically referring to half-blind Irina as the “busy one”, since Irina did nothing all day, just sat around. She wasn’t expected to do much, but it was felt that she could at least go and feed the fire in the smokehouse. Instead, she did nothing all day, and only disappeared in the evenings.

⁴The grannies thought it was funny that a little child every evening listened to their constant questions about where Irina was going, and that in the end she couldn’t hold back and spoke up, referring to the half-blind old woman by the sarcastic epithet “busy one”. This kind of behaviour (a child making a judgement about an adult’s behaviour) was, however, not really condoned, so the grannies didn’t laugh out loud, only smiled a bit to themselves. The episode obviously made a deep impression on Natalija Tylkanova’s grandmother, since she reminded her about it ten years later.

исэчиклэ умыкич. Бу алачидян-нотту. Няны муннуныши бишин уныт умын атыкан, баликач. Ыч аич итты.

Нян эниңэву эммоттын, тали гундиддэттын «Илэ быди?» Таракыши атыкан баликач авышкывуч оллоттын, исэчинтэ одыкын. Ошэлче эниңэву гетки атыкантыки гундиддын: «Авышки быди Ирина оллоттын, илэдэ мидиндэ!»

Нянда ямпитэ тымин оллотты исэчин долбыклы оллыңывыр қамгидяннотты нокникарда. Эрыгыр тачин гургавчидяннотты. Нян умныкын тар нянда гундидды: «Илэ быди?» – Ями эмныкынтэ, ями атыкан укыл авышкывуч оллоттын? – «Авышки быди уррын нянда, мидин тавыр атыкан, ясчиддын быди?»

Нян би умныкын гуным: «Оны! Ноңын онка, чактыңашын, тавыр укыл амңишындула қаму тымивачиддын.» Нян тары урип эниңэлбу инимэдиллитын тару тар, эбделлитын.

ненькие, ждали их. С нами была ещё одна слепая бабушка. Не видела хорошо.

Моя бабушка приходила туда и говорила, «Где-же?» Вот эта слепая старушка вечно куда-то уходила, как только вечер наступает. Уставшая бабушка спрашивала у другой бабки: «Куда же эта Ирина уходит, где-нибудь заблудится!»

Ну вот они опять на следующий день почему-то идут вечером до самой ночи, рыбу пластают и развешивают. Всегда так работали, бедненькие. Однажды вот опять говорят, «Где-же она?» – Почему, как только они придут, почему старушка уже уходит куда-нибудь? – «Куда она ушла, опять потеряется, эта старуха, что она делает?»

А однажды я говорю: «Она как, ваша деловая, уже на дымокуре рыбу проверяет.» И вот эти бабушки стали улыбаться, им было интересно.

10 Blue eyes / Голубоглазый

Natalia Tylkanova told four little stories (each around 2 minutes in length) in Even, of which two are published here, namely this one and the previous one (Text 9); please see the introduction to Text 9 for further details about the recording and the speaker. The annotated recording is available at: <https://hdl.handle.net/1839/bf99b745-98f9-47b9-8b1c-21ed3e461146>.

Synopsis

This little anecdote was narrated after the previous one (Text 9) and hence contains references to people who were introduced before. Natalija Tylkanova tells how a fellow villager visited the fishing camp on the Icha river (Figure 10.1) where she was staying with her grandmother, in order to do some fishing for himself. He surprised the little girl with his blue eyes. The narrative evokes how isolated the fishing camps are and how much their inhabitants thirst for news about life in the village.

Голубоглазый: Текст по-эвенски с русским переводом

Титэл, тадутытты рыбалкаду бид-дэку, Егор Иваныч эмнин тар Тваяндук. Нян би кучукэн бими ноһын-дун амырдадун боддочидянниву, ноһыныши элгычиддын. Элгычиддын, ышымдэ дёһчир, явут марингу, яринда, эпкынингу ярингу, ышымдэ ар. Ичча эгден-е окат умыкич, унтыда. Итчоттымтэкэн оллымкарыл эгдемкэрыл, эвэчкэ ычы. Эгдел таду, окатла биватты. Нян эчин элгычидми минтыки ичишнин, нян биши мениву – яшалын ями нян чулбана! Нян мениди урриву, ычиву явда гуны.

Исычин нянда эниһэву Конна бичегли, Ыстапта бичегли, тавыр торэмэчиддын оны. Гуны, тала Егор

Давно, там же, на той же рыбалке, Егор Иванич приехал из Тваяна. И я была маленькая, за ним ходила, а он мариком рыбу ловил. Ловил рыбу и я не помню, что-то он убил, что-то поймал, что делал я не знаю. Ичча очень большая река и глубокая, я только там вижу больших рыб, наверно чавыча. Такие большие в реке были. И вот, ловив рыбу, он на меня глянул, и я удивилась, почему у него глаза такие голубые. И вот удивившись, ушла я и ничего не сказала.

И потом вечером моя бабушка разговаривала с покойной Конной и с покойным Истапом. Говорят, Егор

Иваныч оллоттын, таравда тэлеү-нин, тачинда бидды, тарбычинда кино биваттын, як җи эмнин, җи он биддыдэ, ибдыри тала селола. Няң ярингу Егор Иваныч, тарак оллыңгаи бакрингу ярингу, улгимиватты. Няң биши гуным оны: «Ун быди Егор Иванычышын он чурикач яшалич явда итчин!» Нянда тарав ычил явда гуны, инимесчиваттыдэ, ыштын явда говатты.

Иванович приходил, и то-то рассказал, так-то живут, и такое это кино бывает, что, кто приехал, кто как живут, население в том селе. Они спрашивали, нашёл Егор Иванович себе рыбу, или что сделал. И вот я говорю вот так: «А ваш-то Егор Иванович как бусинками глазами что-то увидет!» На это ничего не сказали, улыбались только потихоньку, но ничего не говорят.

11 Hunting and fishing / Охотник

This autobiographical narrative was recorded by Natalia Aralova and myself on 18 June 2009 in the traditional homestead (*rybalka*, i.e. fishing camp) on the Managič river (*Manyč* in Russian), where Artëm Solodikov lived year round together with his mother, her partner, his two brothers, and several younger family members; in the summer, the camp filled up with further children. The text was transcribed by Natalia Aralova together with Elena Čerkanova, the speaker's sister, and Natalia Aralova did the initial glossing. For this volume only the excerpts that talk of hunting and fishing were chosen; a few sentences were rearranged to obtain a cohesive narrative. The original recording with transcription, translation, and glossing can be accessed at: <https://hdl.handle.net/1839/92a55473-e864-4ce7-8b3d-9908ac2617a6>.

Artëm Solodikov was 51 years old at the time of the recording. He had eight years of schooling and had worked as a reindeer herder after leaving school, before becoming a hunter, first for the state farm, later on his own account. He is the son of Evdokija Adukanova, whose narratives about her life as a reindeer herder and yurt worker and her first year in school are also included in this volume (see Text 1 and Text 6).

Synopsis

Artëm Solodikov tells how he was a reindeer herder for six years, working with his parents, until he became a hunter in 1981 and moved to the Managič river (see Figure 3.1 in Section 3.1 for a photo of the homestead), where he was joined by his parents and younger brother. He lists the different animals he hunts (sable, foxes, ermine, wolverines, bears, capercaillies, ptarmigans, ducks) in winter, going to the district centre Esso around New Year and in February to deliver his furs. In summer he fishes for various salmonids, mostly with fish traps and nets, though occasionally also with a pole hook *elge* (Figure 11.1), and also works for the State Commercial Agency as a construction worker.

Тадук ынтилбу пенсионерыл оды-

Я – Артём. Давно я работал в та-
буне раньше, с семдесят пятого го-
да и до восьмдесят первого. А ко-
гда я ребёнком был в табуне же, в
семдесят пятом году в табуне здесь
кочевали, я пас в тундрах и в го-
рах. По Облуковине дальше пас с
матерью, с родителями. В восьмде-
сят первом стал охотником. С тех
пор всё время охотничаю.

Потом в 94-м, когда Союз распался,
сами по себе стали. Вот у меня зем-
ли охотничьи есть. Зимой охочусь,
когда наступает лето, рыбачу. Сей-
час стал пенсионером.

Зимой соболя, лису, горностая, мед-
ведя, если есть весной-осенью, на-
хожу. Всякую всячину, глухаря, ку-
ропатку, иногда утку, если есть.
Ещё что? И росомаху этой зимой
на буране догнал. Этой зимой собо-
лей себе нашел, лис, росомаху. Вот
в апреле медведя убил. Вот так.

С 81-го года, когда стал охотником,
тогда с Николаем Фомичем вместе
охотились. С тех пор я в одиночку
сюда перекочевал на Маныч. С тех
пор здесь живу на Маныче. Один
раньше я жил. Здесь внизу у реч-
ки дом был один. Потом мои роди-
тели, став пенсонерами, ко мне пе-
реехали. Отец наш в восьмдесят

дюр нян минтыки нулгыритын. Тар акмун восемдесять второйлан годла нёмырин. Нян тар Иливон тар ыкмун илнидюр тар Манагышту одывун. Тарапчи нян тар эду бишу.

Тар нян ноябрь одыкын, болони одыкын, тар нян гобдыдиллотту, ыгэпу быйчидиллотту. Тар гекив, явка бурин. Новый год одыкын тар Эссотки кимыдиллотту. Пушнинаңыр Госпромхозтыки ңынуватту. Тар после Нового года нянда тар эмышнотту, тар уличам гекив тар быйчидэвыр. Тадук нян тар февраль мудакаптыкын тар оддыши гобдяривыр. Эмнидюр нянда пушнинаңыр сдавайыдду.

Нян дюгани одыкын нянда рыбалкаткида, ңидэ дюв очидиллын. Анда тывтыв, дывынңиту гекив чакыдиллы. А би дюлбу очиддёттым. Тар нян геки тар ноңкикакам улиңэвыр ңинчардыр. Тарыкым ңинчарбун бишитын туркивун, нартовые. Таралдида ңиндысчиддётту. Ывгилығыл бурангаи унириву. Тарыт нян туркидыкычилливу.

Турыңутытты эгден-е умыкич-е. Адунда за день ышым успеллот-

втором году умер. И вот Леонид, вот наша мама, втроём мы стали на Маныче. С тех пор вот здесь живём.

А летом в Госпромхозе работаю. На рыбалке вот домá строим. Вот когда осень начинается, в сентябре готовимся на место охоты приехать. Приехав в октябре, пока всякую всячину себе готовим. Когда ноябрь наступает, когда поздняя осень наступает, начинаем охотиться, соболей ловить. Там разное, что нам дают. Когда Новый год наступает, в Эссо начинаем готовиться. Свою пушнину в Госпромхоз доставляем. Так после Нового года потом уезжаем там лис всяких ловить. Потом когда февраль заканчивается, заканчивают охотиться. Приехав, сдаём потом свою пушнину.

Когда лето наступает, опять на рыбалку, кто-то дом начинает строить. Опять ягоды, грибы всякие собирать начинают. А я домá начинаю строить. И вот потом всякое, вот кижучей на корм для собак. В то время собаки у нас были, нартовая упряжка. Вот на них и ездили. Попозже (букв. поближе сюда) буран себе купил. Вот на этом я стал ездить.

Моя земля большая очень. Иногда за день не успеваешь доехать, при-

ты. Приходится умым иныңу избушкағидатки, тар урэкчэн атлан дючаму бишни. А гев иныңу эеки. Капкарбу оя тулуттин. Тачинтыкан эрыгыр.

Дюғани, тик амнык Эссотки урдиру, нянда. Уныт эмнидюр нян рыбакидилдиру. Оллыңгавыр быйчидилдиру. Би элгычкыл тачин оннималлидиткан элгычишноттым. Тадук тачингылда би катепкаи тулутчоттым. Катепу туллоттым. Катепу июню, июлю, августав тулуттым. Дюрбы аткикам тулутчоттым. Тадуккыл нян аталлоттымыши. Нян тар сентябрьлағыл, монтылшы одыкын, окату аңываттым, интылдэн оллы гададыктыкий-е. Тадук адыличта адылчиваттым. Тадуккыл нян аталлуши октябрь одыкын, ноңкикакам тар быйчишным. Тадуккыл нян эр түғәни одниши нян.

Чаш, тика.

ходится один день в сторону избушки (ехать), там под горой домик у меня есть. На следующий день вниз по речке. Капканов у меня много поставлено. И вот так всегда.

Вот летом, сейчас опять в Эссо скоро поедем. Вот ещё потом приехав, начнём рыбачить. Рыбу себе начнём ловить. А я мариком так только, когда заскучаю, ловлю мариком. Так-то я катеп (вершу) себеставляю. Катеп ставлю. Катеп в июне, июле, в августе держу поставленным. Два месяцаставляю. Потом уже снимаю. И вот в сентябре уже, когда осень настает, речку открываю, чтобы рыба прошла мимо на своё нерестилище. Оттуда сеткой ловлю. Потом снимаем (сеть), когда октябрь наступает, немного кижуча половлю. Потом вот зима как раз начинается.

Ладно, хватит.

I always migrated by reindeer

Even is an endangered Northern Tungusic language spoken in numerous small settlements by formerly completely nomadic hunters and reindeer herders dispersed over northeastern Siberia, from the Lena-Yana watershed in the west to the Sea of Okhotsk and Kamchatka in the east. This geographical spread has led to considerable dialectal fragmentation, with substantial differences between the peripheral dialects, not least due to differential contact influence.

This text collection contains a selection of monological narratives from two geographically distant and linguistically divergent Even dialects: Lamunkhin Even spoken in the village Sebjan-Küöl in the Kobjaj district of Central Yakutia, and Bystraja Even spoken in two villages of the Bystraja district of Central Kamchatka. Of these, the Lamunkhin dialect is still relatively viable, being spoken by some children and adolescents, while Bystraja Even is highly endangered, with no fluent speakers younger than 50 years.

The overall theme of the volume is the traditional Even way of life, namely reindeer herding and hunting and, in Kamchatka, fishing. Reindeer herding has always been a defining way of life of the Evens and other so-called indigenous small-numbered peoples of the North; this is reflected in their language, culture, and identity. However, it is becoming increasingly endangered, making its documentation important for anthropologists and community members alike.

The collection comprises excerpts from 16 recordings made between 2007 and 2010 and amounting to nearly 8,000 words in total. Excerpts were chosen to be maximally informative with respect to the traditional way of life, but also to be interesting to read and to include linguistically interesting and important features of Even. In order to make the texts usable for the Even communities, a vernacular version of each text is included. This consists of the Cyrillic transcription used in the communities with a parallel Russian translation.
